As we have seen in tracing the relation to Nasa Catarrh and throat diseases to consumption, there are times, perhaps days, or even whole weeks to-gether, when the affection gives little or no annoy nnce, and the patient flatters himself that it has entirely passed away, when a sudden cold or other cause of irritation occurs, and the progress of the disease is materially hastened. At this season of the year, not untrequently, the disease becomes apparent, and admonishes the patient of the terri-ble fa'ure which must follow if the inflammation 's not speedily allayed. Many there are who en-"cavor to convince themselves that the evil is not of any magnitude, and will soon pass away with the special cause of the irritation ; but experience will prove to them the fearful error as it has to thousands who have preceded them at that "bourne from whene no traveller returns." No one, therefore, who is afflicted with nasal catarrh or throat affection is safe while it is suf-fered to exist. Often slight causes give rise to se-tions accuring the day of the result.
