

## CONSTIPATION IRREGULARITY OF THE BOWELS

Any irregularity of the bowels is always dangerous, and should be at once attended to and corrected.

### MILBURN'S LAXA-LIVER PILLS

work on the bowels gently and naturally without weakening the body, but, on the contrary, toning it, and they will if persevered in relieve and cure the worst cases of constipation.

Mrs. James King, Cornwall, Ont., writes: "I was troubled with sick headaches, constipation and catarrh of the stomach. I could get nothing to do me any good until I got a vial of Milburn's Laxa-Liver Pills. They did me more good than anything else I ever tried. I have no headaches or constipation, and the catarrh of the stomach is entirely gone. I feel like a new woman, thanks to Milburn's Laxa-Liver Pills. I used in all about half a dozen vials."

Price 25 cents a vial, 5 for \$1.00, at all dealers or mailed direct by The T. Milburn Co., Limited, Toronto, Ont.

### The Angle Lamp

and the improvement will surpass belief. "No under-shadow" is a great feature. But for the quality of its light alone it is superseding gas and electricity in city and country homes. Its light has all of their power, with none of their glare and unsteadiness—soft, mellow, eye resting, and absolutely none of the smoking and offensive odors of ordinary lamps, either. There is nothing like it for convenience. It lights and extinguishes like gas, without removing globe—one fitting burns 16 to 22 hours, costing about 15 cents a month for oil. Compare that with the monthly gas and electric bills, or even the cost of that troublesome, smoky, smelly lamp you are using. For quality of the light, economy and satisfaction for all lighting purposes, there can be no comparison. It is the cheapest and the best kind of illumination.

to show its superiority. You are sure to buy it if you know it. Write at once for our book which explains all. Ask for catalogue No. "63."

THE 1900 WASHER CO.,  
355½ Yonge St., Toronto, Ont.

"Madam," said the teller of a bank in Baltimore to a woman who had handed him a check to cash—"madam, you have forgotten to endorse."

A worried smile came to the woman's face, but she took back the paper and wrote something on the back thereof.

When again the teller looked at the check he found that the woman had endorsed as follows:

"This ——— Bank has always paid me whatever it owed, and you need have no worry. Therefore, I endorse this check. Very truly yours, Anna M. Blank."

You cannot possibly have  
a better Cocoa than

## EPPS'S

A delicious drink and a sustaining food. Fragrant, nutritious and economical. This excellent Cocoa maintains the system in robust health, and enables it to resist winter's extreme cold.

## COCOA

Sold by Grocers and Storekeepers  
in 1-lb. and 1/2-lb. Tins.

## QUESTIONS AND ANSWERS. Miscellaneous.

### LINE FENCING.

What is the law regarding line fences? Can they be changed, straightened, or in any way moved, without the consent of both parties? SUBSCRIBER.

Ontario.

Ans.—Yes: the fence-viewers of the locality may be called in, if necessary, and the matter disposed of by and under their award.

### PIGS HAVE SCABS.

I have a litter of pigs two weeks old. Some of them have scabs all over their heads. I am feeding the sows pulped roots, shorts, and a little skim milk. Is it the feed, or is it some disease? A SUBSCRIBER.

Ans.—It is difficult to assign a cause for this ailment. The feed appears to be all right. A mixture of sulphur and melted lard, or sweet oil, rubbed into the scabs, and repeated once or twice, if necessary, will probably remove them. The bedding should be clean wheat straw, if available.

### PRICES OF PIPING.

A is an implement agent and sells B a power windmill and pumping outfit. The order called for 270 feet of inch and a quarter galvanized piping, for which A charged 20 cents per foot. B objected to the price, because he claimed he could get it for 13 cents per foot, but he said that the piping B referred to was only washed, and not galvanized. When the job was completed, there was three feet over what was needed. A takes the three feet, and allowed B 17 cents per foot for it, claiming that that was what it cost him.

1. Are there different grades of inch and a quarter galvanized iron piping?  
2. If not, can B prosecute A for fraud? X. Y. Z.

Ontario.

Ans.—1. There is only one grade of galvanized piping known to the trade in Canada. Two firms manufacture a similar article, and the prices are uniform. It should be handled by dealers at 13 cents per foot, or less, except in cases where it was being installed at a place some distance from a railway, in which case charges could be made to cover expenses.

2. We do not think that B can do so successfully.

### VESTING OF TITLE.

A dies, leaving his farm of one hundred acres to his son B, with conditions which B fulfils himself, with executrix; but the farm is still in A's name.

Through what course of law will B have to go, or how can it be put in B's name, it being five years since A died? Ontario. J. B.

Ans.—Subject to the dower, if any, of A's widow, if living, and to his debts, the title has probably by this time become vested in B, without the necessity for anything being done, other than placing the will on record in the proper registry office. If probate has not been had, then, in order to such registration, the will itself must be produced to the Registrar, and a copy left with him, accompanied by an affidavit verifying same, setting forth the death of the testator, and proving the due execution of the will by him.

### TRADE TOPIC.

WORKS LIKE A CHARM.—The following letter from H. F. Vogel, of Middle Granville, N.Y., to Troy Chemical Co., whose advertisement appears on another page, is a tribute to the value of "Save-the-Horse" spavin cure: "Please find enclosed 50c. for 8 ozs. of 'Save-the-Horse' ointment; I find it works like a charm. In the winter of 1906 and 1907 I treated a mare called Nellie V. for windpuff with your 'Save-the-Horse' Spavin Cure, with good results. It has been over nine months now since she took a lame step. I worked her hard all the while I treated her, and on bad roads at that. I cannot speak too highly of your cure."

## You cannot duplicate the barn you built ten years ago for less than twice what it cost you.

That barn of yours is valuable. Compared with ten or fifteen years ago lumber is scarce and the outlook for the future is that it will be scarcer still.

The longer you can put off building a new barn the better.

An unpainted barn loses much of its value as a barn through decay in about twenty-five years. A barn painted with one coat of good paint every other year will still be a good barn at the end of fifty years. That is why systematic painting with good paint is not an expense but an investment—an investment that pays a good, steady rate of interest.

But you must realize more than the simple necessity of painting, you must realize the necessity of getting good paint, which means paint that will prove the most economical and satisfactory.

### "Paints and Varnishes for the Farm"

This booklet will help you to select the right quality. It covers the whole subject of farm painting. It tells of special paints and varnishes for special purposes. It includes a barn paint peculiarly adapted to barns, paint that will go farther per gallon, paint that will require less labor to put on and paint that will do more and last longer when on. We send the book FREE.

## SHERWIN-WILLIAMS PRODUCTS FOR FARM USE
