

The muscular impressions and hinge dentition of this shell being unknown, it is, of course, not quite certain whether it is an *Anomia* or not. Dr. C. A. White, who has seen the specimens, thinks it is a *Placun anomia*, of the subgenus *Monia*, Gray.

Bow River, mouth of East Arrow-wood Creek, G. M. Dawson, 1881: Upper Belly River, twenty-two and twenty-three miles above the mouth of the Waterton, R. G. McConnell, 1881; St. Mary River Series. High River five miles above the forks, R. G. McConnell, 1882: Forks of Devil's Pine and Three Hills Creeks, also Red Deer River, near 8th correction line, J. B. Tyrrell, 1884. Oyster Creek, N. W. branch of the north fork of the Old Man River, G. M. Dawson, 1884. This last locality is in a nearly isolated basin in the mountains, and the horizon is not certainly that of the St. Mary River Series.

Most of the specimens from these localities belong to the variety *Wyomingensis*.

A single valve of an oyster collected by Prof. Macoun from a layer of limestone in the Hand Hills, in Township 28, Range 17, west of the 4th Meridian, may also be referable to this variable species.
