PULP NOTES.

The E. B. Eddy Company, of Hull, Que., recently installed two new grinders in No. 2 mill to increase the output of ground wood pulp to keep pace with the manufacture of paper.

The Spanish River Pulp & Paper Company have their mills at Webbwood, Ont., nearly completed they will take out a large quantity of pulp wood this winter, and will likely commence to manufacture pulp early in the spring.

An official of the Timber Estates Company announced when in Montreal recently that arrangements had been completed for the sale of extensive timber limits

and nulls in Newfoundland to Harmsworth Bros., of the London Daily Mail.

The pulp wood for the Trader's Paper Mill at Lockport, N. Y., has been obtained mostly by rail from Canada. It is now proposed to discard the rail service and have the wood shipped by boat across Lake Ontario to Alcott Harbor, and thence by trolley to the mills at Lockport.

The Price-Porritt Pulp & Paper Company have their new pulp mill at Rimouski, Que., in operation, turning out 30 tons of dry pulp per day. The mill is located on the Gulf of St. Lawrence. The pulp manufactured is carefully screened and is pressed with hydraulic presses, giving a uniform percentinge of 50 per cent.

Charles H. Vogel, of Ottawa, is engaged on preliminary plans for the improvement of a water power in the Lake of the Woods district, estimated at 11,000 horse power and said to be one of the best in 11,000 horse power and said to be one of the best in 11,000 horse power and said to be one of the best in 12,000 horse power and said to be one of the best in 13,000 horse power and said to be one of the best in 14,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power and said to be one of the best in 15,000 horse power for the operation of pulp and paper mills to be built there.

The Canada Paper Company, of Windsor Mills, Que., have adopted a novel scheme to increase the interest of the employees in the business of paper

manufacturing. They offer prizes for the most valuable suggestions touching the operations of the plant, such as suggestions for improving the bleaching and sizing, for improving the steam plant, and for papermaking methods generally.

The Year Book of Canada for 1902 shows that the wood pulp industry for the calendar year mentioned was carried on by thirty-five mills, which had an output of 240,089 tons of wood pulp. Of this quantity 155,210 tons were mechanical pulp, 76,735 sulphite, and 9,044 soda. The corresponding quantities for 1901 were: Mechanical, 169,360 tons; sulphite, 84,500 tons; and soda, 10,740 tons. This shows a decrease of 23.611 tons in 1002. The decrease is distributed: Sulphite, 7,765; soda, 1,696; mechanical, 14,150 tons. The total value of the output of 1902 was \$1,383,182. Nine of the thirty-five mills manufacture, subplace pulp and four soda palp. Twenty-five mills manufacture mechanical pulp and four make both chemical and mechanical. Taking the returns of thirty-two mils, the average time the mills ran during the year was ten months. The value of the exports of pulp in 1902 was \$1,511,664, while the consumption in the domestic market was valued at \$1,871,518. Canada exported about 57 per cent. of her production, Great Britain taking \$976,192 worth, and the United States \$1,518,139. ten months. The value of the exports of pulp in 1902
