

*Small craft harbours* — DFO also develops, maintains and administers harbours and marine facilities used by commercial and recreational fishermen at some 2 300 locations throughout Canada.

### **Fisheries research centres in Canada**

Major fisheries research establishments operated by Canada's Department of Fisheries and Oceans are:

**Pacific Biological Station**, Nanaimo, British Columbia, specializing in Pacific salmon and other west coast species

**Freshwater Institute**, Winnipeg, Manitoba, specializing in freshwater species

**Arctic Biological Station**, Ste. Anne de Bellevue, Quebec, specializing in marine mammal studies

**St. Andrews Biological Station** St. Andrews, New Brunswick, specializing in studies of lobster, Atlantic salmon, and other east coast species

**Northwest Atlantic Fisheries Centre**, St. John's, Newfoundland, a fisheries research centre for Atlantic species
