GOOD HEALTH is as necessary to the winning of the war as good guns, good shells and good airplanes.

And it is not alone the health of the soldier that is important, for this is watched and guarded as never before. But there is the health of the people at home, who are manufacturing and sending forward the supplies which make it possible to continue the fight.

Men and women have never in the world's history carried such mental and physical burdens as they do to-day.

From Ministers of State, Commissioners, Manufacturers, all the way through the enormous staffs of men and women workers, there are problems to be solved and schedules to be lived up to that mean enormous anxiety and strain on the nervous system.

It is under these conditions that many resort to the use of narcotics to produce sleep or stimulants to whip up the tired nerves. In either case the temporary help obtained at an enormous expense to the nervous system.

The only rational treatment is that which goes to build up new nerve cells and new nerve force, and supreme in this class is Dr. Chase's Nerve Food.

Most people know about this food cure, but all do not realize that it has revolutionized the treatment of diseases of the nerves by the new idea of supplying to the blood the elements which go to the creation of nervous energy and vigor.

The most common indications of nervous exhaustion are inability to sleep and rest, failure of digestion and loss of appetite, nervousness and irritability. You arise tired in the mornings, and are easily annoyed over little things. You put off the duties of the day because you lack the energy to take hold and clean them up.
