

# A SPLENDID MEDICINE FOR THE CHILDREN

Baby's Own Tablets are the best medicine a mother can give her little ones. They are a mild laxative which quickly regulate the bowels and stomach and are guaranteed to be entirely free from any injurious drugs. Concerning them Mrs. A. D. West, Loretown, Sask., writes:—"Baby's Own Tablets have given me more satisfaction than anything else I have ever given my children. They are easily taken; always work well and though I have given quite a few to my baby they seem to work as well now as at first, which is something other laxatives seldom do." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Forest has engaged John A. Baird, engineer, of Sarnia, to prepare plans for the paving of main street.

Considerable progress has been made toward beautifying the factory grounds. The fence separating our premises from the Holt property has been removed and the rear of this lot will be converted into a lawn and will have a large bed of Gladioli in the centre. There will also be several lawn seats provided for the employees at noon hour.

The "No Admittance Sign" means that those who wish to be shown through the factory should first refer to the office. This is the rule, because when you walk through of your own accord you miss many of the interesting lines in the process of manufacture and obtain only a mere outline of the plant in general. By first referring to the office the management will be pleased to show you the many lines we make and explain fully the machines and the purposes for which each is particularly adapted. We are now having our spring housecleaning, painting, etc., after which the manager contemplates holding open house some day when visitors will be particularly welcome.

## GET IT ALL

Get all the enjoyment there is in life by having good glasses when you attempt to read. Good glasses can not be picked up hap hazard. Try on as many pairs of ready-made glasses as you like there will always be something lacking—That something is the quality of goodness and accuracy which goes with the glasses we make after we have carefully examined your eyes. Do not be satisfied with just any kind but come here and get the right kind. Cost a little more but cheaper in the end.
