LARSEN'S RADIO LINK WITH WORLD

Powerful Wireless Will Keep Him in Touch on Five-year Drift Through Polar Basin—Exploration by Airplane.

(New York Times)

From the depths of the silent Arctic, Roald Amundsen will keep in daily touch with civilization by the wireless telephone as he progresses in his five-year drifting voyage over the roof of the world among the unexplored mysteries of the north polar seas.

Amundsen cannot ignore the possible benefit of the wireless telephone on this said Captain Amundsen, discoverer of the South Pole and explorer of north polar regions, after his arrival from Norway to start final preparations for his north polar trip. "As the radio has been so great in the last few years, and particularly in the field of wireless telephony, that it is probable that a voice from the silent North may call out each day to tell the world what lies locked within the ice of the polar seas."

One of the most powerful wireless sets has been brought from the Marconi Company in London by Captain Amundsen, who says that his ice-bucking polar cruiser, the Maud, will be able to send wireless messages in international code at a distance of about 2,000 miles. This means that he will be in touch with wireless stations in Alaska, the Behring Sea and Norway. Linked up with this powerful radio equipment will be one of the best wireless telephone sets Captain Amundsen can find in this country, and he will start out today on a search for this apparatus.

"The greatest advances in wireless telephony have been made in this country," said Captain Amundsen, "and I expect to be able to find apparatus here for the needs of this modern expedition."

Record-Holding Monoplane.

The first Arctic explorer to use the plane for soaring over the unexplored regions, Captain Amundsen has accepted the gift of an all-metal monoplane from J. L. Larsen, president of the J. L. Aircraft Corporation, and on Thursday will start his flight with the machine at the field at Central Park, N. Y. It has been decided that the second plane to be taken on this expedition will be an Arvo airplane of British make.

The Larsen Company offered him the L. all-metal plane, which established a record for endurance flight at Mineola, N. Y., on Dec. 29 last by remaining in the air for 26 hours 19 minutes and 38 seconds, and which was flown about 6,000 miles from Mineola to Fort Norman in the Arctic circle. On its long hop to the frozen north the machine functioned perfectly at temperatures as low as 45 degrees below zero, and it is believed that the plane will be of ideal type for the uses of the explorers. The plane cost about \$40,000. The Arvo was selected because of its dependability. It was used as an instruction machine during the war and is an exceptionally stable airplane in the air. Aviators say that it is of the easiest landing machines made and useful for all kinds of aerial reconnaissance.

Mr. Larsen said that he would equip the monoplane with skids, pontoons and wheels so that it would be capable of landing and taking off on snow, water or land. The machine itself weighs about 2,400 pounds, with a thirty-foot wing spread, and is capable of carrying 3,000 pounds, or one and a quarter times its own weight.

Arvo Will Pick Out Course.

"Due to Mr. Larsen's fine co-operation," said Captain Amundsen, "I feel that this is going to be the crowning achievement of my life. The north polar basin is included in some millions of square miles of territory which has never been visited by scientists. There

W. H. HAYWARD CO., Limited
85-93 Princess Street

There is no way to penetrate that region by vessel because of the drifting ice. We will take the Larsen plane hundreds of miles away from the mother ship and operate independently. We will also have an Arvo for scout purposes and to show us the best course over the ice."

Captain Amundsen, who arrived yesterday from Norway on the liner Stavangerfjord, brought with him one of the two airplanes which will accompany him on the expedition trip, and in the afternoon they visited the offices of the Larsen Company at 347 Madison avenue for a two-hour conference. Both were enthusiastic over the prospect of aerial exploration of the north polar regions, and predicted that hundreds of thousands of square miles of territory may be explored at a saving of a cost of millions of dollars and years of time over the ship and dog-and-sledge exploration of the past.

The aviator who arrived yesterday with Captain Amundsen was Lieutenant Oskar Amundsen of the Norwegian Navy, who has been in the air for 400 hours and during the last winter made a special study of flying under polar conditions. They will be joined at Seattle by Lieutenant Udo Dahl, also of the Norwegian Navy. Lieutenant Amundsen will spend three weeks at Central Park, N. Y., tuning up the planes, and may fly one of them across the continent to Seattle.

Expedition to Start About June 1.

Captain Amundsen will visit Washington this week to confer with H. U. Sverdrup, who is to be chief of scientific research work on the expedition, who has been preparing meteorological maps for several months and conferring with officials of the Carnegie Institute there. All maps and plans for the scientific studies are now complete, and Captain Amundsen and Dr. Sverdrup will proceed along the original outline prepared by them several months ago. These include study of the meteorological conditions, study of the ocean currents and search for traces of oil, minerals and other natural resources. New regions will be mapped.

In a few days the Maud will go into dry dock in Seattle in preparation for the start of her north polar trip on June 1. About ten days later the expedition will put up at Nome to take on dogs for the exploration, and then start its log drift through the northern seas, which, with the help of the explorer, will carry the pole to his home in Norway in from three to five years. A seven-year food supply of canned meats from Norway and fruit from California will be packed into the hold of the ship and about fifteen Norwegian rifles of 6 and 8 millimeters in calibre will be taken along to provide fresh bear and walrus meat for the expedition.

One of Captain Amundsen's regrets on the start of his expedition is that he will be so long away from Cokonta and Carmila, the two native children which he rescued from starvation in the arctic and took to Norway recently for a modern education. "Cokonta is 7 and Carmila is 13," he said pensively, "and both will be young ladies when I return."

RECENT WEDDINGS

Ellingwood-Giffan.

Rev. C. R. Freeman, pastor of Charlotte street, west end, Baptist church, yesterday solemnized the marriage of Miss Agnes May Giffan, of Bouris (P. E. I.) to Joseph Albert Ellingwood, of this city.

RECENT DEATHS

Miss Lillian Manchester.

Word was received yesterday of the death of Miss Lillian Manchester, who died away on Thursday at Winnipeg. Miss Manchester was the daughter of the late Mr. and Mrs. John Manchester of Apohaqui, but had resided in Winnipeg for many years. She is survived by four sisters, Mrs. W. J. Mills, Sussex; Miss Katherine Manchester, Apohaqui; Miss Sarah Manchester and Mrs. Percy Manchester of this city; James Manchester, St. John is an uncle, and Mrs. John Tillotson, also of this city, is a cousin. Accompanied by Miss Sarah Manchester, the body will arrive at Apohaqui on Tuesday afternoon, where service will be held at the Church of the Assumption by Rev. Canon Sheehan.

EVENING SCHOOL DANCING.

London County Council on the Look-out for Instructors.

"I notice with amazement," a ratepayer writes to The Daily Mail, "that the London County Council is advertising, in hard times like these, for instructors, at 10s. a lesson, who will teach folk songs and country dancing to students at evening institutions. Is it fair that our money should be wasted like this?"

"Youths and girls who come to take technical instruction at the evening courses," explained an official in the Education Department of the Council, "have been working all day, and they really need a little exercise and diversion now and then. Folk dancing freshens them up physically and mentally and enables them to get all the best out of their evening work."

"It might be urged, of course, that now and then an evening or a part of an evening might be devoted to fox-trotting, thus obviating the slight expense of an instructor, but then we should have people down on us for encouraging frivolity. There are very few of these folk-dancing classes, and we consider that they are fully justified."

BOY IN AFRICAN JUNGLE.

Is Collecting Specimens for British Museum.

London, April 1.—Guy Wornham, a 16-year-old London boy, accompanied only by three native carriers, is now in the

DYE SKIRT, COAT DRAPERIES WITH "DIAMOND DYES"

Each package of "Diamond Dyes" contains directions so simple that any woman can dye or tint faded, shabby skirts, dresses, waists, coats, sweaters, stockings, hangings, draperies, everything like new. Buy "Diamond Dyes"—no other kind, then perfect home dyeing is guaranteed, even if you have never dyed before. Tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

West African jungle collecting natural history specimens for the natural history department of the British Museum. His father had meant to make the journey but the boy went in his stead.

Young Wornham has already traveled 8,000 miles and has reached Bikuha in the Cameroons. In a letter home relating some of his experiences on the trek to Bikuha he writes:

"Hearing a strange sound from behind I turned and beheld no less than a man on a motor bike. He dismounted and remarked that he was Dr. Webster, of the American Mission, and that he guessed I was Mr. Wornham, and I had better jump on the back. I did, we had a bumpy but very enjoyable ride, and I thus saved 50 miles of walking and two days in reaching 'Elat,' which is the largest station on the American Mission."

For Spanish Influenza

The Liniment That Relieves All Ailments.

THEY WON'T GROW HAIR.

Peanuts, However, Have Many Useful Attributes, U. S. Experts Find.

Although the nutritive value of peanuts ranks high, there is no foundation to the recently circulated report that peanuts will promote the growth of hair. From experiments conducted by the Bureau of Chemistry of the United States Department of Agriculture with regard to the chemical and nutritive properties of the peanut, it has been found that the shells, peanut oil, and the kernels themselves, each one of which is a different food, contain about 20 per cent. protein of a high nutritive quality. The oil, whether product obtained from the peanut, is easily digested and also furnishes a large amount of fuel and energy.

When we eat protein we consume in reality eighteen or twenty substances, known as amino acids, each one of which may have quite special functions in nutrition. Some proteins are deficient in certain of these acids and will not promote growth.

Peanut protein, however, is rich in the amino acids which are lacking in the proteins of corn and grain, and for that reason peanuts are an excellent supplement to a cereal diet, whether in the form of a meal or press cake fed with corn and cereal feeds to animals or as a supplement to wheat protein when used with wheat flour in bread making.

The erroneous idea that eating peanuts will affect the growth of hair may have arisen from the fact that hair, wool, feathers, and similar animal tissues, when analyzed, show a relatively large amount of cystine, which is one of the amino acids present in protein.

Even were the assumption true that by eating foods containing cystine the growth of hair could be stimulated, it would not apply in the case of peanuts, which do not contain as high a percentage of cystine as many other common foods.

TUBERCULOSIS IS WORSE THAN WAR

Costs United States 500,000 Lives per Year—Remedy for Snoring.

(Montreal Gazette.)

"Does your husband sleep out loud? Because, if he does, papa will have to be 'muzzled,'" said Dr. J. C. Elliott, in his Health Lecture, last night, when he spoke on Scientific Breathing for Health and Lung Development.

"I got six boxes of Dodd's Kidney Pills and took them. They did me so much good and I can do so much work I can't realize I was eighty my last birthday."

The kidneys are the first to show the strain of advanced years. Ask your neighbors if Dodd's Kidney Pills do not make strong healthy kidneys.

FIND MISSING RADIUM AFTER LONG SEARCH

Hamilton's \$20,000 Supply Reported Found in Syracuse.

Toronto, April 1.—It is said that \$20,000 worth of radium, which disappeared from Hamilton City Hospital several months ago, has been located in Syracuse, N. Y.

The radium had been inserted in the side of a cancer patient, and was said to have been stolen from there while the man was in a comatose condition due to the effects of the treatment.

An expert was brought to Hamilton from Pittsburgh and made a vain search of the city's sewers for the precious mineral when it disappeared.
