MANY OBSTACLES BEFORE THE BILL

Democrat's Tariff Measure Has Determined Opposition to Face From Minority.

WASHINGTON, Aug. 8.—(Can. Press.)—All predictions of an early passage of the Democratic tariff bill by the senate are going glimmering. Majority leaders realize that notwithstanding the fact that they have set a new record in pushing consideration of this measure, only a beginning has been made and the earliest anyone now will promise completion of the task is Sept. 15.

The chemical, earthenware, metal and lumber schedules have been approved save for rates on certain articles in each which will be taken up when the bill goes to the senate proper from the committee. There remain to be considered ten schedules, among them the three upon which there will be the most vigorous attacks by the minority, namely, the wool, sugar and agricultural schedules. The minority is making a complete tariff record and shows no sign of letting up on amendments.

No Serious Injuries When Passenger Train Crashes Into Empty Cars

SPRINGFIELD, O., Aug. 8.—(Can. Press.)—Scores of passengers were badly shaken up but no one seriously injured here this afternoon when a Big Four passenger train on the Sandusky division crashed into a long string of empty passenger coaches just within the city limits. The engine crashed into the rear coach of the empty string, splitting it wide open. The empties then caught fire and the city fire department was called to extinguish the blaze. The engineer and fireman jumped and escaped serious injury.

MINISTER OF LABOR ASKED TO INTERFERE

KINGSTON, Aug. 8.—(Special.)—At a meeting of the Trades and Labor Council, it was decided to ask the minister of labor to send a representative to this city to adjust a dispute concerning the hours of labor on the new causeway.

W. F. Nickel, M.P., was asked to take up the matter with the minister of labor.

HOW TO POP CORN

It is done in different ways, but the most approved method is to pop your corns with Putnam's Corn Extractor—corns pop out for fair and stay out, too, when removed by "Putnam's." Try this painless remedy yourself. 25c, at all dealers.

THE WEATHER

JUNIOR MATRICULATION RESULTS

The following lists contain the names of Toronto and York County candidates who were successful in whole or in part on the pass junior matriculation examination. Normal entrance candidates, who were also candidates for matriculation, have been considered in the results.

In Group I. are given the names of all candidates who have obtained complete matriculation by passing on the 12 required examination papers, which are as follows: English literature, English composition, British and Canadian history, ancient history, algebra, geometry, Latin authors, Latin composition, together with the four papers in any two of the following subjects: Experimental science (physics and chemistry), French (authors and composition), German (authors and composition), Greek (authors and composition).

Partial Matriculants.

In Group II. are given the names of those who have passed on at least nine of the papers required for complete matriculation and have obtained the minimum required on the whole examination. They have, therefore, failed in not more than three papers. This fact will be shown on their certificates. In order to complete their matriculation they must pass in all the remaining papers at one examination, the standard for the pass being 40 per cent. of the marks assigned to each paper.

In Group III. are given the names of all those candidates who have failed to obtain the minimum required on the whole examination, but who have obtained 40 per cent. on each of at least eight papers with an average of 60 per cent. on the same. Such candidates have been awarded partial matriculation and in order to complete their matriculation must obtain at one examination 40 per cent. on each of the remaining papers, with an average of 60 per cent. on the same. Candidates for matriculation into the faculty of applied science who have obtained 40 per cent. on each of at least eight of their pass papers and an average of 60 per cent. on the same are reported in this list. The honor standing of such candidates in mathematics will be found in the honor matriculation results.

The results of the examination in the cases of candidates writing on fewer than eight papers are not reported in the lists below. This statement includes those candidates who have written only on the papers required for matriculation into the College of Pharmacy. All such candidates must wait for the receipt of their certificates in order to ascertain the result of their examination.

AN ENGLISHMAN RILED

At the Way the British M. P.'s Said They Were Touched with Canada's Loyalty.

An English-Canadian, well known in Toronto, said yesterday: What is it that makes my countrymen when they come to Canada on visits, during which they are treated with high consideration, address their brethren in the empire in ways that they would never dream—I had almost written dare—of adopting in their own country? The fact that they do this sort of thing, when they are obviously trying not to give offence, only throws into stronger relief the persistence of the old idea that there is something inferior about a "colony" and about "colonials."

Lord Emmott is under-secretary for the colonies, who, in an unofficial capacity, has crossed Canada with other members of the islands' parliament. Leaving Victoria, he issued a statement on their behalf which contains a most delightfully unconscious piece of impertinence towards the King, which Lord Beauchamp, who addressed the Australian people, as "my people," could not excel. Lord Emmott has sent us this proclamation: "Last, but by no means least, we were touched by evidence on every hand . . . of loyalty to the throne."

Who has commissioned a body of parliamentarians to speak in this way? What is the function of this band of peripatetics towards the crown that they use the exact language of majesty? There is, I believe, an old statute under which any subject who presumes to speak for the King without the express command of His Majesty, is guilty of high treason, and may be hanged, drawn and quartered. When did the King commission the under secretary to go thru the empire, saying he was touched by the loyalty to the throne of his equals before the throne?

Lord Emmott was unconscious, of course, of the subtle arrogance displayed towards his fellow-citizens. Suppose that on a pilgrimage to Land's End, he had held a few meetings as he passed thru Devonshire and on crossing the Cornish border, had issued a statement to the press to the effect that he had been much touched by the evidence he had seen of the Devonians' loyalty to the throne—why, if he ever did so absurd a thing he would be ridiculed in every paper in the country, and would not long remain an under-secretary.

Many years ago I heard a libel case tried in an English court and the judge made it clear that to publish a statement to the effect that a certain lady was faithful to her husband was libellous because it contained the subtle insinuation that she might be something else. What is it, I wonder again, that makes Englishmen talk in this way in this part of the empire, when they would not dare, either in their relation to the King or in their relation to their fellow-subjects to assume such airs in an English county?

In this case the conditions are particularly amusing because there are a couple of Canadian-born M. P.'s in the Emmott party. Is it not too funny for words that native Canadians should receive a solemn assurance that Hamar Greenwood, who led a revolt at Toronto University, and Donald MacMaster, who flitted around the corridors at Ottawa, are "touched" by the evidence they see in Canada of loyalty to the throne, as well as of attachment to the mother country?

The episode suggests the desirability of forming a Sense of Humor Club for the benefit of old country visitors, who come to inspect the Dominion, and are in danger of forgetting that a British subject in Canada is really a British subject.

Congestion at the Toronto Union Station.

Referring to reports regarding congestion at the Toronto Union Station on Saturday, Aug. 2, the Canadian Northern Railway advises that its trains were not delayed by lack of equipment, the only delay being caused by heavy traffic.

The Canadian Northern Railway has ample equipment, and the aim of the company is to provide every passenger with a comfortable seat.

Particular attention is invited to the service on the east line of the Canadian Northern Ontario to Trenton, Picton, Napanee and all intermediate points.

CORNWALL MAN WAS VICTIM OF ACCIDENT

CORNWALL, Aug. 8.—(Special.)—Friends in Cornwall were advised yesterday of the death at Valleyfield, Que., of Edward Walker, a young man about twenty-five years of age, as the result of an accident which occurred on one of Mr. Cohan's dredges engaged there. The remains were brought to Cornwall and the funeral took place this afternoon at Woodland cemetery.
