

FROST & WOOD

When you see a binder with that name on the wind shield or on the deflector you can rest assured that the owner of it is receiving satisfaction from its use. If you are going to purchase a new binder, first ask your neighbor what he thinks about the FROST & WOOD NO. 3. We guarantee it will give you the same satisfaction it is giving him.

FROST & WOOD NO. 3 BINDER

Cuts 5 ft., 6 ft., and 7 ft.

To give satisfaction and the greatest amount of service a Binder must be light, strong and easily operated. The Main Frame on the No. 3 is of steel, just heavy enough to be perfectly rigid and bear the weight and strain of the machine without any possible chance of warping or sagging. Every lever is handy to the driver when he is on the seat, no need of stretching or straining to get at the different adjustable parts of his machine. This point saves time and trouble. Send for illustrated catalogue "F." which describes our full line. Pretty nearly time to think about the plow you are going to use after the harvest is in—our line is complete.
