## THE MUNICIPAL CAMPAIGN.

There is not a great deal of talk over the elections. The opinion of men who speak for the business community is on the side of Lamb for Mayor. J. J. Cassidey, the experienced head of The Canadian Manufacturer, said yesterday, "It will be Lamb." That is the prevailing view in the Centre, where Lamb will poll a big vote.

The old, veteran students of municipal government, whose pride it is to see Toronto take the leading place on He Was in the Act of Uncoupling this continent for sound civic administration are also decidedly with Lamb. as the man who knows the require ments of the Mayoralty position. Prof.

of The Hague Tribunal the Venezueian difficulties, has reached Washington thru Minister Bowen. It amounts to a general acceptance of the principles of the proposition, President Castro being willing to submit his case to the arbitration of fair and impartial authorities. The details of the answer will not be published in advance of its reception by the European allied powers. In fact, it may be withheld entirely from publication, on the ground that it really belongs to those powers.

To-day the answer is being prepared at the State Department for transmission of Europe. As it is quite long, and undoubtedly will require careful consideration by the Foreign Offices at London, Berlin and Rome, it is not expected any further steps toward a final settlement can be taken for a day or two. However, the feeling here is that Castro's answer practically clears the way for the submission of the case to a general acceptance of the principles of the Protein Offices at London, Berlin and Rome, it is not expected any further staffen. The wreck at once caught fire and blazed fiercely above the St. Lawrence. The ac

tors gave Mr. Urquhart a strong hint about the Mayoralty and aldermanic votes being entirely different propositions. It is a church and temperance vote in Ward 4 that gives Ald. Urquhart his pre-eminence.

Mr. John Tytler, a representative the best Conservative opinion in To-ronto, thinks it will be Daniel Lamb's election. Conservatives who know the Centre well all wish it this way. They look upon the political situation as The World described it yesterday. The East will be very strong for Lamb. They also see in the events of the past two days a menace to Howland's hopes in the West. Some of the factory complexes, who are not over solling.

Carson's Popularity.

Carson's Popularity.

The personal popularity of Andy Carson, the Watford operator, who was the last man to give an order to the flyer is another factor which has fostered resentment against the company, because the officials generally declared his error the direct cause of the collision. Carson is a great big homestappearing chap, whose face bears every mark of candor. He was born and raised around Watford, and has worked at various stations of the Sarnia Branch, and knows everybody in this end of Ontario. For a quarter of a century, Carson has mixed with the people along this part of the Grand Trunk. They refer to him, lovingly, as "Andy," and they are his friends to a main. They were loud in their denunciation of the company officials, when they learned Carson was held responsible for the wrong order, by which No. 5 went to her destruction. When he denied the charge, they accepted his statement implicitly. During the inquest Carson was around the half most of the time with swellen eyes and a sad face, indicative of the keen anguish he expertenced over the charge. It was a foregone conclusion that the jury would never consent to a verdict that would place the blame on Andy Carson. Then the citizens of Watford, at least a good many of them, got to gether Monday night, even while the fury was yet investigating the affair, and adopted resolutions, denouncing the effort being made to place "upon the shoulders of Andy Carson the blame for an accident which is the natural result of a system where men are underpaid and everworked." as it was Men Like Blake Can Assuredly Succeed in Exercising Demon From
