

A THOROUGH SEED BED

"The finer the mulch, the better the crop" is an admitted truth and the best way to practise it is to employ one of those famous Frost & Wood Disc Harrows. Just about as valuable as a spread of fertilizer is a thorough discing with a Frost & Wood Harrow.

Frost & Wood Champion Disc Harrow

No matter how heavy or dirty the field — put this splendidly designed, strong and rigid Harrow to work and you will get perfect discing and easy work, because we use excellent bearings and the famous Frost & Wood light draft design. Two easy levers control the "cut" of the disc sections. Scrapers, controlled by handy levers keep discs clean. Three sizes, 12, 14, or 16 discs, each 16" or 18" diameter.

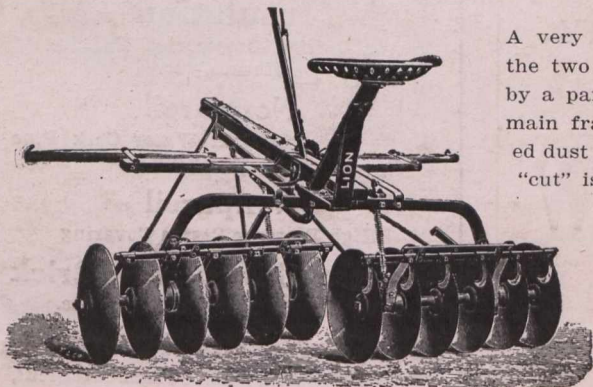

Forecarriage makes work and turning easier.

If you prefer the In-Throw Style

you will find exactly what you want in this lighter but equally well-designed and serviceable

Frost & Wood Lion Disc Harrow

A very popular type. Staunchly built, the two disc sections are held in place by a particularly strong and rigid steel main frame, and run on highly polished dust proof bearings. The angle of the "cut" is controlled by one handy lever.

The innermost discs are kept in place by strong springs. Drivers seat is well back, lessening weight on horses and meaning extra light draft. Two sizes, 12 and 14 discs.

Full information on these Disc Harrows awaits you in our new catalogue. Write our nearest branch for a copy. See our nearest agent, too, his advice and suggestions will be valuable to you.
