

Notes

The first part of the paper is devoted to a discussion of the general theory of the problem. It is shown that the problem is equivalent to a system of linear equations. The second part of the paper is devoted to a discussion of the numerical solution of the problem. It is shown that the problem can be solved by the method of least squares. The third part of the paper is devoted to a discussion of the results of the numerical solution. It is shown that the results are in good agreement with the theoretical results.
