Seven to One

That is about the ratio. About seven times as many persons are injured as die from all causes yearly. Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidentally killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy.

It is not in the New World alone that water supply for fire purposes is here and there scarce. The inadequacy of the supply of water on certain occasions has led to negotiations between the fire brigade and the London Metropolitan Water Board with a view to an improvement. Part of the cost of the extension of the mains and other work will be defrayed by the brigade.

Contract Bonds insure completion of Buildings.

The Jamaica Supreme Court has rendered a decision in favor of the insurance companies which held fire policies upon property destroyed by the earthquake of January 14th on that island. The court rules that the holders of fire insurance policies must prove the origin of the fire which destroyed their property.

The Cleveland Inspection Bureau has given an excellent certificate to the high-pressure system of water for fires established in that city, which, however, is still incomplete. The bureau does not doubt "that the present enormous quantity of water which the two fire boats now in service can deliver through the system would prove adequate to cope with a conflagration." At the same time, it recognizes that both boats might not always be able to be had, one being required to break the harbor ice in the winter, and possibly one being required at a remote part of the city front while a fire was raging in the east.
