THE PAST SESSION - ITS FRUITS.

The past session of the Canadian Parament although unusually protracted, has bearing on the early discoveries of gold in this country, alone induces us to publish the "dragged its slow length along" to feed upon the vitals of the country. The time,

long as it has been, was successfully emlyn t ircular has the following graphic pic-ture of the growth of this Emporium and services to the community.

An Act to amen I the mode of proceed-gs before Courts of Justice in Lower Ca-da in matters of Corporation rights, not Government having called up some three millions of their usual balance. to complete millions of their usual balance. to complete South-Ferry a few evenings since an elder-took our scat in one of the boats of the South-Ferry a few evenings since an elder-took sour scat in one of state boats of the needed reformatory measures been brought to a scrangement made by the new budget. South-Ferry a lew evenings since an enter-ly gentleman in a social mood seated him-self beside us, and commenced remarking on forward and carried so successfully to self beside us, and commenced remarking on the contrast that the present conveniences for crossing the river presented with those of forty or fifty years ago. "Forty su years ago," he said, "we had to cross this ferrey by means of a horse-boat. "We were then an hour in crossing, and the fare was twenty-five cents." Now we cross in five minutes and the fare is one cent.— "Brooklyn," he continued, "was then only a little village and the population of New Present in power deserve and will receive a little village and the population of New Present in power deserve and will receive a little village and the population of New Present in power deserve and will receive a little village and the population of New Present in power deserve and will receive a little village and the population of New Present in power deserve and will receive a little village and the population of New Present in power deserve and will receive and the population of New Present deserve and will receive present in power deserve and will received the population of New Present in power deserve and will receive the present in power deserve and will receive and will receive and will receive and will receive the population of New Present in power deserve and will receive and power deserve and will receive and power and power deserve and will receive and power and power deserve and will receive and power and power deserve and will receive and power "Steamboats, railroads, the telegraph, and eas, were thursy muthempting the muthempting the second state of the second state o gas, were things uuthought of then"-Each grappled, with a multitude of difficult and f these had come into use and affected a prejudiced questions, any one of which a revolution since he was a young man. He witnessed the starting of the first steam boat that ever made a trip up the north river. The foot of Eulton-st., New York, present site of the Fulton terry build- ample grounds for self gratulation. We ngs, but then a sand-bank, with no buildings cannot better introduce to the notice of our in its vicinity) was the point of departure of Fulton's strange little craft on its trial now closed, than by inserting a few remarks Fulton's strange little craft on its trial trip. A tamporary staging was erected along the sloping shore of sand, upon which was assembled the gazing multitude that both cheered and hooted the advent of steam, as it made its first successful *debut* before the neople of New York Circ. Of these are the Parliamentary exten-sion and reform Bill, the form the Definition and

steam, as it made its first succ essful debut before the people of New York City. Our informaut further told us that in a newspaper printed at the time it was stated that as the boat moved up the river, puffing, smoking and snorting, against the tide, it so tright-ened some of the subry of the otherway and augment the independence of the Asand anorting, against the tide, it so fright-ened some of the sailors on the other ves-sels that they fell on their knees, praying to be defivered from the power of the Exil One 1. The first steamboat that was ever ap-nies are not always rich in first-class public men. The leisure, the opportunities, and plied to any practical purpose was built by Robert Fulion, at New York, in 1807, and was named the North River. Her en-tribute largely to the ability, the dignity gine was 18 horse power; and she was 33 hours in making the passage between New here in some degree wanting; and it often happens that members o' the Legislature steamboat is now made in from six to nine hours, and by railroad in 4 hours. task. And strong as is the prejudice against filling the Legislature with mere routine attornies, we do not see that the FEFECTS OF THE HOT WEATHER sample is generally improved when we tra-
