Unless Rain Prevents, Today's Attendance Is Expected To Be Record-Breaker.

WET WEATHER PROMISED. Chicago, Oct. 4.—There were patches of dark shifting clouds in the sky this morning, but no Indication of immediate rain. The weather was several degrees cooler than yesterday, but still comfortable. The forecast was "Showers and Cooler," indicating that the fourth game of the world's series may encounter wet weather.

The Reds, stung by the first shutout of the series, after two wins on their home field, did not believe they again would encouter such marvelous pitching as shown by Kerr, midget hurler of the White Sox, and asserted their expectations of having no hard time with the "shine" and "knuckle" ball Cicotte would curve up, if he should be Manager Gleasno's selection or any of the ger Gleasno's selection, or any of the her Sox twirlers Sox players yesterday, in addition to bona fide world's series pitching by the diminutive Kerr, got the "breaks of the game," and brought the series to 2 to 1. Reds Are Confident.

Having familiarized themselves with the breezes, shadows and sun spots of Comiskey Park, Manager Moran's winners of the National League race were confident of a better showing today. No announcement from either manager was forthcoming early today as to his pitching selection for today's game, but it generally was believed that Cicotte would be sent back to face the Reds' bats that drove him from the box in the first game at Cincinnati, and either Ruether or "Hod" Eller would be the Reds' moundemen. With Care either Ruether or "Hod" Eller would be the Reds' moundsman. White Sox supporters figured on seeing Ruether putting over his left hand slants in view of the two Red southpaw victories and the defeat of a right-hander yesterday. Cicotte, who said he was unnerved by hitting a batsman in Cincinnati, told. Manager Gleason he was again ready to start against the National League champions. Gleason, as usual, seemed willing to trust Cicotte's word that he was "ready."

As they would alternate, they would be on duty only once in evry five or six weeks, according to the number of employees in the department. These employees will not get a half-holiday, unless by bylaw is passed closing the office at one o'clock.

A peculiar phase of the situation is this. The present season of the year is a slack time for both the assessment department and the city engineer's department, so far as the citizens calling at the offices is concerned. Yet the employees are required to remain until three o'clock. In the spring and summer when quite a unmber of people do call at these departments, Saturday afternoon the offices are at one o'clock.
