London, Ont., Dec. 13.-In the County Court to-day decision was rendered in the suit of Charles Martin vs. Edge. The action was for the price of certain capsules for brandy bottles. Mrs. Graham had never seen and perhaps never expected her too open and shameless conduct. Annie then went to Harrisburgh, a mining camp not far from Wrangel, where her shocking exploits were every day the talk of the rough miners gathered there. A second Annie Graham was then procured in order that the \$100 might still be received. This one turned out almost as bad and was also expelled. Then the third beneficiary of the unsuspecting New York lady was introduced and given the name of Annie Graham. Nellie Hamilton, named for a wealthy Boston lady, led a similar career, and another Nellie Hamilton had to be substituted.

The disgusting proceedings referred to are as yet unknown in the East. The recital of the scandals, tolerated if not caused by these factions, would indicate that the actors were crazy, and Superintendent Hill of Portland has at last directed Dr. McFarland to go to Chilcot and Mrs. McFarland to Tougase, so that a distance of 1,000 miles may divide them.

At last McFarland got into a controversy with his aunt, and while she was preaching, protesting against his actions, he walked into the pulpit and knocked her down with his clenched fist. The business interests of the country are passing through a process of rectification. The discipline is indispensable and will ultimately prove invigorating, but while it is exceedingly paintuil it is the part of wisdom for merchants and business men to keep things as snug as possible. There is no change in the money market; the snuply of idle mousy increases, and on security that is undoubted it is obtainable at extreme low rates.

WEEKLY REVIEW - WHOLESALE MARKETS.

Trade matters have not improved since our last, so far as wholesalers are concerned. The retail stores have, of course, been well patronized during the holidays, and the sale of " fancy and useful" articles at the numerous dollars; only one or two of the tenants The continued ' luli" has given merchants the desired opportunity for investigating the operations of the past year and laying plans for the future. There are always rumors at this sesson of impending failures, as merchants who do not adopt a better system generally find out from their books exactly months. how they stand at the close of each year. In one or two cases where street rumors predicted disaster it has been found that the rumors were quite groundless. The roads have been bare of snow and bad for sleighing, so that communication with the interior has been difficult. There is at present writing a prospect of settled winter weather with more Show.

Ourrants are rather quiet at 6c to 640 as to quality. Malaga fruit is steady at the following quotations:—Layers at \$190 to 200, loose muscatels \$200 to 215, London layers \$2 45 to 260, second grades do \$2 25 to 2 40. Fine grades of blue fruit are quoted at \$3 25 to 550 per box. Valencia layers are in demand at 830 to 9c, and prices are firm. Figs are dull at 124c to 14c for round lots as to quantity and quality, extra choice Eleme figs selling at 18c to 20c in small boxes. Teas .- A good business is reported in medium to good at 220 to 30c. The sale has taken glace of about 300 pags of green teas for shipment to Chicago at 28c to 30c. In coffee and spices there is no change.

Boors and Shore. — The trade in boots and shoes has been moderate, but the situation is unchanged, it being between seasons. Stock taking still occupies most of the attention of manufacturers. In Boston the week has been quite attractive with manufacturers, and large orders have been taken by them. Nearly all the factories have now started up and are quite busy. The usual contast over prices has taken place, but the only weakening has been in plough shoes, and brogans and light shors are firm. Buyers have been very conservative in placing orders, taking only goods that experience has taught them they could sell, and only in such quantities as their trade would warrant. The Notick strike has ended, and the factories there have started up again.

Day Geons. - The wholesale dry goods business has passed through another very quiet week, the amount of sorting-up orders having been usually light, owing to unfavor. able weather and a break up of country roads, which in some districts have been almost impassable. One of the leading features of the week has been the liberal importations of English prints which are exceedingly attraceve, both as regards texture and patterns. This class of imported goods will be all recelved before the 20th instant, when the new duty of 27½ per cent (which is an additional impost of 7½ per cent) comes into force. Travollers preparing for their first spring trip, slong with stock-taking and filling a few small serting-up orders, about ocvers all there is doing at the moment.
