A JUDICIAL DENIAL.—The action of Judge Ferris, of Cincinnati, in refusing to issue a marriage license to epileptics, is being widely commented upon, but certainly is based upon the soundest common sense. Our contemporaries generally accord the Judge the very highest praise for the far-seeing wisdom which has led him to take this "noble stand against one of the most efficient causes for the extension of one of the most incurable and degenerative diseases." Surely with the knowledge that is now so common regarding epilepsy and certain other diseases of analogous character, it is high time the legislatures of the States took some action to prevent not only marriage but cohabitation where the result would lead to perpetuating of maladies of this character. And such laws should be extended so as to cover syphilis and other diseases that exemplify the truth of the proverb: "The fathers have eaten sour grapes, and the children's teeth are set on edge!"—*Medical Age*.
