

MORE REVENUE IS NEED OF N.B. SAYS BAXTER

Larger Income Required to
Prevent Debt Boost, He
Tells Audience

HARDWARE ASSOC'N
HOLDS ANNUAL MEET

Advocates More Settlers and
Hydro Applications to
Pulp Industry

WAYS and means of increasing the
revenue of New Brunswick must
be found in order to avoid increasing
the provincial bonded indebtedness,
Hon. J. B. M. Baxter, K. C., Premier
of the province, told the Saint John
Iron and Hardware Association members
at their annual banquet in the
Union Club last night.

Dr. Baxter made no further
pronouncement on the Government
program, saying that any such
announcement would come from the
Government as a whole after due
consideration.

He advocated the securing of
suitable immigrants for the cultivation
of farms, and the development of
the tourist industry, as well as the
application of water power to the
manufacture of pulp.

Other speakers were: S. E. Fisher,
A. M. Rowan, W. S. Fisher, Acting
Mayor; J. H. Frink, J. G. Harrison, M.
E. Agar, L. W. Simms and P. D. Mc-
Avity. The president, A. M. Rowan,
presided.

The toast "The Saint John Iron and
Hardware Association" was proposed
by S. E. Fisher. He spoke of the
founding of the association thirty-two
years ago and the impression it had
made on the commercial life of the city.

"LIVERPOOL OF AMERICA."

A. M. Rowan replied. He said that
at the time of the formation of the
association Saint John was proposed as
the Liverpool of America. This had to
some extent come true. He referred
in feeling terms to the loss sustained
by the deaths of Senator Thorne and
Samuel H. Hayward.

FISHER SPEAKS
W. S. Fisher proposed the toast "The
City of Saint John." Like the previous
speaker he made reference to the part
played in the success of the organiza-
tion by the late Senator Thorne. At
the time the association began there
were twenty-seven mills and numerous
ships about the mouth of the Saint
John River.

"We must not feel discouraged, how-
ever. We have a sugar refinery em-
ploying 600 men, the largest brush
factory in Canada, the McAvity plants,
cotton factories and others all working
at full time and business is good," he
said.

BOARD OF TRADE LAUDED.

All through the Maritime Provinces
businesses were operating on a thriving
basis and in Saint John we had a most
active and energetic Board of Trade.
Efficient work for the city had been
done by the press and these provinces
stood better in the eyes of the rest of
Canada than ever before.

TIME RIFE TO DO THINGS.

Acting Mayor Frink responded to the
toast. He said that in Saint John the
time was ripe to do things rather than
talk about them. It had been a period
of depression but we were in no danger
of being submerged. There was no
doubt of money in Saint John. There
were more than \$20,000,000 in the
savings banks of the city. It would take
jackcrews to pry the lid off.

Had we protected capital sufficiently
to loosen this money? Did we not seem
to lack confidence in ourselves? A
freer spirit should be manifest if in-
dustry were to prosper, he said.

The city was reasonably prosperous
and happy, said His Worship. The
harbor was the city's main asset and
was putting money in the pockets of
the citizens.

UP TO GOVERNMENT.

One steamer now took away as much
cargo as six sailing vessels of the old
days. We needed more facilities. The
Common Council could do no more and
the burden had been shifted to the
Federal Government. If tri-partite
agreements were carried out facilities to
carry on port work would be forthcom-
ing. Why, he asked, since the city had
given 400 acres under the agreement,
should it be thrown into the waste
basket? All the debentures on the east
side wharves had been paid off except
that on the McLeod wharf, which was
being taken care of.

C. P.'S EXTENSIVE WORK.

The C. P. R. had done extensive work
here and had made good the declara-
tion that Saint John was the eastern
terminal of the Canadian Pacific Rail-
way. Their work was worthy of the
highest commendation.

The C. N. R. had promised develop-
ment which had not materialized. Sir
Henry Thornton had been a most suc-
cessful railway man, but he feared that
he had the proclivities of a politician.

SANE MEASURES WANTED.

J. G. Harrison, in proposing the
health of the province, said New Brun-
swick wanted sane legislation and not
too much of it. "The rest of the country
has overlooked the fact that we are
a part of Canada. Now they are be-
ginning to realize it. We have a tourist
paradise and this should be made
one of the chief sources of revenue."

DR. BAXTER SPEAKS.

Hon. Dr. Baxter replied. He said
that he did not intend to speak on poli-
tics as when the Government spoke it
would do so as a whole after due con-
sideration. Dr. Baxter said the city
had things to look forward to. It was
passing through a transition period.

Home-made Remedy Stops Cough Quickly

Finest cough medicine you ever used.
Famous supply easily made.
Saves about \$2.

You might be surprised to know
that the best thing you can use for
a severe cough, is a remedy which is
easily prepared at home in just a
few moments. It's cheap, but for
prompt results it beats anything else
you ever tried. Usual store
ordinary cough or chest cold in 24
hours. Tastes pleasant, too—chil-
dren like it—and it's pure and good.
Four 2 1/2 ounces of Pinex in a 16-
ounce bottle then fill up with plain
granulated sugar syrup. Or use char-
red molasses, honey, or corn syrup.
Thus you make 16 ounces of family
supply—but costing no more than a
small bottle of ready-made cough
syrup.

And as a cough medicine, there is
really nothing better to be had at
any price. It goes right to the spot
and gives quick, lasting relief. It
promptly soothes the inflamed mem-
branes that line the throat and air
passages, stops the annoying throat
tickles, loosens the phlegm, and soon
your cough stops entirely. Splendid
for bronchitis, croup, hoarseness, and
bronchial asthma.

Pinex is a highly concentrated
compound of Norway pine extract,
famous for its healing effect on the
membranes.

To avoid disappointment, ask your
druggist for "2 1/2 ounces of Pinex"
with directions and don't accept any-
thing else. Guaranteed to give abso-
lute satisfaction or money refunded.
The Pinex Co., Toronto, Ont.

4 in 5 NEED Glasses

That doesn't mean that eighty per cent.
of the public go about half blind or any-
thing like it.

It just means this. That numerous
tests, both official and by independent
Optometrists, show that eighty per cent.
of the public need Glasses for one reason
or another. Some need Glasses mainly
to see clearer. Others mainly to counter-
act eyestrain. Eyestrain means in turn
nerve strain as well as a gradual weak-
ening of Sight.

Therefore all should have their eyes
examined in order to play safe.

Sharpe's
Opp. Oak Hall
WEEKLY

The community must think deeply and
wisely and decide on the industry into
which capital could be put with the
reasonable hope of success. It was bet-
ter to move slowly and make sure of
the ground. Success would come, he
had faith.

The sugar refinery, for example, was
not a native industry but came be-
cause of the geographical advantages
of Saint John. It was the C. P. R.
largely which had given vitality to that
project.

"We must find what we can manu-
facture here and sell to the rest of Can-
ada. We must also look for extra-
Canadian matters. We stand at the
gateway and have an advantage over
the cities of the interior. J. D. Mc-
Kenna has pointed out New Brun-
swick's advantage in the matter of dairy
products," he said.

FOOD IMPORTATIONS.

Agriculture was the biggest thing in
New Brunswick. "We are not feeding
ourselves but are importing commodi-
ties we should produce."

It was the young men of the provin-
ce who should get into public life
and cause these achievements to be at-
tained. Nature had done much. Men
must get together and do the rest. A
good resolution should be supported no
matter by whom introduced.

In Kings county there were many
vacant farms which contained splendid
land. The young men had heard the
call of the West or the United States
and the farms were offered for sale at a
fraction of their value. We must get
immigration and restore our lands with
it, he said.

URGES POWER EXPANSION.

"We need never again expect to see
in the province the old days when the
saw mill was the centre of the forest
industry. It is our job to get our po-
tential power applied to those forests."

The work had been begun by the for-
mer government. There might be a
difference of opinion as to method, but
the power should be developed and set
to grinding pulp. Light and heat would
come after. We were going to have
tens of millions expended in the provin-
ce on pulp. This would make lucra-
tive labor in the province and bring in
outsiders to share it."

NOTHING BUT DEFICITS.

The government had nothing to make
grants out of except deficits. That
would be true for years to come. Many
people wanted things done and did not
expect to pay. The province must find
a way to pay its ordinary bills with-
out increasing its bonded indebtedness.
Taxation might have to be imposed in
various ways.

When the time came for the people
to be told that ways must be found
to increase the revenue the burden
should be borne cheerfully.

"We cannot put a mortgage on the
province but we must devise ways to pay
our debts as they fall due," he said.

The tourist traffic would benefit the
province in paying a gasoline tax which
would undoubtedly be imposed.

"We have an earthly paradise and
we want tourists, not only in Saint
John but as far in the province as we
could get them. We want places
where they could be entertained not
necessarily hotels but private homes
where they would pay well for their
entertainment."

"We must find new ways of earning
money. This process must go on de-
cade after decade so long as civiliza-
tion endures."

BOARD OF TRADE TOASTED.

M. E. Agar proposed the toast "The
Board of Trade. He said the sun shone
brightly on the city."

"We want our young men to look
on Saint John as their home and to
work here and stay here."

The city owed much to the Board
of Trade. He spoke of the necessity
of grasping economic problems as unit-
ed Maritime Provinces.

"We do not need a commission, what
we need are terminal facilities. The
national Transcontinental should come
from McGinley Junction to Saint
John."

Dr. Baxter—"I'll discuss that with
Mr. Forke."

In proposing the toast Mr. Agar
paid a tribute to L. W. Simms for his
work.

EFFORTS TO GIVE SERVICE.

Mr. Simms in reply spoke of the ef-
forts of the board to give worth while
service. It might be that the hard
times we had gone through had been
a blessing in awakening the Maritime
people to their problems.

Freight rates had been gradually
super-imposed on us since Confederation
in a way that was never intended.
Business competition was so keen
that this had caused many industries
to go under. He believed 1926 would
bring relief.

The climate here was an asset, as was
Saint John's ability and geographical
location. Her citizenship was another
great asset. It was an Anglo-Saxon
race without a preponderance of the
foreign element. The original people
who went to South America had gone
seeking gold; those who came to North
America had come seeking God. The
result was shown in the history of the
two continents. He hoped the immi-
gration into New Brunswick would be
selective. He thought the Saint John
Board of Trade was regarded as the
spearhead of the Maritime forward
movement.

Percy D. McAvity proposed the
health of the guests of the association in
a full well chosen words.

EX-WIFE SUES RADZIWIŁL.

PARIS, Jan. 20.—The Countess Paul
de Palfy, formerly Miss Dorothy Dea-
con, of Boston, whose marriage to
Prince Antoine Albert Radziwiłł was
annulled by the Vatican in 1923, is
suing the Prince and the Prince's moth-
er for \$50,000 francs, representing the
cost of educating her daughter Stella,
during four years, with interest, as
agreed on at the time of the annul-
ment.

Say Engineers Too Young Under Forty

LONDON, Jan. 20.—"Too young un-
der 40" is the slogan being applied to
certain engineering trades, employers
showing a preference for men over that
age. Reasons given for this are sev-
eral. It is pointed out that until a
man is about 40 he does not usually
become a fine craftsman as is the case
with musicians and artists.

The disturbance of the war, too, has
something to do with this preference,
for the young man had not the oppor-
tunity to educate himself in his trade.
It is pointed out, also, that the great
deal of unemployment has caused de-
terioration among younger men.

Proven treatment for COUGHS

When you take PERTUSSIN
to relieve your cough, you are
taking one of the most widely
used and effective cough remedies
known to any practicing physi-
cian and pharmacist.

It is a most satisfactory treatment
for all harmful coughs, because
(1) it quickly relieves the cough
spasms, (2) it soothes the inflamed
throat and bronchial tissues, (3) it
is absolutely harmless and, most
important of all, it helps Nature to
hasten recovery by clearing the air
passages of germ-laden phlegm.

At your drug store—4 oz. bottle
60c, large bottle \$1.50.

Chemists Convert Lead Into Mercury

LONDON, Jan. 20.—The dreams
of the alchemists of old are being slow-
ly converted into realities in the chemi-
cal laboratories today. The latest de-
velopment in this regard is the trans-
muting of lead into mercury by Pro-
fessor A. Smits and Dr. Karsten, both
of the Laboratory of General and In-
organic Chemistry at the University of
Amsterdam.

They conducted their experiments
with the aid of a quartz lead-lamp
and lead of the purest possible quality,
and every precaution was taken to en-
sure that there was not the slightest
trace of mercury in any of the vessels
used. The lead was heated in a high
vacuum by means of an electric current
and after ten hours' burning was shown
by the spectrum to have been converted
into mercury.

LONG-LIVED FAMILY.

CARNARVON, Jan. 20.—Although
she has reached the patriarchal age
of 108, Mrs. Elizabeth Williams, of
Penybryn Farm, Llanethelan, Carnar-
vonshire, is still able to read and
knit without glasses. Born in the same
parish, she went to work on a farm at
the age of nine. She was performing
most of the household duties on the
farm up to a year ago. "Mrs. Williams
