MARRIAGE LAW IN NEW PHASE

Prediction that Ne Temere Decree Will Be Withdrawn In So Far As It Applies to Canada.

MONTREAL, Jan. 25 .- The near fuure will see the "ne temere" decree withdrawn in so far as it applies to

Your correspondent is in a position make this statement with absolute onfidence. It is based upon information the accuracy of which is not open to question.

Steps have already been initiated and are now in progress, the success of which will remove the vexed question of the validity of mixed marri-ages from the field of practical consideration in this country. An appeal is being made direct to the Vatican and to His Holiness, the Pope, personally, and it is known to have the endorsement and support of the Roman Catholic church in Canada. There is good reason for the belief

that a decree will be issued by the Pope withdrawing the ne temere decree from operation in Canada, as was done in the case of Germany, before the judicial committee of the privy council has passed upon the constitutionality of the Lancaster bill. The result will be that the ne te mere decree will cease to be an issue irrespective of any federal legislation. The principle which the Lancaster bill is designed to assert will no longer be subjected to attack, and the necessity of the bill will be removed.

Representations which are being made to the Vatican with the above object in view are backed by an exceedingly powerful element in Canadian society, both ecclesiastical and lawyers, and carry with them such weight as to practically assure success. The decree seems therefore to be a question of time only, and the time is not expected to be long,

TO MAKE STEWART RAILROAD TERMINUS

Mr. Elmendorff Tells of Interviews With Sir Donald Mann Begarding Proposed Transcontinental Line

That Stewart is to be made the Pacific terminus of the Canada Northeastern railroad, a transcontinental system, to connect the Portland canal city with Edmonton is the report made by Mr. W. J. Elmendonff, manager of the Portiand canal nine after interviewing Sir Donald A. Mann. The Portland Canal Miner says: Mr. Elmendorff said he had several informal talks with the Toronto capitalist and on more than one occasion Sir Donald had discussed the possibilities of the extension of the railway, from which he gathered that it was the intention of the owner of the Chaadian Northern railway charter to proceed with active construction eastward this spring. "He told me," said Mr. Elmendorf, "that the Short Line was not built merely for an ore carrying road, but it was to be in fact a part of a great transcontinental system of which Stewart was to become the Pacific terminus in the north. Sir Donald has a thorough knowledge of the Groundhog mountain coal deposits and it was his earnest ambition to have steel laid to that district-100 miles east of Stewart-at the earliest possible moment. From all my conversations I gathered that the outlook this year; for Stewart, from a railway point of view, was most optimistic

LOST, ONE HORSE

Animal Sold to Victoria Man is Basis of Suit in County Court at Vancouver

VANCOUVER, Jan. 25.—Is the draught horse sold Mr. O. E. Edwards, of Victoria, by Mr. Joseph Brooks alive,

This question confronted Judge Howay in the county court today, when Mr. Edwards brought suit against Mr. Brooks for the insurance and the ful-fillment of the guarantee in connection with the purchase. The plaintiff's counsel called a veter-

inary surgeon and other witnesses to show that the horse died in August last. Mr. Grant, for the defendant, produced witnesses, who swore they had discovered the animal in a city livery. Where, then is the horse now, if you

say you have located him?" was the court's inquiry. "He disappeared the other day in a mysterious fashion; and we are now

tracing him," declared counsel. Pending the possible rediscovery of the beast, his honor decided to award damages to the extent of \$132.

DISCUSSES PROPOSED

TOLLS IN CANAL Liverpool Mewspaper Sees Intention of U. S. Capital to Seek Benefits of

Preferential Privileges Discussing the approaching completion of the Panama canal the Liverpool Journal of Commerce says: "Judging from recent announcements the inten ion of certain influential people in the United States is to turn the Panama anal into an engine for promoting the hemes of American capitalists, to the money by giving them preferenhal privileges, but the adoption of such

ean a most serious handicap to the lew waterway, and may, indeed, preent it from ever becoming a success. The agitation now going on in the

policy, it need hardly be said, will

e imposed on United States vessels shall be paid by the government, and in aid of this demand it is stated that 25 per cent. of the Suez canal tolls are paid by states on behalf of vessels fly-ing their respective flags. This is, of urse, only another way of making the hew waterway free to American craft, and imposing heavier charges on foreign vessels, a proceeding which, no matter by what name it is called, will be barefaced discrimination, In, the convention with this country effected by Lord Pauncefote it was expressly laid down that in the working of the canal there should be no discrimination in favor of one nation against any othe nation, but when President Taft asks for preferential rates for American ships, and there is an official proposal to do the very same thing under the cloak of large treasury subsidies, it is time that the nations asked whether treaty rights were altogether to be ignored. Certain European countries would at once reply to such a policy by granting equal subsidies, and this, in-deed, should be insisted upon by the people of the United Kingdom, for, as under fair conditions, we are certain to be the best customers of the canal.

deliberate discrimination of this kind should be met by instant retaliation. "It would appear, also, that it will be none too easy to induce American capi-talists to put their money into ventures connected with the canal, even if sup-ported by the state. It is announced that Mr. B. N. Baker has been unable to provide the three million dollars. which had to be deposited on Novem 25, in order to secure the contract for the carriage of the mails between the Atlantic and Pacific ports, and that this failure was due to the opposition of the banks, instigated by the railway companies. The inducement of being able to carry goods from the Pacific to the and it is expected these vessels will complete the passage under the 20 days. They will be fitted with six double-end ed and four single-ended boilers, and the style of the vessels will be somewhat different to those now on the route,

what different to those now on the route, for they will have cruiser sterns, straight steme, three funnels, and two masts.

Welsford Buys Steamer

At its reported from Liverpool that J. He Welsford Ltd., owners of the steamer Ikhalis, which is to be fitted with oil burners at Sair Francisco and placed in the Canadian Maxieur time, have just pluchased from Cardin owners, for whom she was building, a single deck shelter dock steamer, now under course of construction at Messre, Richardson, Duck & Co.'s yard, Stockton-on-Tees, on Duck & Co.'s yard, Stockton-on-Tees, on the Isherwood principle of longitudinal framing, for the sum of £51,500. She is 4,790 gross, 2,980 net register, and 8.350 tons d. w. on 24 feet 10 inches, and has an approximate cubical capacity of 500,000 feet, Length, 390 feet, beam, 52 feet 6 inches, depth, moulded, 28 feet. Engines by Messrs. Blair: 26 inches by 42 inches by 70 inches, stroke 48 inches; three single-ended boilers. Water ballast in usual doubt bottom and peak tanks, six winches, five hatched 24 feet by 20 feet, and one hatch 36 feet by 20 feet.

BEAVER TRAPPERS HAVE RICH SEASON

Game Warden to Recommend Close Season During 1913 Fishermen to Government.

trappers of the province have reaped an unprecedented harvest. Based upon the experience of the season, Mr. Bryan-Williams will recommend to the Attorney General that a new closed season be declared for 1913, and that when another open season is legalized, shooting hunting or trapping shall be non-permissable until December 15 at the earliest. The beaver skins are graded into three classes, and it is held that if would be in the interest of the hunters themselves for them to wait until the pelts are

really in prime condition. Sporting fishermen are also making sporting fishermen are also making representations to the department with regard to desirable change in the trout season. The season does not open now until March 30, by which time all the steelheads, which run up the streams in, February, have deteriorated in condition. By June the freshets begin and practically enforce an unofficial close season so that an earlier opening of the season is regarded as justified. The Department has also been asked to enforce more rigorously the regulations prohib-

itory of net fishing. Whatcom Ashore at Dungeness. The steamer Albion, which arrived at Port Angeles from Seattle yesterday morning reported that the steamer Whatcom, of the Inland Navigation company, had gone ashore at Dungeness. The steamer was fast in the soft mud for three hours but was refloated with the rising tide. She was not damaged in the least by her mishap and proceeded on her run.

SMALLPOX OUTBREAK

Many Cases of Mild Type Reported From Towns in Southern Callfornia

SACRAMENTO, Cal., Jan. 25 .- Accordng to reports received by Secretary Snow, of the state board of health, anepidemic of mild smallpox exists in the scuthern part of the state. Up to date approximately 100 cases have been re-ported, and it is the opinion of Dr. snow that many more have been overlooked. Three new cases reported from San Bernardino doday.

Fresno was the last city to report the presence of the disease. A number of schools have been closed as a resuit.

The epidemic originated in Los Angeles, Dr. Snow believes, Health offi-The agitation now going on in the nited States in favor of preference is taking the form of a proposition that all tells and transit charges which may did not go to bed.

A STATE OF THE STA

MR. CHURCHILL YIELDS POINT

Intends to Address Home Rule Meeting in Belfast on Feb. 8th, But Not in Ulster Hall.

LONDON, Jan. 25 .- Winston Spencer Churchill, first lord of the admiralty has sent a letter to Lord Londonderry ex-viceroy of Ireland and one of th Unionist leaders who are opposing the Belfast home rule meeting, stating that he will advise the Ulster Liberal association not to insist upon holding the meeting in Ulster hall, Belfast, as conemplated on Feb. 8, but that he intends to deliver a speech somewhere in Belfast on that date. Mr. Churchill says in his letter: "It is my duty to keep my promise to the Ulster Liberal association; and assert the right of free speech in a public meeting. But as the main objections appear to be directed against the holding of the meeting in Ulster hall, I shall ask the Irish Liberal association to accede to their wish. There will then be no necessity for your friends to endure the hardships of a vigil or sustain, the anxieties of a seige. Neither will it be necessary for you to break the law in attempting to deprive us forcibly of the use of prop erty to which we are lawfully entitled.

"It is not a point of any importance to me where I speak in Belfast. On the contrary, I desire to choose whatver hall or place is least likely to cause ll-feeling in the Orange party." The letter concludes; "It has, how-

ever, became of importance to public liberties that a meeting should take place at Belfast on Feb. 8, and 1 intend to hold it there in the lawful exercise of the elementary rights of citizenship." Mr. Churchill's conciliatory move is calculated to lessen the chance of rioting at Belfast on Feb. 8. Matters had eached a deadlock, offering no escape without the gravest consequences:

The Ulster Unionists appeared ready to take any risk to prevent Mr. Churchill, from speaking in the hall where his father, Lord Randolph Churchill, delivered his famous dictum "Ulster will fight, and Ulster will be

The harbor commission at Belfast, by informing Mr. Churchill that February 9 would be inconvenient for his proposed visit of inspection gave strong support to the Unionists. On the other hand the Liberals made a formal demand to be placed in possession of Ulster hall on the morning of February 8; with a view of defeating the Unionist tactics.

At this point as a result of the con-ference held in London vesterday. Mr. Churchill volunteered to accept a change in the place of meeting, and although the Unionists hall his decision as a re-treat, largely due to the rebuff administered by the Belfast harbor commis sioners, there is little doubt that they velcome the opportunity to escape from an unpleasant position, as public opinion seems to be going against them.

Mr. Churchill's letter was made public too late for the Orange leaders to arrive at a decision tonight, but the gen--Requests from Sporting averted, and the harbor board appears to have placed itself in an uncomfort. able position by needlessly snubbing Mr.

that the threats do not emanate from the general body of Protestants in Ireland, but from a small minerity of Orangemen, who are opposed to every great reform for the benefit of Ireland.

MOSQUITOES AS DISEASE CARRIERS

Dr. Hadwen of Agassiz Talks Before Natural History Society - How Malaria is Communicated. 4 822 14 - 1 - 1 - 1 - 5 - 5

British Columbia Blood Parasites and Insect Carriers" was the title of a most interesting and instructive lecture given last evening before the Natural History society at a sepcial meeting held in the Y. M. C. A. Assembly hall by Dr. Hadwen of the Dominion Agricultural department, who is at present attached to the government experimental farm at Agassiz.

The speaker, who was greeted by a large and interested audience, illustrated his remarks wish a set of beau-tiful slides from drawings which he had made himself, and which proved most

Introduced by the chairman, Mr. W. J. Introduced by the chairman, Mr. W. J. Sutton, who urged upon his hearers the importance of specializing in any work they might undertake, Dr. Hadwen said that he intended giving a life history of mosquitoes, while he would also show a number of drawings illusalso show a number of drawings illustrating different stages in insect life. There were two principal kinds of mosquitoes, the malaria carrying species and the midges, to give them the good old fashioned English name which merely stung but did no other harm. The doctor showed a number of slides illustrating the introduction of the malarial germ into the skin by the mosquitoes, and told how in the south the people were able to distinguish between harmless and poisonous mos-

Many Varieties He believed that there were as many as 1,500 varieties of mosquitoes in the world. He had been asked by many people how the malaria carrying mos-

quitoes.

quitoes infected a person, and in this connection he noted the curious fact that mosquitoes suffered from malaria as well as man. It was even possible that the disease in the mosquitoes could be inherited.

In some part of the province they were a very serious nest. A the last

were a very serious pest. A the last few years he had been privileged to study them along the banks of the Fraser river. They were very much more numerous in some years that in others. Last July they blew in from the lake on Sumas Prairie—making a journey of 15 miles in three days' time, traveling on a mild breeze. They had been so bad that the men in the saw mills had been unable to work. One solution of the trouble that presented itself to him was to oil the swamps on which they bred. In New Jersey they have tried this method and also drained the land with most successful results.

The majority of the mosquitoes here

were not harmful. At the end of last year he had found malarial mosquitoes, though they did not convey the disease and it was a curious fact that in other countries where malaria had died out, the malaria mosquitoes still remained. Dr. Hadwen also dealt with parasites. He referred to a mite which attached itself to the horn fly. This special fly was introduced into the eastern states where it attached itself to the cattle. It spread alarmingly and afterwards came up to Canada. It was supposed to have originated in Great Britain, and as the mites described fed upon the files

they attacked, it was believed that they were responsible for the decrease in the species everywhere. Female More Deadly

He also showed illustrations of the common stable fly, and the horse fly, reminding his hearers that it was only the female of the fly species that bit; never the male.

At the close of Dr. Hadwen's lecture a number of questions were asked, various members of the audience, re-counting their experience with the sum-mer pest. One gentleman told how he had once come acress a district in-fested with mesquitoes where there were no animals at all for them to feed on, and wanted to know whether they fed on birds. In reply Dr. Hadwen said that they did feed on birds, and he had often seen them bite those in captivity, especially chickens. He also mentioned the interesting fact that the female mosquito laid an average of three or four hundred eggs. A warm vote of thanks, those by Mr. Wallace and seconded by Mr. O. Hastings, was afterwards passed the lecturer.

Before closing the lecturer announced that at the next regular meeting of the society to be held on Monday at 8 p. m. in the Friends' hall, Mr. E. F. Robinson would speak on "Bees and Blossoms—or the Cross Fertilization of Flowers."

LUMBERMEN ARE

Deputation from Mountain Manufacturers' Association Waits on Hon, W. R. Ross -Grants to Fairs.

Among the important deputations from the provincial interior now in the city with the object of consulting the government on matters affecting terests in which they are specially con-The open season for bever in British Columbia is now nearing a close, and according to the reports received by Game Warden A. Bryan-Williams, the trappers of the province have reaged as O. Anderson and others, and presented the resolutions adopted at the associa-

the resolutions adopted at the association's recent annual meeting.

One of these resolutions—with which, however, the provincial administration has nothing directly to do—urges the fostering and development of lumbering mining and fruit growing in British Columbia by tariff revision in their favor. Another urges special endeavor on the part of the railways to meet the crying need of the prairie farmers for more cars, wherewith to farmers for more cars, wherewith to move their wheat.

With reference to the reported aboli-tion of the dumping clause in the tariff. of 1907 the association has placed it-self on record as of the opinion that the provisions of this dumping clause should be extended for the protection of the industries of the dominion. That great damage is being done to British Columbia through the policy of certain subsidized railway interests of Canada purchasing lumber and other supplies in the American market is expressed in another resolution, the association going upon record in enunclation of the opinion that the rail-ways should support home industry by buying their supplies, insofar as pos-sible, within the limits of ahe Domin-

Other resolutions and these were the ones more particularly discussed with the minister of lands and the premier and members of the executive yesterday—were on the subject of forest protection as against the fire menace, and in connection with the wide spread movement for a possible adoption of government ownership in respect to telephonic services. It is understood that the general provisions of the new forests bill commend themselves to the lumbermen. Indeed it could scarcely be otherwise, although various minor changes are suggested.
These were yesterday amicably dis-

cussed, and the lumbermen will return to the capital in a week or ten days for a further conference. . Trans-Columbia Bridge

Another delegation of yesterday came

from the city of Trail, its business being more particularly with Hon. Thomas Taylor, as minister of works. In fact this delegation desired to oppose at the outset any possible suggestion of removing the trans-Columbia bridge from the site assigned near Trail in the event of the representations of Nelson's contingent being successful and the government induced to bridge the Price Ellison, upon agricultural show matters, school necessities and hospital requirements.

Yet other delegations reported from Delta, Coquitiam, and other lower Fraser points, their business being brincipally with the ministers of agri-

culture and of education,-with regard to fall fair grants and appropriations for pubic school requirements. The Vancouver exhibition association deputation, which came to the capital with a proposal that the provincial grant for all fairs be increased from \$30,000 to \$100,000 per annum, and fixed an appointment for Monday with the premier and his colleagues.

The south Vancouver delegation yesterday discussed with the government the right of property owners to subdivide discussed with the government the right of property for Monday with he premier and his colleagues.

The South Vancouver delegation yes erday discussed with the government the right of property owners to sub-divide and market realty without obedience to the dictates of the local authorities in respect to street allow nces, in which connection it was several days age suggested in the hous by Attorney General Bowser that legis-lation may shortly be forthcoming dealing with subdivision matters on general principles.

The South Vancouverites are vagain

interviewing the executive today this time upon the questions of annexacion and the Anderson tax case.

SHORT VISIT TO WASHINGTON

Duke of Connaught Spends Day in United States Capital and Calls Informally on President.

WASHINGTON, Jan. 25 .- The Duke of Connaught went the American pace in his visit to the national capital today. Arriving late in the afternoon he was whirled to the British embassy first, spent forty minutes in the White House, where he was received by President and Mrs. Taft, then was motored back to the embassy, where he was the guest of honor at a dinner to which most of the prominent members of the diplomatic corps were invited, visited the National Press club, and then, tired but delighted, as he expressed it sought his private car.
He left about midnight for New York.
The duke, the first royal visitor to Washington in years, having visited the White House, President Taft returned his call at the embassy. The duke had no official message to bear from Eng-land, and the president had none to give. Their conversation was of the most general character, and the only formal welcome to His Royal High-ness was that extended to him when he left his private car at the union

station by Major A. W. Butt, the president's principal aide.

The reception in the White House was as unceremonious as the state officials and the British ambassador could make it. The duke was presented to, the president by Ambassador Bryce and then Mr. Taft presented him

to Mrs. Taft and Miss Helen Taft. The members of the cabinet and their wives were, presented by Major Butt. Mrs. James Bryce, First Assistant Sec-relary of State Huntington Wilson, and Second Assistant Adee were the only guests oftside the cabinet. Following the format reception, tea was served in the red room of the White House by Miss Helen Taft. The president's return call at the embassy was most in-formal, Only Major Butt accompanied him. His Royal Highness talked with the president about twenty minutes. The president walked back to the White House. Tonight Mr. Taft was the guest of Postmaster-General Hitchcock at a cabinet dinner, and the Duke was the guest of Ambassador Bryce at a dinner at the embassy, which he deft shortly before midnight to visit the National

At the press club the Duke made the first and only public speech of his visit to the United States. On being introduced to the newspapermen. In said: "I assure you it is a pleasure to meet you gentlemen, who have positions of such honor in this country. I hope you will always use them for the good of the world. I hope also that England and the United States will always be the best of friends for the good of the world.

The visitor, who was accompanied by Ambassader Bryce, had been assured that his visit to the press club world be informal. He was received with an uproarious velcome, and seeing seme rembers smaking, turned to, he nearest: "I'm glad to see that this really is informal," he said. "May I ask for a cigarette?"

He chaited with the members for some time, and then signed his name in the guest book. He did not use his title, but jotted down. "Arthur, Governor-General of Canada."

In Memory of John Bunyan LONDON, Jan. 25.- A memorial window for John Bunyan was unveiled in Westminster Abbey this afternoon, 224

Iditared Gold SEWARD, Alaska, Jan. 25.—Two thousand pounds of Iditared gold dust arrived over the trail tonight by dog team en route to San Francisco.

vears after his death.

Grangers' Views TORONTO, Jan. 25.-The Dominion Grange in session today passed a strong resolution in favor of reciprocity with the United States. If the government will pay the wages of the farmers' hired man, the Dominion Grangers say, the country will blossom as the rose. The steel bounty equals the wage bill of the steel men. Why not apply the same rule te agriculture? was the position of the Grangers on the proposed restoration of the steel bounties. A resolution was west arm of Kootenay lake.

Nelson's deputation also conferred of the steel bounties. A resolution was passed opposing the good roads policy.

Nelson's deputation also conferred of the federal government.

Plant breeding and selecting has been our business for years. We market the results in the and flower seeds. They grow FRZE ON REQUEST -D.W. Ferry & Co., Windsor, Ont.
