

The electric street railway between Windsor and Walkerville is now in full working order, and is claimed to be one of the best equipped and complete roads on the continent. It runs in connection with the Sandwich branch at Windsor.

A local paper tells of a novel bet that was wagered and won in Kincardine recently. It was not an election bet, but an electric bet. Sam McLure, who runs the electric light dynamo in that town, made a bet with Ben Hadley, a blacksmith, that the latter could not lift a door latch with a poker. Hadley thought he had a snap, no doubt, as he readily accepted. McLure had previously run a concealed wire from the battery to the latch, and lay in wait for the blacksmith. Hadley went to work, McLure turned on the current. The result need not be described.

THERE IS BUT ONE PORTLAND

Oregon, and it is best reached via Chicago and St. Paul over the through Sleeping Car Line of the Chicago, Milwaukee & St. Paul and Northern Pacific Railways. For further information apply to the nearest ticket agent or address, A. J. Taylor, Canadian Pass. Agent, 4 Palmer House Block, Toronto, Ont.

AMERICAN IMPROVED ANTI-FRICTION METAL

The best metal for journal bearings of any kind, but

Especially Adapted to High Speed Engines

This metal is warranted not to heat or cut the journals, and its lasting qualities make it superior to any other metal.

IT IS self-lubricating,
tougher and more durable than all other metals,
the best metal known where great pressure is required.

It runs with less friction than any other metal.

It will stand the highest rate of speed and will not heat or cut.
