

Nor rural sights alone, but rural sounds
Exhilarate the spirit, and restore
The tone of languid nature. —Cowper.

SCIENTIFIC HAY-MAKING.

WHAT can be more pleasing on a summer day in June when the air is fragrant with sweet clover blossoms and new mown hay, to hear the hum of the mowing machine at work in the meadow; so suggestive of thrift, of enterprise, and of promise. We do not refer to that rattle-bang of the clap-trap machine with its noisy gear and loose joints, but to the gentle music of an all but noiseless "Toronto" or "Brantford" Mower—its smooth running gear seeming by the steady hum to be at play rather than work. Cowper's poetic lines were a prophecy of the present day as well as a truth of the time when he lived a century ago. Art has made its impress on recent mechanical implements. Crude and ugly looking mowing machines of the early type must give place to mowers in which much thought has been put on the design and appearance. The latest MASSEY-HARRIS mowing machines are models in beauty and symmetry of design and are finished in good taste. So, too, the noise and rattle of poorly made and loosely-fitting gearing and the crash of an unbalanced and miserably constructed pitman and knife are no longer tolerable in the face of the smooth and light running "Toronto" and "Brantford" Mowers.

But all this is sentiment, you say. Yes, but artistic sentiment has only been satisfied by the highest mechanical perfection. That machine which is neatest and lightest in appearance, and which runs with the least friction and noise, is bound to be lightest in draft, is sure to be fitted with the greatest care and consequently will be longest lived.

There is no grass cutting machinery or hay making tools made just as good as "MASSEY-HARRIS." Don't be deceived on that point. The MASSEY-HARRIS Co., Ltd., are originators—their staff of inventors set the pace and other makers try to follow.

THE TORONTO MOWER

THE TORONTO MOWER

Testing the "Toronto" at the Works.

HERE we see the "Toronto" being "run off" at a very high rate of speed, and undergoing a most severe testing and inspection. Every mower made by MASSEY-HARRIS Co., Ltd., is similarly tested and inspected.

THE GENUINE TOLTON PEA HARVESTER.

THOUSANDS NOW IN USE.

No 2.

Patented May, 1875-
80-85 and 1893.

4 FT. 3 IN. BAR.

Also greatly improved
for 1895.

The oldest, best, most efficient, durable, and successful Pea Harvester manufactured. Will harvest all kinds of peas and is suitable for all kinds of mowers. It can be attached without drilling holes in mower bar. Send in your orders early and secure one. Be sure to state what kind and make of mower you want it for

TOLTON BROS., GUELPH, ONT.
