WHAT CAUSES HEADACHES?

Blood Poisoning, Always!

The blood is poisoned by retained tissue waste, due to defective action of the bowels, kidneys or skin. The tissue waste, or dead cells, circulating in the blood, irritates the nerves and brain, and headaches and neuralgia are bound to arise. Headache powders and opiates of any kind do harm, by aiding the retention of the blood poison in the system. To cure headaches, purify the blood by opening the bowels, and by stimulating the kidneys and skin to increased

"Fruit-a-tives" cure headaches and neuralgia because they purify the blood by their splendid action on the liver, kidneys, bowels and skin, and thus remove all poisonous material from the system. With these eliminating organs all active and working as nature intends them to work, there can be no poisons in the blood, and there can be no headaches or neuralgia.
