Then, to his astonishment, he saw his own artillery, without awaiting orders, open a barrage fire. He learned later that his artillery colonel, suspecting that something was about to occur, had gone to a much exposed listening post between the opposing trenches, and from this vantage point observed an unusual activity in the German lines. The colonel therefore ordered a curtain of fire to be directed in front of the Germans.

The French infantry in the front lines swept the German front lines with rifle fire and hand grenades, while the French trench mortars worked as never before. The German infantrymen, who could be seen waiting with bayonets fixed, now found it impossible to leave their trenches and go over the top.
