SANMETTO IN ENURESIS, CATARRHAL TROUBLE AND ATONIC  
CONDITIONS OF THE GENITO-URINARY ORGANS.

This is to certify that I have used Sanmetto for the past eight years, and I can truthfully say that it has come to my aid in my practice, in such cases that I deemed was necessary, such as enuresis, catarrhal trouble and atonic conditions of the genito-urinary organs. In every case where I have used it faithfully it has proved to be all claimed for it—a potential remedy. I have taken it myself. As I am over seventy years of age, it has come to my rescue, and the relief is phenomenal. I have practised medicine over thirty years in Cincinnati.

WESLEY H. WATSON, M.D.
