The coal agents, as a rule, are a sa set of men, and they have many hopes. They are now making preparations for a big business this winter, and claim that the present ness this winter, and claim that the present supply of something less than 300,000 tons of anthracter at tidewater will be rapidly diminished. Within the past ten days the demand for all domestic sizes, they claim, has increased perceptibly and production does not appear to keep pace with orders. The total output during the past ninety days has been the largest in the history of the combined companies and aggregates over 12,000,000 tons, nevertheless the visible supply is 250,000 tons less than it was at this sime 1887.—Wall Street News.

The churches at Wolfe Island and Pittsbury owe to them, among others, their beginning and present prosperity. To every call on the benevolence also Miss Macdonald was ever ready to respond, and none can doubt that in the pain and weakness of her recent illness she found the promise fulfilled:

You need not cough all night and disturb your friends; there is no occasion for you running the risk of contracting inflammation of the lungs or consumption, while you can get Bickle's Anti-Consumptive Syrup. This medicine cures coughs, colds, inflammation of the lungs and all throat and closs troubles. It romotes a free and easy expectoration, which immediately relieves the throat and lungs from viscid philegin.

has again been demonstrated, this time by the Society of Science, Literature and Arts of London, Eng., who on April 10th of this year, after a thorough examination, made the following award.

REPORT ACCOMPANYING THE MEDAL.

Excess of praise is hardly possible when speaking of this new and superbly beautiful design, which is intended to meet the demand for a more expensive exterior or cabinet, together with a most superbaction. This organ is of most substantial and pleasing proportions, and of a style of finish suitable for any situation. In pleasing balance of proportions, practical utility of form, richness of ornamentation and delicacy of finish, this instrument will not only compare favorably with the best but surpass all organs of any make; while for strengt and purity of tone, variety of expression and freedom of action it is far in advance of anything yet produced.

SIR HENRY V. GOOLD, Hon. Pres. Society Science, Letters and Art, London, Eng. REV. IRWIN COATES, M.A., Hon. Sec.

PIANOS. PIANOS. The Musical Opinion and Music Trade Review, published in London, Eng. April 1, 1887, under the heading CANADIAN MUSICAL EXHIBITS AT THE COLINDIES EXHIBITION, has the following:

Referring to Piane Fortes of Messrs. Heintzman & Co., Dr. Stainer says as follows: "I much regret that, owing to the late period at which I was called upon to make a report, all the more important instruments exhibited by this firm HAD BEEN SOLD AND REMOVED. But those remaining fully justified their high reputation. An Upright Grand, which I examined was in every respect a fine instrument; the touch was sympathetic and had a good repetition; the tone was full and rich. I also tried a specimen style No. 9, which was equally deserving of unqualified praise."
