

Which would induce an appetite;
 Strengthen digestion;
 Promote assimilation;
 Create healthy blood;
 Strengthen the nerves and muscles;
 Enable the subject to successfully combat disease;
 And sufficiently economical for all.

All this has been indisputably attained. The success of the work is complete; and Fellows' Hypophosphites stands foremost amongst the remedies for chronic organic diseases, possessing properties to which no other medicine has ever aspired.

ARGUMENT.

As every species of excitation, whether bodily or mental, involves the death, decay, or elimination of a certain amount of tissue, and of the vital element, the possibility of continued exertion depends upon the due supply of reproductive means or nutrition, and an unlimited facility of eliminating dead and useless matter. While Fellows' Hypophosphites exerts an influence upon the nervous system, it will, under *all* circumstances, nourish it, and through it the muscles which it governs.

The presence of this remedy is necessary, then, especially in wasting and distressing diseases, *to create and sustain the normal degree of strength*; and its prescribed use can never exert a baneful influence under any circumstances whatever.

ABSTRACT EFFECTS.

Fellows' Hypophosphites, on being introduced into the stomach, unites with the food, and immediately enters the circulation; and, being perfectly miscible with the blood, speedily pervades every part of the system. Its effects are first declared by a pulse slightly increased in fullness and strength, a general exaltation of the organic functions, and exhilaration of the intellectual powers. Its specific influence is on the brain and nervous substance, increasing the activity of the absorbents, and renewing the blood, thus causing the healthy muscular formation so necessary in restoring the functions of the previously weakened organs.

Being then, a tonic of the nervous and circulatory

PROSTRATION.

PUGWASH, N. S.
 MR. JAMES I. FELLOWS,
 St. John, N. B. Sir—Having, while at your establishment, carefully examined your prescription and the method of preparing your Compound Syrup of Hypophosphites, I feel anxious to give it a fair trial in my practice. For the last twelve months I have done so, and find that in incipient consumption and other diseases of the throat and lungs, it has done wonders. In restoring persons suffering from the effect of Diphtheria, and the cough following typhoid fever, prevalent in this region, it is the best remedial agent I have ever used. But for persons suffering from exhaustion of the powers of the brain and nervous system, from long-continued study or teaching, or in those cases of exhaustion from which so many young men suffer I know of no better medicine for restoration to health than your Compound Syrup of Hypophosphites.

If you think this letter of any service, you are at liberty to use it as you see fit.

I remain yours, etc.,
 EDWIN CLAY, M. D.

BRONCHITIS AND CONSUMPTION.

Letter from Dr. Crane.

HALIFAX, N. S.
 MR. J. I. FELLOWS. Dear Sir—From a general knowledge of the prominent ingredients of your Compound Syrup of Hypophosphites, I formed such a favorable opinion as to be induced to recommend it to my patients as *prevalent* and more convenient

system, it follows extraordinary exertion, it applies the waste, it gains the general system. At no period of exertion of the brain, the acquisition of knowledge, or persevering study, is there any loss of nervous force, or the cause of mental toil.

Stern necessity has shown his powers beyond the early promise of excellence.

To such we record it will not only be of its use will enable him to his mental and nervous system.

Although the virtues of Hypophosphites are often required, yet in regard for cleanliness, exercise and regimen is
