Wheat Yield Estimated at 267 Million Bushels

MAY BE BILLION

When Crop Is Marketed

According to threshing returns the general harvest throughout the Dominion is greater in volume than that of of wheat is approximately 267,000,000 bushels; of oats, 496,000,000 bushels. 193,000,000 bushels; oats, 394,009,000 bushels, and barley, 56,000,000 bushels. At the end of the last fiscal year, Canada's favorable trade balance was \$175,000,000, but since then, for the four stoms receipts in August indicate held produce considerably above the av-rage. Of grain and its products there a substantial increase in the mount available for export. For the 2 months ending July, grain and wheat solution and wheat lour exports represented 22.7 per cent.; n 1919, 20.7 per cent., and in 1918, 1.4 per cent. of the total. The main-enance of the volume of such staple chine shop. As he expressed it to The pooked for, with a material gain in larry products, living animals, tobacco and all our work is absolutely guaranteed.

as compared with \$695,000,000 in 1919. Similarly purchases from Cuba nereased from \$4,350,000 to \$30,500,000. Of particular commodities imported, here is a decided increase in breadtuffs, cotton, flax, furs, hides and skins, eather, iron and steel, rubber, silk, sugar, automobiles, wood and wool. The extraordinary increase in sugar imported is partly accounted for by the increased volume of the exports into which sugar largely enters. During stuffs, cotton, flax, furs, hides and skins, eather, iron and steel, rubber, silk, sugar, automobiles, wood and wool. The extraordinary increase in sugar imported is partly accounted for by the increased volume of the exports into which sugar largely enters. During the fiscal year ending March last, the alue of sugar products exported was \$30,000,000, as compared with \$3,200,000 n the previous year.

nd steel, are not offset to so great diamonds imported within the fiscal the case for some tin ear is 257 per cent., or from \$1,250,000 o \$4,470,000. It is thus obvious that he consumption in Canada of costly mported goods continues. While the aports of the remaining months of the year will be in increased value, their alue, in view of falling prices and of acreased production in other countries, may not exceed that of the imports ufficiently to cover interest and other charges for services due abroad.

Adverse balances were usually met, prior to the war, by borrowings abroad

which could be effected at rates of in-terest relatively low as compared with those current in Canada. The situaon is now, however, reversed by the igh rates of interest prevailing in reat Britain and the United States, consequence of which it has been

ack the gloss and luster and gives it the signs will all be in position by ton appearance of abundance.-Advt.

Machine And Electrical Repair Shops of T. A. Terry Second To None In London

Fullarton Street Plant to Be Replaced by \$20,000 Garage Next Spring

In spite of the fact of the rapid increase in the use of motor vehicles. BUSHELS GRAIN both for pleasure and commercial transportation, it takes a person of Expect Trade Balance Restored vision to build up in the short space of less than three years an automobile and general repair business such as Thomas A. Terry has developed at 150 Fullarton street.

Starting in his present location about two years and a half ago without help and with but few tools, in addition to a capable pair hands, Mr. Terry has bushels; of oats, 496,000,000 bushels. Gostered a repair shop which at the fostered in repair shop which at the present time is second to none in the city in point of facilities for doing work, both machine and electrical. At the present time Mr. Terry has 11 expert mechanics employed at his plant and even with this number his plant is far from adequate to cope with the demands made upon it.

The machine shop is without doubt months ending July, the excess of imports has amounted to \$124,000,000 and contains the most up-to-date machinery for any kind of machine work. In this shop broken parts, not no diminution of imports as compared only for automobiles, but for any kind only for automobiles, but for any kind of machine, are replaced at very short of machine, are repl proaches the season during which exports attain their greatest volume with the sending to factory for extra parts. Expe an adverse balance. So far the harvest season has been a favorable one, and hopes are materializing of a yield of field produce considerably above the average. Of grain and distributing agent and has a service station for Zenith carburetors. external key slots or making geals, a service station with his business. He power punch press, power drill, power hack saw, internal key way cutter or hack saw, internal key way cutter or blotter, as it is better known, and slotter, as it is better known, and slotter, as it is better known, and slotter, as it is better known, and slotter are described as a slotter with the sauthorized to make adjustments and repairs on this famous make of motor car equipment.

chine too complicated for us to handle dark for our forest products, in hich is included paper, and for certain minerals, notably asbestos, the lemand remains firm. Generally, the semand remains firm. Generally, the rechand is satisfactory.

On the other hand, there does not appear to be any sign of our imports of the 12 months ending July unounted to \$191,000,000 as compared with \$75,000,000 in the previous 12 months. The low value of the pound terling may furnish some explanation

The plant, in addition to ordinary material electrical work, does a large operations commencing on the derection of one of the largest and most complete garages and machine shops in London. Mr. Terry has great faith in London. Mr. Terry has great faith in London. Mr. Terry has been defective and has obtained a large property adjacent to his present the Forest City and has obtained a large property adjacent to his present the follow. Also, while the maximum costs of house and land for solid construction, under the Municipal Housing Act of 1920 it is the Forest City and has obtained a large property adjacent to his present the follow. The maximum cost for the pullarton street. The building which Mr. Terry is planning will cost in the neighborhood of \$20, and the property which has been purchased has a frontage on Fullarton street of 106 feet and a depth of 198 to feet.

The plant, in addition to ordinary material electrical work does a large of 106 feet and a depth of 198 to feet.

A commission appointed under the Municipal Housing Act. The Ontario director of housing considers that about 50 per complete garages and machine shops in London. Mr. Terry has great faith in London. Mr. Terry has prevent the feet.

In a building behind the car repair in London. Mr. Terry has prevent property of Pullarton street City and has obtained a large property on Fullarton street of 1920 it is \$4,500, under the Forest City and has obtained a large property on Fullarton street City and has obtained a large property on Fullarton street. The building of

of the garages have the complete ma-| finest hotel.

\$30,000,000, as compared with \$3,200,000 but in Canada, the changes recorded not the previous year. Other products, are slight. Food prices remain firm, and those for manufactured necessities and steel, are not offert to see great such as a continue to decline, but in Canada, the changes recorded are slight. Food prices remain firm, and those for manufactured necessities and those for manufactured necessities such as clothing, while slightly lower, n extent by increased exports of are not expected to recede to any great hese commodities in the making of extent. Increasing labor, transportation they are an important factor. It tion and other costs largely offset the hight also be mentioned as indicative decrease in the price of wool, hides and other raw materials. At present, made, that the increase in the value industry is more settled than has been the control of the control o supply has improved. These are conditions which conduce materially to efficiency, but as yet the volume of production is not such as to cause much change in the present scale of prices. Changes to conform with the general movement towards credit deflation are

Wool produced during the current year amounts to 21,000,000 pounds, or practically double the annual product prior to the war. For Western range wool, the producer is being paid, according to the grade, from 45 to 55 cents per pound, less the carrying charges to the central market at Toronto. For the entire Canadian clip the average price last year was 60 cents. For the fiscal year ending March last, 1771 690 pounds of raw wool were important for the product of the farmer himself and his family, but is also of vital interest to urban population. A polluted well on n consequence of which it has been found more profitable to dispose of our securities in Canada. In the case of Great Britain the unfavorable state of the market is aggravated by the low rate of sterling exchange. On the other and, in order to effect sales in the United States, Canadian securities must be offered at prices to yield the purchasers not less than 7½ per cent. It cannot be expected, therefore, that

CANADA SPENDS

Ontario's Share \$3,500,000 and More Needed

1.184 HOMES BUILT

High Cost of Construction Has Hurt Scheme

According to official reports, 1,184 ouses were build in Ontario in 1919 under the terms of the Federal Loan and the Ontario Housing Act of 1919, at an average loan per house of \$3.-106.40, or a total of over \$3,500,000. The amount appropriated to municipalities by provincial orders-in-council was over \$10,500,000. It was also estimated that to meet all requirements of the various municipalities for 1920 about \$8,000,000 extra would be required. The province's share of the federal loan is 8,753,291.93, leaving about \$10,000,00 o be provided from other sources. O his amount the Province of Ontario has agreed in an informal way to pro MAJOR E. L. McCOLL, who has been To provide for the housing needs un-

when Ontario's share of the federal oan is exhausted, the province has enacted this session the Municipa Housing Act, 1920." Amendments to the Experts in every line of motor and Ontario Housing Act of 1919 provide that its provisions shall apply only to such municipalities as were already op erating under the 1919 act before the Municipal Housing Act, 1920, was pass

> instead of enjoying the federal loan at 5 per cent., debentures issued by the municipalities, and guaranteed by the province, will probably mean money at 6 per cent, to the owner building

nonths. The low value of the pound terling may furnish some explanation of this growth, but, while dollar exhange has been high, purchases from he United States have also increased substantially. These, for the 12 months anding July last, amounted to \$881, 00,000, as compared with \$695,000,000 in Mr. Terry stated that his plant now ever determind to get an early start at probably some 3,000 houses will be built does work for practically every garage in town. The plant receives a good deal of work from this source, as few city in such proximity to London's construction, probably 10,000 houses would have been built in Ontario u
