EMERY BROS., WHOLESALE CONFECTIONERS

It will pay you to see our stock before buying elsewhere. Try a sample order—Goods pure—Assortment unequalled—Prices right—Shipments prompt. We are agents for the famous Valvona-Marchionni Ice Cream Cones and Wafers. The best made.

"A GOOD PLACE TO BUY GOOD CLOTHES" NOW FOR THE New Fall Suits

Almost every day we are opening up new lines of Fall Suits, just received straight from the tailoring shops.

These suits embody all the good new ideas, sanctioned by the "fashion makers" and adopted by "fashion followers."

The materials are strictly good. The tailoring is superior. They are just such suits as we like to sell, knowing as we do that every one will give perfect and permanent satisfaction.

Grays predominate, with browns and olive effects close followers. Mostly button suits, with shapely shoulders and collars that fit closely to the neck.

Excellent values at \$10, \$12, \$15, \$18 to \$25.

HOW TO MAKE THE FAT COMFORTABLE IN SUMMER

If you have fat and have difficulty in breathing or walking or eating and if you find that the heat is exhausting to you during the heated term you will be interested in knowing that the famous Marmola prescription is now being prepared in tablet form and that one of these little tablets taken after each meal and at bedtime will reduce your fat to the normal amount in 12 to 15 ounces per day. The tablets stop fat from being stored up and they assist the body to throw away the fat already made in a natural manner. They are harmless and you will find that their use will build up your system to a higher degree of perfection than ever before. They have perhaps the greatest army of responsible men and women who have written of their effectiveness than any other prescription ever written. You need not diet or exercise and you may eat when and what you will. The food you now eat turns into fat. The food you eat will make no fat if you take a Marmola tablet after the meal; and more than that, you will so strengthen your digestive organs that you will need no assistance in a short time even from Marmola Tablets. Every drug store sells them or you may write the Marmola Company, 1179 Farmer Bldg., Detroit, Mich. A case of Marmola Tablets costs only 75 cents everywhere.

HUGE PIECE OF COAL A FEATURE OF THE FAIR

The Nova Scotia Steel & Coal Company of New Glasgow will have one of the most extensive exhibits at the Dominion Exhibition, four cars being required to bring the large array of the company's products here. L. H. Johnston of the big company arrived this morning, and during the day there will arrive the mechanical superintendent and some half a dozen men. A feature of the exhibit is a block of coal mined in No. 1 colliery, Sydney mines which shows a considerable portion of the height of the old Sydney seam. This seam is about eight feet high, but a piece of six feet six inches in height has been taken out, weighing about three tons. The coal was mined in one block, but in order to ship it, it was necessary to box it in two sections. Much difficulty was experienced in getting this huge piece cut and two or three large blocks were broken before it was successfully accomplished. In all the company have fifteen tons of stuff, consisting of 5,000 pounds of steel ingot in its rough form from which steel is made, iron ore, pig iron, lime stone, and a great variety of finished steel products, including small rails, fish plates, trapezoidal and other railway materials. Then there are bars, angles, and upwards of 90 special steel products. There will be time even from Marmola Tablets. Every drug store sells them or you may write the Marmola Company, 1179 Farmer Bldg., Detroit, Mich. A case of Marmola Tablets costs only 75 cents everywhere.

Fashion Hints for Times Readers

A LOVELY TEA COAT OF MESSALINE AND LACE

Not for the boudoir, but rather for the drawing room at tea hour, is this beautiful costume intended. The long, graceful "coat" is made of alternate strips of double edge cream lace insertion and very soft pale pink messaline ribbon. The trailing skirt is of pink voile and this fabric forms the front.

The Evening Chit-Chat

By RUTH CAMERON

SUPPOSE you were about to cross a little bridge, which, although you did know it, was rotten and would have given away beneath you, and let you fall into the river and drown.

And suppose, just as you came near to the bridge, you should fall and break your arm and turn back and not try to cross the bridge.

Wouldn't you have been fortunate rather than unfortunate?

What does all that mean?

It just means that I want to suggest a new point of view that has recently come to me, upon an old matter.

And the matter is the seeming injustice of it that for the sin that they do, by two and two, each equal to the blame, and more likely the man more than the woman, the man goes apparently unpunished while the woman bears all the consequences.

Not long ago it was my duty to talk to a woman who was brought into the public interest by an unsuccessful attempt to lose in the city streets the little baby that should never have come to her.

This girl absolutely refused to tell the name of the baby's father and let himself suffer the small portion of disgrace of it all, and then I began to wonder if I and the rest of us who see things that way, aren't a bit shortsighted.

Isn't it better to break one's arm than to go on over the bridge and fall into the river?

Isn't immediate punishment, oftentimes a blessing?

I know a man who can't drink a single glass of whiskey without being desperately nauseated. When he was a boy of about nineteen he suffered in with a very fast crowd. And this inability to drink without immediate suffering, which he naturally regarded as a great misfortune, was his salvation.

I know a woman who can't offend the laws of health in the slightest degree without having an intensely sick headache. The natural result is that she is very careful not to overeat or overwork or under-keep or do any of the things that bring this swift and terrible retribution.

She doesn't think so, but isn't she really more fortunate than those of us who go on offending for half a lifetime unrebuked and then are finally obliged to pay up our arrears of carelessness by months or even years of suffering and dependence?

Then, are things so very much worse for our sex after all? The woman learns a cruelly searing but perhaps life saving lesson. The man sees only the attractive exterior of his offense, and not the white reprobate for soul and body and life and ambition and happiness, that may rather lie beneath.

Who can dare say that instead of being "Mary, pity women," it ought rather to be, "Mary, pity men?"

Daily Hints for the Cook

LAMB AND MINT SALAD.

Meat cold is much more palatable than meat served warm. Mint jelly is delicious on cold meat. To make the jelly soak one tablespoon gelatin in a third of a cup of cold water, steep a handful of mint in a cup of water, strain it, heat it boiling hot, and add it to the gelatin. Season with salt and pepper and set away to cool. You may add a dash of green vegetable coloring to make the jelly greener. Cut the cold lamb in cubes, mix with an equal part of cold diced potatoes, and mayonnaise dressing. Serve with the mint jelly cut in fancy forms.

PEACH TARTS.

Line patty tins with puff paste, prick several times with a fork and bake in moderate oven. Peel some large peaches, cut them in halves, remove the pits and place a blanch almond in each half. Boil the peaches for ten minutes in water and strain. Thicken each cupful of juice with one spoon of arrowroot or cornstarch, add one third of a cupful of sugar and one teaspoonful of lemon juice. Place half a peach in each shell of paste, pour in a little of the thickened juice and bake until the fruit is tender.

FRIED TOMATOES WITH CREAM.

Cut in thick slices without peeling, which holds them together without breaking; season with salt and pepper and roll in flour or very fine crumbs. Fry in hot oil, dripping until brown, but not blackened or "mussy." Take up carefully with a pan skimmer and drain on paper. Arrange in a hot hot pan. Add a tablespoonful or more of drippings or butter to that remaining in the pan (if there is only a little), stir in a tablespoonful of flour and as soon as "bubbly" pour in a cup of hot milk. Stir until smooth and creamy and pour over the tomatoes. Garnish with parsley.

TONIC IS ALWAYS FIRST

Tonic is the most important feature of a quality because, on the quality and permanency of tone, depends the value of the product. The magnificent, singing tone of New Scale Williams Piano is unapproachable in its sweetness, mellowness and power. It is possible to hear the New Scale Williams Piano in any room, and scale, no other piano, but also because of the Harmonic Tone Prolonging Bridge which prevents the introduction of faulty and imperfect tones.

If your piano needs a piano to complete the tone, please write for a copy of a New Scale Williams Piano on easy payments and copies of our illustrated booklet.

Sir Wilfrid in Alberta
In Lethbridge, Alberta, yesterday, Sir Wilfrid Laurier was waited on by deputations from the Dominion Council of Agriculture and United Farmers of Alberta who urged removal of the tariff walls and the improvement of the railway act, to hold railways responsible for the burden of proof where cattle are killed on the tracks.

Sir Wilfrid and party visited two mines of Alberta Railway & Irrigation Co. inspected the plants and descended the shaft.

At a meeting of the N. B. Life Underwriters' Association yesterday, addresses were delivered by Mr. Garvey, of Toronto, and H. S. Waterbury, of Calgary. Nine new members were received.

OUTLOOK FOR DRY

DOCK HERE VERY
MUCH BRIGHTER

Sir Robert Perks, Who Arrived in St. John Yesterday, Speaks of This and Shipbuilding Plant

Sir Robert Perks arrived in the city last evening accompanied by G. W. Volkmann, of Ottawa, the firm's representative in Canada, and registered at the Royal. Sir Robert was concerned with the project for a dry dock here.

"We have decided on the construction of a dock at Lewis," he said, "and are now desirous of determining what we shall do at St. John. The plans for the dock at Lewis are prepared and will be filed with the department of public works in a few days. The plans for the St. John dock are also ready and my visit now is to go over the ground with the Hon. Mr. Pugsley, minister of public works, and decide on the location. We have three sites under consideration, anyone of which is suitable for our purpose."

"Could you say where these sites are?" the reporter asked.

"Well, no, I don't know that I can tell you that," he replied, with a smile. "It will depend largely on the amount of dredging that will be done in Courtney Bay. It would also depend very largely where the location of the shipbuilding plant would be. The two projects are very closely allied."

Continuing, Sir Robert said that while the two projects were closely allied, they were separate enterprises. The erection of dry docks capable of handling large ships had been made possible by the action of the government in providing a subsidy for thirty-five years. The cost of building a dock was considerable and the work could not have been undertaken if the subsidy had not been arranged. Every existing dock in Canada had been a failure financially and the present programme could never have been carried out without government assistance. In view of the legislation passed, the outlook for a dock here was very much brighter.

As to the construction of a shipbuilding plant, he thought the average man in the street had no conception of the immensity of such an undertaking. A shipbuilding plant would not be a success unless it was assured that there would be work enough to keep it busy. The cost of labor had to be considered, the continuance of work and many other matters. He referred to the building of the Mauretania by Swan, Hunter & Co. For the construction of this huge ship special structures had to be built at a cost of hundreds of thousands of pounds. It would not have paid that firm to put up such a costly structure for that one contract, but they had it now for future work. In the same way it would not pay to start a steel shipbuilding plant in Canada for the purpose of constructing one vessel for the Canadian navy. There must be an assurance of more work and to meet the enormous initial expense the people of the dominion must consider the question of whether they were willing to be taxed to assist this new industry. There was now no subsidy for such work and under existing conditions Canada could not compete with British shipbuilders already established. Even the United States, with steel cheaper than in Great Britain, could not compete with the builders in the old country.

Sir Robert said he expected to participate in the negotiations for a shipbuilding plant to be located in St. John, but before anything was done in this direction he estimated that a subsidy would have to be offered and bonuses given for the vessels turned out.

Asked if his company would deal with the Imperial Dry Dock Co., Ltd., of this city, in locating a dry dock here, he replied that the local company had any thing that was marketable that was of value to his company they would be prepared to deal fairly with them.

At a meeting of the treasury board yesterday afternoon a sum of money was placed at the disposal of the chief of police and the chairman of the safety board for the purpose of paying the expenses of ten extra police for the day during the exhibition as well as hiring several detectives from American cities. The matter of placing a fence at the head of Rodney slip was discussed at some length and it was decided to get the opinion of M. G. Teed, K. C., as to whether the city or the street railway is liable. Arthur W. Sharpe, chairman of the board of assessors, was heard in regard to increased compensation for the district commissioners. This was on account of their having heavier duties under the new assessment law. He recommended these increased and it was decided to sustain his action. Ald. McGoldrick, alone dissenting, on the ground that he thought the commissioner for Stanley was not getting as much as he ought.

A bill from G. Earle Logan for \$295 for searching titles was recommended for payment.

Ald. Potts' bills for conducting the auction sales yesterday, amounting to \$46.50, was also ordered to be paid.

Tenders for printing the city engineer's report were opened. There were two of them, one from John A. Boves for \$97.38 and the other from the McAlpine Company for \$102. It was decided to recommend the lowest tender.

At the suggestion of Ald. McGoldrick the chairman of the safety board agreed to take up with the street railway company the matter of the company not living up to their contract regarding extra street lights.

Chairman Sharpe of the assessors was heard regarding the remuneration to be given the district commissioners this year. Last year they received \$1,840. Under the new assessment act their duties were heavier and he recommended that they be given \$2,630. The increase ranged from \$10 to \$80 each. A recommendation favoring the increase was sent to the city council.

The chamberlain then brought up the matter of complaints from The Telegraph that there had been discrimination in the matter of advertising. Mayor Frank said that he had received a letter from The Telegraph claiming that the circulation of the paper far exceeded that of the Globe and Standard combined. The letter had also pointed out that The Telegraph Company paid more than \$1,000 more taxes on their building and plant than the Globe and Standard combined.

The chamberlain remarked that so far as the advertising of properties for sale was concerned, the bills were chargeable against the properties. He had got figures from all the papers and as those from the Globe and Standard were much lower than those of The Telegraph, he had given it to them. He had consulted with no one and had been merely with the view of keeping expenses down for the poor people.

The controller said that he had been notified by The Telegraph business office on June 6 that after that date the advertising rates would be advanced about 25 per cent. Since then he had given them no advertising as he had not felt justified in doing so. He had been advised by no one nor was there any discrimination so long as the rates were equal.

His worship said that so far as he was personally concerned he did not object to criticism and he thought the rest of the members viewed it in the same light.

Therefore he had not attempted to have the advertising kept from The Telegraph on account of criticism.

Ald. Willet moved that the action of the officials be confirmed. This was carried.

10th Anniversary Sale
Henderson & Hunt's 10th anniversary sale starts tomorrow morning, 9 o'clock. Be on hand early, if you want the best in clothing and furnishings. There is a chance to save from 10 to 50 per cent. on your fall wardrobe. No other investment in the city will begin to pay such a quick return for the money. One who is interested to shop on Saturday to avoid an exhibition rush for exhibition visit will surely appreciate this bargain sale and make the Henderson & Hunt's a busy spot for the next two weeks. The store is closed today, getting ready for the opening tomorrow.
