

### To Lessen the Fire Loss.

"Canada has enormous supplies of wood pulp and excellent water power and should, in a few years, produce the bulk of news print used on this continent. This will naturally increase the demand for all other grades of paper. Unless we encourage the planting of trees suitable for pulp, there will come a time when our supply will be exhausted.

"When thinking of pulp we naturally associate it with the forest, and fire is its worst enemy. Mr. Robson Black, Secretary of the Canadian Forestry Association, lecturing in Toronto on "The Fight to Save the Forests" stated that the Canadian Governments are permitting the burning of enough timber to double the annual pensions on 19000 returned soldiers.

"These are rather startling figures, and this Association should do everything within its power to lessen this great loss."

Mr. F. H. Gage, at annual meeting, Canadian Pulp and Paper Association, Montreal.

## YALE UNIVERSITY FOREST SCHOOL

NEW HAVEN, CONNECTICUT, U.S.A.

**Y**ALE University Forest School is a graduate department of Yale University. It is the oldest existing forest school in the United States and exceeds any other in the number of its alumni. A general two-year course leading to the degree of Master of Forestry is offered to graduates of universities, colleges and scientific institutions of high standing, and, under exceptional conditions, to men who have had three years of collegiate training including certain prescribed subjects. Men who are not candidates for the degree may enter the school as special students, for work in any of the subjects offered in the regular course, by submitting evidence that will warrant their taking the work to their own advantage and that of the School. Those who have completed a general course in forestry are admitted for research and advanced work in Dendrology, Silviculture, Forest Management, Forest Technology and Lumbering. The regular two-year course begins the first week in July at the School camp, Milford, Pennsylvania.
