Montreal

GENTLEMEN,

MONTREAL, Que., July 28th, 1893.

We are well satisfied with the Hayes' Patent Metallic Lathing, which we employed in the plastering of the National Monument, St. Lawrence street. We consider this Lathing a superior article to any we have employed hitherto, and we propose in future to use it in preference to others.

Yours truly,

F. DECARY & SON, Plaster Contractors.

GENTLEMEN,

MONTREAL, Que., January 12th, 1894.

I have used a considerable quantity of the Hayes' Patent Metallic Lathing in several first-class jobs, and I am now using it in two first-class houses and find it very satisfactory. I prefer it to any other kind of wire or metallic lathing that I have ever used, and as long as I can buy it at a reasonable price, and the article is kept up to the same standard, I will use it in preference to any other on the market.

Yours truly,

THOS. PHILLIPS, Contractor for Plastering.
