### *Is Your Money Working*

**FOR YOU OR FOR  
ANOTHER**

Capitalists have made their fortune by keeping their own money working day and night in their own business and using as much of other people's money as they could get hold of.

If your money is lying in the bank it is making 8 or 10 or 20 per cent. for someone else, and 3 per cent. for you.

Put it to work in your own business by investing it in Grain Growers' Grain Company Stock, which has always paid a dividend of 10 per cent. or more in cash, and a much larger one in improved conditions for the farmer.
