from the Vancouver Council, asking the national to petition the Dominion Government to introduce legislation so be given for industrial and technica that the juvenile court might have training for boys and girls alike. that the juvenile court might have jurisdiction over backward or undeveloped persons to the age of 21 years.
The resolution was moved by Mrs.
Scott, and seconded by Miss Strong.
But Dr. Ritchie, England, pointed out most emphatically that such a request would undo much of the work already would undo much of the work already done in the matter of petitioning for protection and training thru homes and classes for mentally defectives. She also pointed out that no limit could be placed to the age of these defectives, and in these points the resolution was not desirable. The council had already asked for a royal commission to look into the whole commission to look into the whole matter, and the resolution from Vancouver was finally referred back to wait the results of the observations of

The budget as reported on by Mrs.

Watt, the national treasurer, showed that total receipts for the year were \$15,035; disbursements, \$24,620, with a deficit of \$900. Ways and means to cover the indebtedness were suggest-ed, and an average of \$40 from each of the 23 councils which make up the of the 23 councils which make up the national was laid down as the basis of payment, this amount to be made up thru annual patrons, increasing the circulation of the organ of the council or other means. Final details will be reported on later by the finance committee.

Thru enquiry into reasons for an unpaid fee, it became known that the women's institutes of the Dominion are not a nationally organized body. Ontario has the honor of forming the first women's institutes and their success in this province caused their formation in other parts of the Dominion. Tributes to the work of the women of this organization were paid by Mrs. Norman, their representative, and Mrs. L. A. Hamilton, and the latand Mrs. L. A. Hamilton, and the latter suggested that the superintendents of the different provinces confer with a view to national representation. This was afterwards framed into a number of fashion's latest dictates. The skirt is smooth-fitting over the hips, flaring perceptibly at the knees.

On Moral Standard. The report of the committee of equal moral standard was read by Dr. Margaret Patterson. From this it was learned that Montreal has now a police-woman, that an industrial farm for women has been established in one district, that the council had been in-strumental in bringing about improv-ed conditions in jails, and that films position. and ventilation in moving picture theatres had been improved. Also that the Big Sister movement in one centre reported 105 girls under its

The unsanitary conditions of many apartments in rooming houses in Canadian cities were discussed, the matter being brought forward thru the Vancouver council, asking the various local councils to take active various local councils to take active interest in the subject, and especially to try to rouse public sentiment. The resolution, which was moved by Mrs. Scott, and seconded by Miss Strong, found general support Mrs. Laing pointed out that this was a good year to commence activities, as there is no immigration, and houses more plentiful. In Toronto, she said, there are dozens of houses where there is no water, the inmates having to go a no water, the inmates having to go a hundred yards or so to get it. How, then, she asked, could one ask such people to keep either themselves or their children clean. Mrs. Gurnett told that in a survey of housing conditions some time ago, a house had been discovered in Toronto that had not even a window

Back to the Land.

In this connection, Mrs. Hamilton stated that she had come in contact with men in Toronto trying to get to the land. If the government would give the land and these men go in parties, the community thus formed could be responsible for the amount which it would also be necessary to advance t would also be necessary to advance it would also be necessary to advance them for transportation, equipment and living during the first year. Calculation had shown that this would be between \$800 and \$900. The pulpwood from the lands in Northern Ontario would keep settlers during the first year, until the land was cleared. An objection to this plan, raised by a delegate, was lack of transportation facilities.

### BANKRUPTCY COURT PRESSURE UPON GREECE BY BULGARS AND TURKS

Knotty Problems Spring From Allies' Operations in Neutral Area.

PARIS, Oct. 27.—The Hestia of Athens, as quoted by the Havas Agency, says that steps are being taken by the Bulgarian and Turkish ministers to Greece with the intention of establishing the right of their governments' troops to pursue the Serbians and their allies into Greek territory, should the occasion arise.

These ministers, The Hestia says, have complained to Premier Zaimis of Greece that the presence of foreign troops in Greek Macedonia is contrary to a spirit of neutrality, and places the Bulgarian forces operating in Serbian Macedonia in a difficult situation. M. Zaimis recalled the fact that Greece had protested to the allies at the time of the first landing of troops.

Since making its reply to Turkey and Bulgaria, the question has not been discussed, but it is expected further representations will be made The Bulgarian newspapers are conducting a campaign against the presence of allied troops at Saloniki.
