

Look Well to the Power End of Your Sawing Rig

No part of a wood sawing rig should be more carefully scrutinized than the engine. It is the engine you must rely on to keep the outfit working.

Cold weather does not affect the steady, smooth running qualities of the Alpha. This is a great advantage, as most of your wood sawing will be done during cold weather.

The carburetor and ignition system are entirely free from complicated parts. When you start your Alpha in the morning you can rely on it plugging away steadily all day. There is nothing to fuss or tinker with—not even batteries. The perfect control of the sensitive Alpha governor instantly regulates the engine to the varying loads that are always encountered in sawing wood. This feature and the great reserve power of the engine will keep the saw going steadily through big or little wood.

The above illustration shows one of our special steel frame mounted sawing outfits. Let us know what your requirements are, and we will be glad to quote you prices and send description of a rig such as you wish.

Winter Hauling Made Easy

FOR the use of our customers whose hauling cannot be stopped by the snows of winter, or to whom the snows are welcome, as furnishing a smooth hard road over which to move their products, we offer a line of bob sleighs so complete that each man may find in it the kind of sleigh he needs and uses.

Unless a sleigh will stand hard knocks, it is of little value in Canada. Therefore, we make these sleighs, above all else, strong. Even the lightest one-horse sleighs are as strong as selected pieces of high-grade wood and steel and the most careful workmanship can make them. No imperfect or unsound material finds its way into the manufacture of these goods.

Each sleigh we sell is guaranteed, with fair usage, to carry its load over ordinary roads and to do the work intended for its size. We make a liberal guarantee arrangement to take care of the satisfaction of our customers.

See our line before you buy. It is handled by I H C local agent who will show you how big a line it is. Or, if you cannot conveniently see the agent, drop a line to the nearest branch house and we will send full information.
