

THE TORONTO WORLD.

A One-Cent Morning Newspaper.

OFFICE: 18 KING ST. EAST, TORONTO.

SUBSCRIPTION RATES: One Year... \$3.00; Four Months... \$1.00; Six Months... \$1.50.

ADVERTISING RATES: FOR EACH LINE OF NON-FARMER: All ordinary advertisements... 5 cents.

WEDNESDAY MORNING, MAY 14, 1884.

The Court House Site.

The most important question before the citizens of Toronto at the present moment is the site for the new court house.

The county council and the people of York favor the east side.

The board of trade are like-minded.

The city council itself favored the east side on Monday night.

The east side has always had the court house and the city has adapted itself thereto.

We are convinced that the court house ought to remain on the east side of Yonge street.

The county council and the people of York favor the east side.

The board of trade are like-minded.

The city council itself favored the east side on Monday night.

The east side has always had the court house and the city has adapted itself thereto.

We are convinced that the court house ought to remain on the east side of Yonge street.

The county council and the people of York favor the east side.

The board of trade are like-minded.

The city council itself favored the east side on Monday night.

says. Those who are bulls on wheat will not be cheered on reading that, for the first time in the history of the grain trade, the largest quantity of wheat on passage from any one country to Great Britain is now on the way from Australia.

Stock speculation is duller than it ought to be for the good of the public. The fact that the market is dull and without cheerful movement of any kind causes many a hundred dollars, and many a five hundred dollars, to remain in the possession of the man who earned it, instead of going into the big blind pool of stock speculation.

The forty Irish paupers landed in New York yesterday will of course be sent back. Canada is the only country into which British and Irish landlairs are permitted to dump the produce of their paper factories.

By a lucky guess a St. Louis fortune teller frightened an accused party into a confession of guilt.

It is interesting to learn that there are whiskey sellers in the prohibitory state of Maine, and that they nearly all belong to the republican party.

A New York medicine man says that if one falls asleep with his stomach full of corned beef and other solids his dreams will be very different from what they would be if he had partaken of food of less gravity.

A Globe reporter professes to know all about the dynamite plot at the legislative buildings.

Gen. Grant is not given to poetry, but he could very appropriately parody a much-quoted line and say: "I know a bank where hard times grow."

His Wife Would Rather Have Him Cut Wood.

From the Montreal Star.

Col. Valentine Baker's return to London may be accepted as an acknowledgment of the moment inaugurated for his rehabilitation.

Repairs to the fortification walls, Quebec, have been resumed for the season.

We do not know who is the author of these (McKim) despatches, but if they are not prepared in the Mail office we miss our guess.

Mr. Preach's Practical Temperance Talk.

Speculating in the rise in grain shows no better advantage. Low as wheat has gone of late, speculators for the rise are finding that there may be "even in the lowest depths a lower still," as Milton

landlords of Victoria are so regardless of the property in their city, and so blind to their own true interests, that, in the language of the Post, they continue to demand increased rentals, "even after their houses have paid for themselves three and four times over."

The moderate drinker who is his own doctor will find that his habit is a very comfortable house. Rents are out of all proportion to wages. Married men will therefore find Victoria a good place to stay away from.

No harm can be done by the government among grain shippers and forwarding companies at this port, by the manner in which they find themselves completely handicapped by Welland's tolls, in competing with Erie's free canal for the grain trade of the west, as a quantity, when we have an immense quantity of tonnage in port begging for bread, and a number of barges idle at Kingston.

A special cable to Cox & Co. from London to-day quoted Hudson Bay shares at 47 1/2 and 47 3/4, and verified the prediction made by The World a few weeks ago that it would go lower.

There are many disquieting rumors in circulation as to business houses, and especially in New York stocks will eventually have a depressing effect here.

During the afternoon a report was current in Wall street that the Second National bank was embarrassed owing to a heavy devaluation. The president of this institution gave it an emphatic denial.

Commerce bank stock was rather heavy to-day, which is partly accounted for owing to its connection with the large lumber company. The dividend of this bank is well known, and is about 20 per cent, and its statement is anxiously looked for.

In Chicago the wheat market boomed slightly in the morning, but later in the day, in consequence of the unsettled feeling in New York, all the advance was wiped out.

During the past seven years the Etna Life Ins. Co. has paid out to its mutual members in Canada a larger amount in Cash for Dividends than any other insurance company.

The three benefits combined amount to little short of \$100 for every business day in the year, paid to its Canadian members, or their families.

Said a Methodist Minister, when taking his 4th policy in the Zion, on the 1st of May, 1884, and receiving payment of a matured 15-year Endowment of the Zion, he has never caused me one moment's anxiety as to its security.

Will you kindly give me space in your columns to say a few words on temperance. This is something that effects the interest of all mankind, and the ladies join in the chorus. Now, as this is much better than almost everything else, it should like to show by my actions that I think so. I should like a very nice temperance hall built, as early as possible, on the most suitable place, convenient here and after thought of. I hope that all the friends of temperance, who are able, will give something towards the erection of a first class temperance hall.

British Columbia is at the present moment an interesting point for those who think of going west to let the country grow up with them.

Speculating in the rise in grain shows no better advantage. Low as wheat has gone of late, speculators for the rise are finding that there may be "even in the lowest depths a lower still," as Milton

\$2000 if the dilemma rises \$10,000; if they raise \$20,000 my \$4000 ready at any time. It would be very likely that about 500,000,000 and give me a chance to put \$50,000 of my money on such a valuable cause. I trust there are a few great number of wealthy citizens who take a deep interest in temperance, as it effects man's home and comforts more than anything else. I do not know how to get my \$50,000, but I do not know how to get my \$50,000, but I do not know how to get my \$50,000.

A Burning Question. From the Montreal Gazette. No harm can be done by the government among grain shippers and forwarding companies at this port, by the manner in which they find themselves completely handicapped by Welland's tolls, in competing with Erie's free canal for the grain trade of the west, as a quantity, when we have an immense quantity of tonnage in port begging for bread, and a number of barges idle at Kingston.

A special cable to Cox & Co. from London to-day quoted Hudson Bay shares at 47 1/2 and 47 3/4, and verified the prediction made by The World a few weeks ago that it would go lower.
