Silicate cotton as an inside fire-resisting lining for ceilings has recently been successfully tested by the British Fire Prevention Committee. The result, after subjecting a ceiling so lined to a fire of one hour's duration, gradually increasing to a temperature of 1,800 degrees Fahr., followed by the immediate application of water for two minutes, practically proved that such a ceiling would confine a fire to the floor on which it originated. The wood in the ceiling was entirely burned away in twenty-five minutes; but at the end of the test the flooring above was found to be uninjured, and at no time did the temperature of the top flooring exceed ninety degrees Fahr.

**Samson Brand**

**Magnet Brand**

MADE AT SHALLOW LAKE, ONTARIO

Our celebrated SAMSON BRAND has been before the public for many years, and has made hosts of friends among Contractors and Municipal Corporations until it has become one of the leading Cements on the market to-day, being excelled by none. This year we have decided to place the MAGNET on the market, and respectfully ask consumers to give it a trial. It will, we think, do its own advertising.
