NEW 20TH CENTURY

Styles, Capacities, Prices, &c.

JANUARY 1ST, 1900.

September 1st, 1899, marked the introduction of the Improved 20th Century "Baby" or "Dairy" sizes and styles of "Alpha" De Laval Cream Separators. These improvements constitute a large advance in centrifugal cream separator construction and efficiency. Great as has been the universally conceded superiority of the De Laval machines heretofore, the standard is now raised still higher. As near practical perfection as have been the De Laval Separators the past year, the latest improvements make them still better, until it is difficult to-day to perceive the possibilities of further improvement.

New 20th Century Styles and Sizes.

The De Laval "Baby" or Dairy Cream Separators are now made in six different sizes and styles. All are of the improved "Alpha" or "Disc" construction. The "Humming-Bird" is solely a hand machine. The Dairy Turbine is solely a steam-motor machine. All of the other sizes are capable of convenient use either by hand or power.

You Will Be Surprised

to learn how cheap we are selling fencing this year considering the cost of wire. Better see about it before you buy. No other fences made of wire like ours. Put Page up with good end posts, it will stay there tight and nice.
