Iron Men Can't Stand The Strain Very Long

Joe McGinley, of Newark, once held the title of "Iron Man" with credit, but when a pitcher's wing is substantially enough to enable him to pitch a ball, he must in addition possess the faculty of being able to accumulate the cheers while they last and evade the hisses when they come, for some will think that the inevitable fate of the hurler with the unflinching arm.

As the baseball world is aware, an "iron man" is one who can work at least four games a week and be ready to act as the main stem in a double header in two games, if any are called. The "iron man" must be always willing to "unleash" some of the steel in his arm for the benefit of his club.

Joe McGinley used to be the best "iron man" in the business. He could pitch a double header one day and go in and wheel again the following day. And he used to win the majority of his games. That's why he was regarded as the best "iron man" Joe did his most superb work at the Polo Grounds. This was over five years ago. At present McGinley is not twirling for the Giants. Too many "iron men" have been made him lose his National League effectiveness. Now he is manager of the Newark club of the Eastern League and pitching, once or twice a week.

The "iron men" of the newer baseball era are no longer "iron men." Jack Chesbro, leading pitcher of the American League in 1904, is farming to-day on a big homestead in New England.

Jack is done for as far as the use of his league arm is concerned. He is not beset with any of the ills of his former life. He saved a great deal of what he made in the days of success, but the fact that it was Jack's own pitching that enforced his retirement from baseball cannot be gainsaid. In 1904 Chesbro was the most and home of the New York Yankees pitcher staff. He would have pitched that club into a championship but for the unfortunate strain of his "cork" ball at the revolutionary moment in the last and decisive game of the season.

After the momentous campaign of 1904 Jack was pretty nearly ready for his baseball retirement, although he seemed to pitch until 1908.

But Walsh was the "iron man" of 1906.

He pitched 66 games, winning 50, losing 16, and doing one, "What did 'Spot' Baller" do last season? Not very much. He won 16 and lost 11 games. Of course nobody can correctly prognosticate what Walsh is going to do this summer, but if he again pitches star ball he can be regarded as more or less of a marvel. He is said to be an entirely separate piece of mechanism from the rest of his constitution.

Last year Harkness, now with the Naps, pitched 66 games for Portland in the Pacific Coast League. So far, as a member of McGuire's contingent, he has not shown any better than many minor league pitchers who graduate, and not nearly as good as some.

"Stoney" McGinley worked in 64 games for Milwaukee last year. Since the opening of the present American Association race he has pitched in but a few games. In each one he has been peppered by opposing batters. "Stoney" worked to hard in 1908.

It has been decreed that "iron men" do not last long. The reason is obvious.

How Farmers Practice Conservation.

Canada, being a nation of farmers, has to pay a very large seed bill each year. Last year our crops called for 33,000,000 bushels of seed grain—wheat, oats and barley, and we are constantly increasing our agricultural acreage. This being so, the economy of sowing good clean seed is at once apparent.

The advantages to be derived from it are like the proceeds of a sum of money laid out at compound interest—they are cumulative in their effect and grow in ever increasing ratio. Some years ago a competition was carried on in some 450 places in Canada to see just what the actual results of using clean pure seed would be. If we reason from the results obtained from it, we find that our grain yield last year would have been increased by 190,000,000 bushels had clean vigorous seed been sown on every acre under cultivation. Now, 190,000,000 bushels of grain would fill 160,000 miles of railway grain cars. It is such a large amount that it is hard for the mind to comprehend, but, at any rate, it goes to show that it would pay our farmers to be particular about the kind of seed they sow.

VETERANS CABLE SYMPATHY

Will Join in Memorial Service in Queen's Park Friday.

At a largely attended meeting of the Veterans of 1867 Association, held in the lecture-room at the armories, a resolution was passed expressing the deep sympathy of the Canadian veterans with the royal family in the affliction they have been called upon to sustain in the death of the King.

The substance of the resolution was sent to England by telegraph yesterday by the president of the association, Alex. E. Wheeler.

During the next two weeks the veterans of 1867 will participate in three important services. On Memorial Day (May 30) they will gather with the Garrison troops and other organizations in Queen's Park to take part in the funeral procession.

On May 24, the veterans of 1867 will participate in the funeral procession of the late Queen Victoria at the Necropolis and St. James' Cemetery for the purpose of decorating the graves of English Malcolms McEachern, Sergt. Hugh Matheson, Private William F. Tempest, Corporal Mark Deffries and Francis Lackey, and Privates William Smith and Christopher Alderson (all of the Queen's Own), who were killed in the battle of Ridgeway on June 2, 1866, while defending their native soil on the occasion of the first Fenian raid. These services will be very impressive.

the memorial services. On May 24 they will muster at the armories at 9 a.m. to join with other veteran associations in decorating the monuments in Queen's Park, and afterwards attend the ceremonies connected with the unveiling of the South African memorial monument on Queen's Avenue, to which they will contribute their offerings of flowers. On Sunday afternoon (May 29) the veterans of '66 will assemble at Riverdale Park at 3 o'clock and proceed to the Necropolis and St. James' Cemetery for the purpose of decorating the graves of English Malcolms McEachern, Sergt. Hugh Matheson, Private William F. Tempest, Corporal Mark Deffries and Francis Lackey, and Privates William Smith and Christopher Alderson (all of the Queen's Own), who were killed in the battle of Ridgeway on June 2, 1866, while defending their native soil on the occasion of the first Fenian raid. OPENING OF NAVIGATION.

Niagara Boats on the Job.

Lake traffic really opens in Toronto with the initial trip of the Niagara boats. The "Corona" leaves the Yonge street dock for her first voyage this year at 7:30 a.m. Monday and again at 7 p.m. on the same day, arriving at Toronto at 1:15 p.m. and 8:30 p.m. The "Corona" looks epic and span, and the arrangement for dining service this year is better than ever. Mr. H. N. Jennings has charge of this department, and his handling of the dining end of the Niagara River Line boats last season established for him a very enviable record.

Keefe's ALE

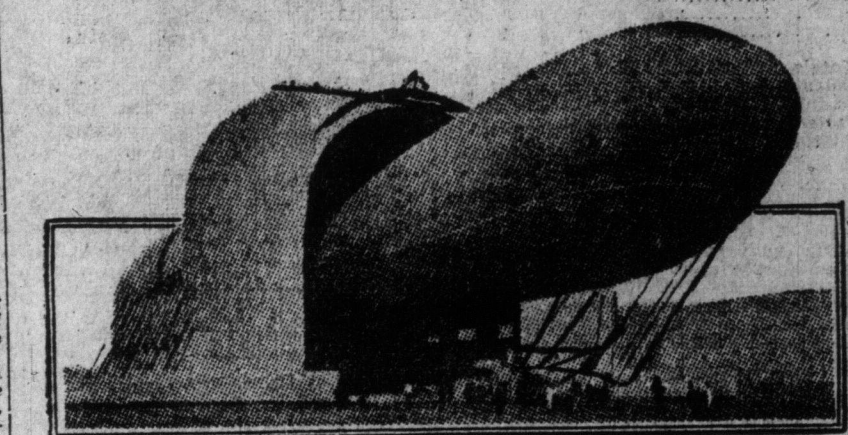

is put up in "Crown" Stopped Bottles

"Crown" Stoppers are absolutely air-tight, yet may be removed with scarcely an effort. The metal top prevents glass from being broken. The cork disk is specially sterilized to preserve the purity of the contents of the bottle. There are no cork-screws necessary—no chips of cork nor paste-y tinfoil in the ale—no danger of the neck of the bottle breaking and gashing the hands—with "Crown" Stoppers. Both "Gold Label" and "Special Extra Mild" Ales are supplied with the "Crown" easily-opened stoppers.

These Ales could not be improved, so we made it more convenient for you to enjoy them, by bottling them in these "Crown" Stopped bottles. Your dealer will supply them.

France and England in Dispute Over Ownership of New Airship

THE DIRIGIBLE CLEMENT-BAYARD II.

The entente cordiale, whatever that is, between England and France, is taking a vacation, diplomats are hurrying to the high grass regions, and the hot polio of the two great countries terribly exercised. And it's all about an airship which has just been completed.

The ship is the Clement-Bayard II, built in France by Mons. Clement-Bayard, being a thrifty soul, permitted England to get an option on the airship before it was built. A short time later some one arose in the chamber of deputies in France and made certain pertinent inquiries concerning France's aerial fleet. It developed

France didn't have one and the cabinet was rebuked by being removed from office.

Then the trouble began. The Clement-Bayard II, being the only airship in sight, France claimed it. The English lion sat right up on his haunches and roared, "Not on your blooming life," or words to that effect.

Mons. Clement kept on at work and has now practically completed Clement-Bayard III. France is going to get this new one for \$125,000 and Clement-Bayard II can go to England. It is probable an attempt will be made to sell the Clement-Bayard II from Paris to London.
