

# Gets All the Cream Long After Other Separators Have Worn Out

Every Magnet is sturdily built from the soundest materials—finest castings, steel, bronze—it must be so built to stand the strain of the high-speed bowl. Look at the Magnet design—weight low down so that it steadies itself. Bowl has double-support and spins at top and bottom on bronze cushion bearings. No wobble, no lost balance—all the cream is caught right to the very last drop. Skimmer is a special Magnet device that skims clean and is open so that it never clogs. It will save many hours of your time that would be spent in cleaning with a cheap disc-skimmer machine.

### Long Life Square Gears

The Magnet runs on square gears—that is why it delivers the cream cleanly long after other machines have worn out. Square gears run true and never wear through—you need only look under the seat of your mower or at a locomotive to prove it. Only square gears are suited for high-speed work. Easier to turn too, and just as easy after twenty years, as at first.

### Double-Supported Bowl That Can't Wear Out

The only bowl that gives perfect skimming all the time is the bowl that has double support. This patent is found in the Magnet alone. The Magnet bowl is supported at top and bottom and so can't wobble. It runs on bronze bearings. And you can operate the magnet on rough ground and uneven floors without fastening it down—because of that simple double support.

# MAGNET CREAM SEPARATORS

### 5 Minutes to Clean

The farmer's wife will think of the time saved. The Magnet bowl, skimmer and spouts can be detached without trouble. And the skimmer is one-piece and open so you can clean it with your hands and a cloth. No awkward bends in the spouts. Hours of time are saved by the Magnet in cleaning alone.

### The First Magnet is still Giving Perfect Service

At our factory is the first Magnet. We have run it the equal of fifty years twice-a-day service. Yet it skims perfectly clean as if built only yesterday. And every Magnet built has some features to add to its life and make it skim just a little more efficient. Our catalog contains testimonials from farmers who have had Magnet Separators for 12 to 17 years paying only a few cents for repairs.

### FREE Send for Big Catalog FREE By Return Mail

Write now and by return mail you will receive our catalog and literature about dairying. Learn from illustrations all the special features of the wonderful Magnet Separator.
