It is a fact but little known to people who keep poultry, that the first part of a hen which becomes disarranged on the approach of disease, is the ovaries or egg producing organs. approach of disease, is the ovaries or eggproducing organs.

Excess of fat, exposure to wet and celd,
poor condition, shedding feathers, improper food, want of exarcise, or lack of certain elements in the food to develop the
embryo eggs, will all produce the same
effect and cause the hens to stop laying.

It cannot be laid down as an "ironclad"
rule, that when a hen ceases laying it is a
positive symptom she will soon be sick; but
it can be stated with the utmost assurance
that something is wrong or she would not
cease laying for weeks, and often menths.

The annual egg product per hen, in this
country, ranges from three to eight dozen
each. Now this is by far too small. There
is no earthly reason why every hen that
lays at all, should not be made to lay from
ten to fifteen dozen eggs each yer year,
and continue to do so for at least five
years. We know of parties who get eggs
at that rate in mid-winter in our cold
climate.

How to Get More Eggs.

—A decree has been published fixing the number of Roumanian recruits for the coming year at 44,500. This is a notable increase and is regarded as proof that Rounania is preparing for coming events. The arsenal and state railway factories are working night and day, and the hands have been doubled.

Your Children

Are constantly exposed to danger from Colds, Whooping Cough, Croup, and diseases peculiar to the throat and lungs. For such allments, Ayer's Cherry Pectoral, promptly administered, affords speedy relief and cure. As a remedy for Whooping Cough, with which many of our children were afflicted, we used, during the past winter, with much satisfaction, Ayer's Cherry Pectoral. For this affection, we consider this preparation the most efficacious of all the medicines which have come to our knowledge.—Mary Parkhurst, Preceptress, Heme for Little Wanderers, Doncaster, Md.

My children have been peculiarly subject to attacks of Croup, and I failed to find any effective remedy until I commenced administering Ayer's Cherry Pectoral. This preparation relieves the difficulty of breathing and invariably cures the complaint.—David G. Starks, Chatham, Columbia Co., N. Y.

I have used Ayer's Cherry Pectoral in my family for many years, and have found it especially valuable in Whooping Cough. This medicine allays all irritation, prevents inflammation from extending to the lungs, and quickly subdues any tendency to Lung Complaint.—J. B. Wellington, Plainville, Mich.

I find no medicine so effective, for Croup and Whooping Cough.
