

**Grapes**  
green or ripe, in jelly, spiced conserves, or simply preserved in light syrup, make a delicious and inexpensive addition to your winter supplies.

## Lantic Sugar

because of its purity and FINE granulation, is best for all preserving.

2 and 5-lb Cartons  
10 and 20-lb Bags

"The All-Purpose Sugar"

PRESERVING LABELS FREE

Atlantic Sugar Refineries, Ltd.  
Power Bldg., Montreal

## Be Safe!

**KENDALL'S Spavin Cure**  
In the hands of horsemen, veterinarians and farmers for 35 years it has proved its worth in hundreds of thousands of cases.

Dr. B. J. KENDALL COMPANY  
Enosburg Falls, Vermont, U.S.A.

## Truth Will Out

Hub (with irritation)—Why is it that you women insist upon having the last word?  
Wife (calmly)—We don't. The only reason we get it is because we always have a dozen arguments left when you stupid men are all run out.

## Children Cry FOR FLETCHER'S CASTORIA

Bertha Krupp, owner of the immense gun works at Essen, Germany, is reputed to be worth more than \$200,000,000.

White enamel furniture can be cleaned with turpentine and it will retain its gloss.

Rubber bands are not expensive, and they are useful in so many ways in the kitchen.

Warmed-over meat loses its flavor, therefore the gravy should be well seasoned.

If the layer cake insists on sliding when you are putting it together, put two skewers through the layers to hold them together.

It testifies for itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself.

Milk or milk foods will not scorch in the cooking if the steppan is rinsed in cold water and rubbed with a little fresh butter or lard.

When beating eggs with a Dover egg beater, try holding the beater at an angle in the bowl. The work will be accomplished much quicker.

Women volunteer reserves collecting waste paper for the Glasgow Corporation are now a familiar sight in that city.

A Remedy for Bilious Headache.—To those subject to bilious headache, Par-melee's Vegetable Pills are recommended as the way to speedy relief.

Est.

## FAMOUS BRIDGES.

The Highest, Largest and Most Ornate Structures of Their Kind.

The biggest bridge in the world is the Forth bridge. The British navy can pass under it, and its biggest dreadnaught looks like a pygmy in comparison.

The highest bridge in the world is the wonderful single span which crosses the gorge discovered by Livingston, into which the mighty Zambesi leaps in a fall only matched by Niagara.

The longest single span in the world is the span of Brooklyn bridge. It is a suspension bridge, and its supporting towers are 1,600 feet apart.

The two longest bridges in the world are the Tay bridge in Scotland and the great bridge which carries the railway across the St. Lawrence at Montreal.

The most ornate bridge in the world is the Tower bridge across the Thames. In fact, it is perhaps the most beautiful bridge in existence. It is unique, too, in that it is both a girder bridge and a suspension bridge and is also like the ancient drawbridges of romance.

Its cost was £1,500,000, which is just about half the amount the Forth bridge cost.—London Chronicle.

## INFLATION AS A DEFENSE.

Easy For the Puffer Fish to Bask in Natural Enemies.

The puffer fish affords a novel example of the way nature sometimes works to protect her creatures. The many different species inhabit all tropical and other warm seas and certain large rivers.

The peculiar characteristic common to all of them is their ability to inflate themselves with air or water until they become almost spherical in shape.

A few good sized eel were placed in one of the exhibition tanks of the New York Zoological society with a dozen puffers about two inches long.

The hungry eel at once attacked the puffers, but in an instant every puffer inflated itself so completely with water that it became almost globular.

Puffers that become frightened near the surface of the sea and are inflated with air sometimes drift ashore, where they roll along the sands until they die and are dried by the sun and wind.

The Japanese make lanterns of their dried inflated bodies, for the stretched skin is as transparent as oiled paper.—Youth's Companion.

## Locating Icebergs.

The captain of an ocean steamer in most cases finds out when his vessel is approaching an iceberg from the men down in the engine room.

That sounds queer, but it is a fact nevertheless. It appears that when a steamship enters water considerably colder than that through which it has been going its propeller runs faster.

When the propeller's action therefore is accelerated without the steam power being increased word is passed up to the officer on the bridge that icebergs may be expected, and a close lookout for them is established.

There are natural reasons for the propeller acting in this way, and sea captains will assert the same thing.

## One Good in Flimsy Houses.

The Japanese have an easier time than their confreres in Europe. Crime in the land of the chrysanthemum is almost limited to theft and cases of bodily harm resulting from street brawls.

It is next to impossible, the chief of the Tokyo police says, for a murderer to be committed without some one hearing of it at the moment.

This is due to the fact that the houses are composed of paper and bamboo, so any noise in a house occasioned by robbers or assassins would not fail to attract the attention of neighbors.—Dundee Advertiser.

## No Hope For Them.

"Some folks fuss with the world because it won't turn to look at them," says a Georgia philosopher, "but if it should stop to hear their complaints they'd soon be fussing because it doesn't talk back. There's no pleasing them this side of heaven, and even up there the angels wouldn't know how to make 'em feel at home."—Atlanta Constitution.

## Taken at His Word.

He (after marriage)—What! You have no fortune? said over and

over again that you were afraid some one would marry you for your money. She—Yes, and you said over and over again that you would be happy with me if I hadn't a cent. Well, I haven't a cent.

## Too Busy.

"When a cook is making her bread she is unlike the rest of the world in one particular."  
"What is that?"  
"She does not want her friends to come to her in her hour of knead."

## Good actions ennoble us, and we are the sons of our own deeds.—Cervantes.

## BELGIUM'S BRNEFACTOR.

A Great Man Whose Name is Seldom Heard.

"Hoover? Who is Hoover?" someone asked at a war conference recently. The ignorance was excusable, for few people know who or what "Hoover" is, although, to quote the words of a member of President Wilson's Cabinet, "Hoover is the American of all Americans who has played the most important part in the great tragedy being enacted in Europe."

Herbert C. Hoover, who is head of the Belgian Relief Fund and has directed the expenditure of £10,000,000 in recent months, is one of the most brilliant engineers and financiers in the world.

His greatest engineering work has been achieved in China, where he has opened up mines and vast networks of railways. Starting life as a farmer's boy, he worked barefooted in the fields.

Hoover paid for his own education, supporting himself for four years at Stanford University, afterwards qualifying for various mining appointments, achieving a reputation in Mexico and California before coming to Europe and becoming such a power in the mining and engineering world.

It is a saying that where Hoover leads other men follow, and today the former farmers' boy is sought by Royalty and the business kings of the world.

From his office in London he directs his huge mining operations in all parts of the globe, as well as the great relief work for unhappy Belgium.

## To Regularize Marriages.

Irregular marriages in Scotland are receiving the attention of the Secretary of State for Scotland, and he has recently introduced in the House of Commons a bill to amend the present registration law.

A memorandum attached to the Bill states that the present law provides that the parties to an irregular marriage in Scotland may apply to the Sheriff within three months of the marriage for a warrant to register the marriage.

Owing to the neglect of the parties many warrants are not followed by registration. The number of applications has considerably increased since the war, and there is reason to suppose that the parties in a number of cases are soldiers and sailors.

The Bill makes it possible for men serving with the colors to comply within the limits of a short furlough with the formalities necessary to a regular marriage.

At present that is often impossible, and many who would prefer to be married regularly are compelled to resort to an irregular marriage.

## National Emblems.

On the origin of the adoption of the thistle as the emblem of Scotland history is almost completely silent, but tradition is as glib as ever.

According to one story, the Danes were stealing barefooted through the darkness towards the Scottish camp (in spite of their rule which regarded a midnight attack upon an enemy as unwarrantable), when one of the soldiers suddenly trod upon a thistle.

Involuntarily he uttered a cry of pain, and the Scotsmen, being aroused, leaped to their feet, hurled themselves upon the Danes, and inflicted fearful slaughter upon their foes.

The origin of the "wearing of the leek" by Wales is still a matter of archaeological disputation. Welsh ecclesiastical tradition ascribes it to St. David, who caused the Britons under King Cadwaladr to distinguish themselves by wearing a leek in their bonnets when they fought against the Saxons.

Shakespeare, however, ascribes its origin to an incident in the Battle of Crevy.

## Colors and Heat.

In an attempt to illustrate graphically the relative values for summer wear of different colors in dress materials, an interesting experiment was recently conducted.

Four strips of cloth, made of the same material and weight, but of different colors, were placed on a cake of ice and exposed to the sun. The fabrics wore white, yellow, red, and black.

The result showed in a striking way how white reflects the sun's rays while black absorbs them.

groove approximately twice as deep as that covered by the latter was melted under the black fabric.

## White-Washed Kerbstones.

Since the exigencies of war have made it necessary largely to eliminate street lighting in British cities, it has been found advisable in certain instances to whitewash the kerbs on either side of public thoroughfares so as to make it easier to discern the roadways at night.

At Norwich a pneumatic painting-machine carried on a steam wagon has been successfully employed for doing this work. The lime solution is forced through a hose under air-pressure and directed at the kerb. A nozzle especially designed so as to prevent the spreading of the wash beyond certain limits is used.

With this equipment the work can be done at a rate of about three miles an hour.

## Richest in Europe.

Queen Wilhelmina of Holland is said to be the richest sovereign in Europe in her own right, her income being enormous from the crown lands and from her vast colonies.

## Exit Red Tape.

By the substitution of white for red tape in London Government offices a saving of \$7,000 a year has been secured.

## Our First Paper Mill.

The first paper mill in America was established in 1690 at Roxbury, near Philadelphia. The second was erected in Germantown in 1710, and the third, founded in 1714 on Chester creek, in Delaware, was the source of Benjamin Franklin's supply.—Argonaut.

## Directed.

Floorwalker—Looking for something, madam? Fat Lady—Husband. Floorwalker—First aisle to your left—male order department.

## Always Smoking.

"Do you think smoking shortens life?"  
"I don't think so. Look at old Vesuvius."

## When life ceases to be a promise it does not cease to be a task.—Amiel.

## FLYING BULLETS.

Forces That Control the Curve They Take to Reach the Ground.

The trajectory of a rifle is the curve which the bullet describes in traveling from the muzzle of the rifle to its mark at a given range.

This curve is the component of two forces—first, the momentum imparted to the bullet in the rifle barrel and second, the downward pull of gravitation.

Many persons have the erroneous idea that so long as a body is traveling ahead very fast it will not drop.

The fallacy of this notion can be very prettily shown by a laboratory experiment in which two rubber balls of the same size and weight are projected from a miniature catapult at precisely the same instant, but in such a way that ball A has double the velocity of ball B.

Although ball A will travel twice as far as ball B before it strikes the floor, it will always be observed that the two balls strike the floor at the same instant.

High velocity, then, does not free a rifle bullet from the effect of gravity, but it does enable it to travel a greater distance ahead before it has had time to fall any given distance.

That is the true reason why high velocity tends to give a low trajectory. For comparison of cartridges the height of the trajectory at midrange is generally taken as the standard.—Outing.

## APACHES OF PARIS.

Strife Over an Underworld Beauty Led to Their Undoing.

The apaches of Paris are an order of the lowest and most dangerous criminals in the world. There is not a great central organization like the Italian orders and no fixed rules or assemblies.

It consists merely of groups of crooks operating in different quarters of the city. These little groups or circles take their names from the quarter of the city that they inhabit and have their own conventional signs, places of meeting, leaders and the like.

## WHO IS RESPONSIBLE

for the health of the family? The mother, of course! She is naturally particular to give her children only the purest of internal medicines, but she may not always know that a remedy applied to the skin enters the child's system, by absorption, just as surely as a medicine that is swallowed.

This is a fact, and the mother should, therefore, use only the purest ointment obtainable.

Scientific analysis has proved Zam-Buk to be absolutely pure. The great English Chemist, Mr. W. Lascelles Scott, says: "I have made an exhaustive analysis of Zam-Buk and have no hesitation in certifying its purity and its inestimable value for skin ailments and injuries."

Although the healing powers of Zam-Buk are beyond those of other ointments, it is at the same time so refined that it agrees with the most sensitive skin—even the skin of a baby. Mothers who have once used it say they cannot do without Zam-Buk.

It is best for eczema and all skin diseases, ringworm, blood-poison, scalp sores, ulcers, boils, pimples, plies, burns, scalds, cuts, etc. All druggists or Zam-Buk Co., Toronto, 59c. box, 3 for \$1.25.

## COUNTY OF LAMBTON

Treasurer's Notice as to Lands Liable for Sale for Taxes, A. D., 1916.

Take notice that the list of lands in the County of Lambton liable for sale for arrears of taxes by the Treasurer of the County of Lambton has been prepared by me, and that copies thereof may be had in the office of the County Treasurer.

And further take notice that the list of lands for sale as aforesaid is now being published in the Ontario Gazette in the issues thereof bearing date 8th, 15th, 22nd and 29th days of July, 1916.

And further take notice that in default of payment of the taxes in arrears upon the lands specified in said list together with the costs chargeable thereon as set forth in the said list so being published in the Ontario Gazette before the day fixed for sale of such lands, being the 16th day of October, A. D., 1916, the said lands will be sold for taxes pursuant to the terms of the advertisement in the Ontario Gazette.

And further take notice that this publication is made pursuant to Assessment Act, Revised Statutes of Ontario, 1914, Chapter 195, Sec. 149, Sub. Sec. 3.

Dated at Sarnia this 6th day of July, A. D., 1916.  
H. INGRAM,  
Treasurer of Lambton.
