AMERICAN RUGBY OPERATED UPON

U. S. Play Is Opened Up and Many Changes in Rules Are Made.

on Line of Scrimmage by Offence.

At the meeting of the intercollegiate football rules committee, which met in New York on Saturday, six far-reaching changes were made in the rules, which will endeavor to meet the popular outcry against the dangers of the American game of Rugby. The changes are as follows:

1.—Removal of the requirement that the player who receives the ball from the snap-back run five yards to einter side before advancing. 2.—A requirement that seven men be maintained by the offense on the line of scrimmage.
3.—Prohibition of the flying tackle. 4.—Division of the game into four periods of 15 minutes each.

5.-No pushing or pulling of the runner to be allowed 6.—A requirement that the ball, in the case of on on-side kick, must strike the ground at least 20 yards beyond the line of scrimmage, failing which the members of the team kicking the ball are off-side. Prevent Accidents.

All the changes tend to do away with the heavy mass plays and other features of the game which have brought it into prohibition of the flying tackle should have a salutary effect, as it was this play that was responsible for a large majority of the injuries.

It was in such a play that Cadet
Byrnes was killed, and Midshipman Wil-Byrnes was killed, and midshipman whisson so seriously injured.

The seven men on the line requirement practically precludes heavy mass line plunging, which shared with the flying tackle the odium of being responsible for a large number of accidents.

As there are only seven men on the line is the American game, it will be seen in the American game, it will be seen that this is a very drastic change. The requirement that the on-side kick shall advance at least 20 yards will still further open the game, and require a further study of this particular form of offensive play.
