of his motives. Mr. Macheleson, it is well known, is neither a partisan nor an office-seeker. He has no political ambition save to see the country in which he to see the country in which has no small stake well governed; nor any personal object outside a patriotic desire to secure economy and efficiency in the administration of affairs. This was the chief secret of the power of his pamphlets against the MACKENZIE Government. He has now turned his attention to the Mowar Administration in a letter addressed to his former constituents in the old Saugeen district. Like those on Dominion affairs, it is clearly and trenchantly written. He bases every statement on the official records, and his figures are taken direct from the Public Accounts, a source of authority even Mr. HARDY dare not call in question.

Mr. Macpheeson begins by giving a succenct history of the formation of the first Administration of Ontario, of the base means employed to secure its downfall, and of the formation of the BLAKE-Score and Mowar-Fraser Cabinets, In 1867 Sir JOHN MACDONALD, acting on the theory that Confederation had wiped out the old party lines, formed a coalition government at Ottawa and recommended a coalition cabinet for Ontario also. Mr. SANDFIELD MACDONALD with Messrs. Wood and Richards, two old Reformers, joined with Messrs. CAMERon and Carling. Mr. Brown, though he himself had entered into the Confed eration scheme in 1864 for the express purpose of healing the fierce party dif-ferences that had sundered the country, refused to recognize the curative effect of the Union, and at once called upon his followers to oppose the coaliti system which three years before he had commended. Mr. BLAKE, the de facto leader of the Opposition in the Local House from the first, at once attacked the SANDFIELD-CAMERON Cabinet, while Mr. MACKENZIE, Mr. Brown's agent at nection with the Agricultural College; Ottawa, made a similar onslanght on the Magdonald-Howland Coalition. Sanders of the Magdonald-Howland Coalition. Sanders of the same disregard for principle that Mr. Macking displayed in 1873, at once took in a Tory in the person of Mr. R. W. Scott, showing at once the factious character of his hostility to Sanders of the Wellington shrievalty; the Jarkaward the unscrupulousness of his mode of warfare. It scarcely needed that, however, to convince reasonable men that Mr. Blake was insincere and factious. His cry on the Scott murder, the un-British manner in which he fell upon Sanders of the Wellington strievalty; the bill whitewashing Mr. Nerson whom the Election Court had painted in his true colours; the multitudinous and costly commissions that have been appointed to do work which Ministers themselves ought to have done; the shirking of the tax exemption questions. Ottawa, made a similar onslanght on the MacDonald-Howland Coalition. Sandwiss fell in 1871, and Mr. Blake, with with a member of the tottering Goving of the tax exemption quesernment, had already shaken public tion; the employment of memernment, had already shaken public confidence in his manliness and honesty. Mr. Blake and Mr. Macken-zie rettred from the Cabinet in the confidence in the complex of the employment of members of the Dominion Parliament as Crown counsel and special commissioners in violation of the spirit of the Indefall of 1872 in obedience to their anti-Dual-Representation act. A leader of the Brown stripe was wanted, and the Diesator boldly invaded the Bench and made Vice - Chancellor Mowat sins for which there is neither excuse a willing captive. On this subject Mr. MACPHERSON says with truth . " It cannot be gainsaid that the tendency of that proceeding was to Until that occarrence, the judges of the country were looked upon as men occupying a of the people, elevated to that station, removed from the distracting influences of politics and of trade, to adimpartially. It is impossible to do justice to Mr. Magnerson's figures in an article such as this. They embrace the entire expenditure of the Province from 1868 to 1877 in alusive, and present in a lucid and intelligible shape the whole financial operations on the first state of the most profitable channel into which goods can be dispendent of the most profitable channel into which goods can be dispendent of the cottons, carpets, hardware, pottery, and other articles which formerly found their destination in the United States, British manufactures have been compelled to find other outlets, a difficult problem to solve in manufacture of the Province from 1868 to 1877 in alusive, and present in a lucid and intelligible shape the whole financial operations of the mother country and her colonies.

The accumulations of former years had of course to be drawn upon to mee these deficits; and to hide the fact, Mr MACPHERSON might have added, the Ministry is claiming as cash trust funds and other assets they never dreamed of regarding as such until 1874. The question of expenditure for a period of ten years is a vast one, and Mr. Macpherson's letter would have become a volume had he entered as fully into the minor details of government. The electors do not forget, however, the jobs that have been perpetrated in the name of Reform. When it was rumoured that Mr. R. The mismanagement of the Prince Edward Island railway under the Reform Administration was proverbial, and formed one of the grievances annually brought before the Dominion Parliament. The Charlottetown Examiner draws a deplorable
picture of the present condition of the railroad service. It declares that in many

to remain upon the track exposed to the severest weather, in other cases property left in the care of the station masters has been stolen, and even at Charlottetown station cars have been broken into and goods stolen. The Islanders, irrespective of politics, demand reforms in the railway department, and the Minister of Public Works has an important and delicate task before him in endeavouring to secure efficient railroad management.

Judgment was given last week in the Court of Common Pleas on the objection taken by Mr. Hodgins to the trial of Dominion controverted election cases in a court established and maintained by a Provincial Legislature. Mr. Justice Galt and Mr. Justice Gwynne upheld the jurisdiction of the court in all such cases. Chief Justice Wilson was of the opinion that the Dominion Parliament might not have power to authorize a Provincial Court to try election cases; but it was possible that the Provincial Court might have an inherent or statutory right to try such cases outside of any act passed by that Parliament. In order that there might be no mistake about the matter, he suggested that it would not be out of place for the Local Legislature to pass an act confirming the caterialges in the kettle and put it over the fire, placing the cartridges in the compart ment for the reception.
