THE PRODUCE MARKET.

THE PRODUCE MARKET.

TLOUR.—During the week there has been a large I quantity of Flour received, principally from Western States, which has been offered freely. Canada superfine is still very scarce and commandsfull figures as soon as it comes on the market. The large quantities of Western Superfine offering has occasioned a decline of from 5 to 10c per bbl. on inferior samples. Single and Double Extra are in demand. Considerable quantities of both descriptions have changed hands within the week at the range of our quotations No 2 and Fine are grades much inquired for, but the market is bare, a few hundred bbis of Western being all that is offering. Bag Flour continues in demand at \$3.10 to \$3.15. The strong upwara tendency noted last week is not maintained, and we report the close of the market generally as quiet and steady.

WHEAT—Receipis of U. C. Spring have been almost entirely discontinued. Chicago and Milwaukte are the sources from which we are receiving supplies at present. There have been several cargoes placed at quotations in the early part of the week. To-day there is less inquiry; prices are 2 to 3c lower on both sorts.

The following Table shows the prices of Flour and Wheat this week as compared with the same period last year.—

AVERAGE PRICES.

BUTTER.—Receipts of New are increasing daily. The weather for the past eight days has been unusually fine with refreshing rains at night, and the grass has come forward very luxuriantly. The season for making Butter has now fairly commenced, and from the accounts received from Canada West, we have reason to expect a very large quantity will be made this summer.

to expect a very large quantity will be made this summer.

It is to be hoped that merchants who are receiving Butter from the farmers will exercise the care and caution that has been enjoined upon them by several of the leading commission houses here through these columns lately. Dependupon it the remedy ites with the merchant who buys from the farmer.

The sales of the week comprise about 200 packages, chiefly of New Butter at from 18 to 21c; Old brings 11. Eand 14c, according to condition. The demand is still strong, and we look for maintenance of prices for some little time to come.

LARD.—Very little doing owing to scarcity. Pure readered would bring 13 to 14c.

TALLOW.—Wauted. Demand good; sales at Sand 8;c. Pork.—The market is well supplied just now with liess, which has declined to \$21 to \$21.60. Other grades are less plenified. There is not much animation to note in this article. Stocks are in hands of those able to central them, and no great reduction in prices is leoked for.

Con Viewer —Horns have mot with ready sales and

looked for.

CUT MEATS.—Hams have met with rendy sales, and
the market is pretty well cleared out; sales are made
readily at quotations.

ASHES.—English markets are reported as dull owing
to advice of large shipments from this port. This
market has been influenced by the news. We have to
quote l'ots 6c lower than last week. Pearls remain
without change in the absence of any large transactions.

without change in the movement of any tensions.

LLAF TORACCO.—There has been some enquiry for Canada leaf which has been met by holders. Sales have been made at 3, to 3]c. Missouri and Kentucky leaf is not dealt in by manufacturers at present that we can hear of.

(For quotations of Produce, see Weekly Prices Current on preceding page.)

THE LEATHER MARKET.

THE BRAINER HERE AT THE PROPERTY OF THE BASE WERE A GOOD deal of enquiry I for Hemlock Sole Leather in large parcels; but to sales of any magnitude have transpired with the exception of about 800 Sides at 18c; selfers seem to be firm at that price, and there exists no doubt but present figures will be maginalized, if not a further adrance. Shipments are still being made to the United States, and the Lower ports. The receipts of this description are not heavy; the total inspection for the week being 2,605 Sides.

**SLACORTER SOLE is very firm, with very limited structure.

amyais.
HARNESS LEATHER is in rather better demand at

quotations.

Waxed Upper is higher; but, the demand for consumption being yet small, the prices are still very

WAXED CALF.—Heavy are wanted, but the stock is so meagre, that orders cannot be filled. Other descriptions of Leather without change.

"WHAT NEXT?"

KIRKWOOD, LIVINGSTONE & CO.

To our Customers:

"WHAT NEXT?"

To our Customers:

There is a By-law on the books of the Montreal Corn Exchange Association which says no member or table holder shall furnish commercial information connected with transactions on 't hange to any of the city newspapers When this', law was passed The Transactions on 't hange to any of the city newspapers When this', law was passed The Transaction we have availed ourselves of its circulation of some have availed ourselves of its circulation of some \$6,000 to 10,000 copies weekly, as a medium for furnishing our constituents with our Weekly Market Report. It appears that this "Market Report" has taken the place, to a very large extent, of a weekly production which the Corn Exchange Association issues, whereat the Committee are very wroth, have called a meeting and notified us that we are violating the By-law, and intimate that we must stop the publication of our report in The Trade Review, or be expelled from the Corn Exchange. The writer has notified the Association that at its next meeting an amendment of this By-law will be moved in the meantime we refer our friends to the market reports published in this paper, which will be found correct and reliable. We hope in the course of a hort time to be able to renew the publication of our usual circular without fear of the threats of the Committee of the Montreal Corn Exchange Association.

LEEMING & BUCHANAN,

Commission Merchants,

St. Nicholas st.

Montreal, 1st June, 1865.

CIRCULAR.

486 & 488 St. Paul Street, and 427 Commissioners Street Montreal, May 25th, 1865.

Montreal, May 25th, 1865.

Having removed to the more commodious premises (486 & 488 St. Paul street, and 427 Commissioners street), we again, with increased facilities for doing business, offer our services as Commission Merchants, for the sale of Flour, Pork, Butter, Eggs, Aslas, Leather, &c., &c. In doing so, we feel confident that we can offer inducements to consignors surpassed by no other House in the city; we have had many years' experience in the business, we pay strict and personal attention to all consignments, we have an intimate acqualintance with the principal buyers of this and other markets, our premises are admirably located and arranged for Froduce trade, while our financial position is such, that we are not obliged to force sales to meet advances, and; when sales are effected, we make remittances with the utmost promptitude.

We make liberal advances upon all descriptions of Froduce, and accept Drafts against Bills of Lading to the extent of two-thirds or three-fourths the value of consignments. Cash advances will also be made against consignments to our correspondents in Manchester and Liverpool, and consignors will have the option of having their goods sold here or in either of

the abovenamed markets. Our rates of commission will be as low as any House in the trade, and all other charges will be avoided as far as possible.

We have made special arrangements for doing a large Butter business, and, as this has become one of the staple articles of export, and one of the most valuable products of Canada, we beg to offer the following suggestions:—

Packing Buttern.—Use none but new packages, White Ash preferable; let them be well seasoned and thoroughly cleaned and soaked in brine; mark distinctly the correct dry fars on each package; use line sait only; pack the butter closely; let the various colors be cared, lly selected; fill the kegs as full as possible, place a clean linen cloth over the top; carefully tack it down; then put on a handful of fine sait and a little brine; head up immediately; mark nearly with your own initials and address in full to the Consignee. (A brass stencil-plate is best for marking; if you desire one, by applying to us, we will supply it free of charge.)

Packages—The tinnet holding from 60 to 60 ibs, is most suitable; at suits the retailer and is preferred by English buyers; they also arrive in better condition; they cannot be rolled like kegs, therefore they are generally much cleaner. Kegs with loose or slip covers are also much sought after, and are always taken in preference to the ordinary keg;—where large packages are used, we would in all cases recommend the slip covers. We would also advise that, as far as possible, packages should be given out to the farmer to be illied by one maker; where this cannot be done, and where packing in the store is unavoidable, the Butter should never be allowed to remain exposed to the damp atmosphere of a cellar, which, perchance, contains every description of Soap, Candles, Olls, Liquors, &c., but it shou't be packed the earliest opportunity, and, when packed, should be immediately headed up.

It is expected that the demand from England will be very large this season for pine qualities, for which comparatively higher p

Hoping to receive a share of consignments,

We are your obediently, THOS. HOBSON & CO.
