## PROSPECTUS

### QUEBEC & MEGANTIC LAND COMPANY.

CAPITAL £30,000.

In Shares of Fifty Pounds each.

PAYABLE IN TEN YEARLY INSTALLMENTS OF

FROM £4 TO £7 10s. EACH.

DURING the administration of Lord Aylmer, who at all times was most anxious for the improvement of the Eastern Townships, a purchase was made of an unsurveyed tract near Lake St. Francis, in the County of Megantic, on similar terms as those granted by the Home Government to the British American Land Company.

The purchase embraces a tract of 220,000 acres of land of good quality, lying contiguous to the unsurveyed Block of the British North American Land Company, within 50 miles of Quebec.

The projectors of the Company intend throwing open the Stock on receiving the confirmation of the Secretary of State for the Colonial Department to the sale thus made by Lord Aylmer, taking it for granted the same facilities would be given to a Company, consisting of individuals either natives of or residents in Canada, as had been conceded to the British American Land Company, the greater part of whose Stock is now in the hands of the public, such confirmation has as yet been given, the subject being referred to the late Commissioner, the Secretary of whom in his last letter stated a report had been sent to England, but since that period, December, 1836, nothing has been done.

It is proposed to divide the Stock into 400 shares of £50 each, payable in ten annual instalments, commencing from £1 to £7 10s. each.

It will be well to say a few words in favour of the project and to state at once that there will be no exclusion whatever of any class of Her Majesty's subjects, in the settlement of the tract, industry and sobriety being the requisites of those whom the Company will be anxious to encourage.

Megantic lies between long north-west, and unless situated is given, by the prospects of extensive improvement of it, is to be feared the well settled country on the Chaudiere and the thriving Townships of Leeds, Vermore, Halifax, &c. will be much retarded.

To every resident in Quebec the prospect of settling 220,000 Acres within a day's journey of the city cannot fail of being interesting, for not only will all the necessities of life be abundant but all property will be enhanced in value, for sooner or later this must be the outlet of the Townships.

The Company will be carried on most economically, as only two Agents and one Surveyor will be required, one of the former to reside at Lake St. Francis or where the most eligible site in the tract would be chosen for a town, and one in Quebec, a choice of the unpaid Commissioners would be chosen by the Stockholders under whom the Agents would act.

The British American Land Company will doubtless act hand in hand with the present Company, if formed, for every additional settler thrown in, near their unsurveyed tract, will enhance its value, and the projectors of the Quebec and Megantic Land Company feel assured that Her Majesty's operation it will add new life to their operations, as the Stockholders in England will think more favorably of the investment they have made in this Province when they see that residents are desirous of making similar ones precisely in the same tract of country.

Quebec, 23rd April, 1838.

## MORISON'S UNIVERSAL MEDICINE.

NOTICE.

THE subscribers, general Agents for Morison's Pills, have appointed WILLIAM WHITEFACER, Sub-Agent for the Upper Town, No. 27, St. John Street.

### LEGGE & Co.

That the public may be able to form some idea of Morison's Pills by their great consumption, the following calculation was made by Mr. WING, Clerk to the Stamp Office, Somerset House, in a period of six years, (part only of the time that Morison's Pills have been before the public,) the number of stamps delivered for that medicine amounted to three million, nine hundred, and one thousand.

The object in placing the foregoing before the public is to deduce therefrom the following powerful argument in favour of Mr. Morison's system, and to which the public attention is directed, namely, that it was only by trying an innocuous purgative medicine to such an extent that the truth of the Hygienic system could possibly have been established. It is clear that all the medical men in England, or the world, put together, have not tried a system of vegetable purgation to the extent and in manner prescribed by the Hygienic. How, therefore, can they (much less individually) know any thing about the extent of its properties?
