Issued by the Canada Food Board in Collaboration With Experts on the Staff of the Dominion Experimental Farm

PLANT LICE.

Plant lice are the enemies of almost all kinds of plants. They are known as "Aphids" and "Green Flies." They attack and destroy vegetables at an appalling rate, living solely on the juice which they suck from the plants. They multiply rapidly and should be controlled before they cause the leaves to curl or the stems to wither.

Vegetable plants cannot produce crops of value if they are allowed to become weakened as a result of the attack of plant lice. They make their appearance early in the season and as soon as they are noticed the plants should be sprayed either with white-oil soap (one pound dissolved in six gallons of warm water) or commercial nicotine sulphate (40 per cent.) as sold by seedmen and as recommended on the cans. Half a pound of Laundry soap should be dissolved in every ten gallons of water.

ROOT MAGGOT.

If you are planting out cabbage and cauliflowers this week they should be protected from root maggot attack by placing around the stems a disc made of one-ply tinned felt paper. For small gardens, square discs may be cut with a sharp knife. These should be 2 1/2 inches by 2 1/2 inches, with a slit running from one side to about a quarter of an inch beyond the centre of a cross cut made at the centre extending one-quarter of an inch in either side. The discs should be placed around the stems immediately the plants are set out. In placing the disc one side is raised sufficiently to allow the parts of the stem at the end of the slit to point upwards, and thus fit close to the stem.

The whole disc is then pressed down firmly so that it will rest evenly on the ground and prevent the adult flies reaching the stem near the earth to lay their eggs from which the maggots develop.

SPEAKS ON AEROPLANES.

Lieutenant Stephen Dawson gave a highly interesting and instructive talk to the boys of the C. S. E. T. class of Barnouth street church in the Glad Tidings Hall last evening. Lieutenant Dawson illustrated a camel aeroplane and explained the different stunts that are performed with it. He also outlined the

The Waltham Watch

BUSINESS runs on Waltham Time—a great many business and professional men preferring the Waltham "Riverside" movement, 19 jewel grade. This movement is made in several different sizes for men, including the "Colonial A" thin model—thin at no sacrifice of accuracy. Many of the inventions and improvements in watch construction that have won for Waltham every gold medal awarded for watch merit during the past 60 years were originated for our "Riverside" family.

Carry a Waltham "Riverside." It gives you time accuracy and a watch of real distinction.

Rewiring Plans Are Postponed

New Inspector Will Pass On
Hospital Plans

The Municipal Council

Quarterly Session Hears Reports
of Finance Committee on Municipal Home Inquiry—Smallpox Precautions

The proposal to rewire the General Public Hospital at a cost of \$5,500, was laid before the quarterly meeting of the Council yesterday, but was laid over until the next meeting in order that the recently appointed electrical inspector might pass on the plans.

After the reading of the minutes the council went into committee to hear the commissioners of the General Public Hospital who were present. Dr. Thomas Walker, the spokesman of the party, stated that the board of commissioners had passed a resolution recently that in view of the fact that the electric lighting system of the General Public Hospital being obsolete, that the municipal council be requested to go over the installation and effect the necessary repairs. The commissioners believed that the work would cost in the vicinity of \$5,500.

Councillor Hilyard said that in view of the fact that there was not before the council a report by Electric Inspector

Wilson, he felt that the matter should be carried over until the next meeting, to receive such a report and then it would be given over to the finance committee to handle.

Councillor Carson seconded the motion but before it was put Councillor Fisher said that he felt that this was work that should be attended to at once and if held over it would mean a two months' delay at least. Commissioner Bullock made an urgent appeal but that in view of the circumstances surrounding the case he expected to spend Sunday. He will be expected to spend Sunday. He will be expected to spend Sunday.

The report of the finance committee was adopted. It recommended the provision of \$15,878 to meet smallpox expenses, not more than \$800 to be phase an automobile for the medical health officer; the employment of a second policeman in Lancashire; increase in wages to \$2.75 per day for Constable J. H. Saunders. The committee also reported on the municipal home inquiry.

Councillor O'Brien felt that the taxes could be collected without the advertisement. Bullock pointed out that the municipality now had an over-draft of more than \$55,000 and he felt that some effort should be made to get in all the taxes possible.

The two members requested by the finance committee to be appointed to meet with the board of health while smallpox was prevalent in the city, were appointed by the warden, who called upon Commissioners Bullock and Hilyard to attend to this work.

The superintendent of the Boys' Industrial home addressed a letter to the council stating that the water supply of the home came from an open pond, and he had investigated the condition and environment of this supply and found that ducks came there to swim in it. Manure dumps and barnyards were in close proximity to the pond, and he felt that the water supply was in great danger of serious pollution. He asked that an investigation be made of this water supply. The letter was turned over to Dr. G. G. Melvin for action.

Councillor O'Brien moved that the turnkeys in the county jails be paid fortnightly instead of monthly. This motion was adopted. On motion of Councillor O'Brien, William Quilty was appointed policeman for the Bay Shore at a salary of \$2.50 per day, and would enter upon his duties on May 24.

Present at yesterday's session were: Warden Golding, Commissioners Fisher, Bullock and Hilyard, and Councillors Howard, Bowland, Bentley, Carson, Shillington, Stephenson, Thompson, O'Donnell and O'Brien.

NEWS NOTES ABOUT PROMINENT BAPTISTS

(Maritime Baptist)

Rev. N. A. MacNeill has entered upon his fifth year of service at Salisbury, N. B. His pulpit ability is appreciated by all the congregations in the field and is recognized far beyond the limits of his pastorate. Two of his sons are in France, in consultant service. Much sympathy will be extended to the veteran pastor of the Hopedon-Richmond church. It is fitting that Mrs. Currie should end her life where so

much of her service as a pastor's wife had been rendered.

Professor Aaron Perry of the University of Manitoba, accompanied by his wife, has come east for the vacation period, and will enjoy a period of rest at the ancestral home on the Washademoak. He is a graduate of Acadia, of the class of '01, and a cousin of Prof. H. G. Perry, professor of biology at Wolfville.

Rev. H. Carter, who for many months has been held fast as a prisoner in the personage at Percival by sickness, has now, on the advice of his physician, entered the hospital at Halifax.

Rev. John R. Egan of Moncton, N. Y., arrived last week in St. John, and plans to take up pastoral work here. He is a graduate of Rochester Theological Seminary, and during his student days was pastor of the Meigs street church of that city, now the South Avenue church. For the last few years he has been engaged in evangelistic work. He left St. John on Saturday for Deer Island, where he expected to spend Sunday. He will be a valuable addition to our pastoral force.

Rev. P. C. Reed, who for some months has been engaged in military Y. M. C. A. work, with headquarters at Halifax, has been appointed to transport service. He will accompany troops sailing to Europe and return with men invalided to Canada or returning on furlough. He expects to sail from Halifax soon.

Mrs. J. H. MacDonald has returned to St. John, after spending the winter with her sister in West Virginia. Her many friends are glad to greet her again, and to note the evidences of health and vitality. Evidently the southern climate has agreed with her. A brief visit at this office last week was appreciated.

She reports her husband, Major (Rev.) J. H. MacDonald, and her gallant son, Major Eric MacDonald, as being in good health when last heard from.

Rev. J. S. McFadden of Andover is now at the home of his father-in-law, T. Whit Colpitts, Forest Glen. Although still weak, he has practically recovered from the fatigue of the journey from Andover, and hopes are entertained that he will continue to regain strength. He expects to enter the sanatorium at River Glade soon.

REPORT OF RIFLE IMPORTATION INTO U. S. FROM GERMANY.

New York, May 14.—Reports that thousands of rifles had been secretly imported from the Krupp works at Essen in order to "Germanize" the United States were related at an inquiry today conducted by Major-General Lewis into reports of hoarding of arms by Germans in the United States.

Edgar A. Holmes, of this city, a witness, credited the reports to a man named James K. Crossley. Holmes, a broker, tried to buy the rifles, but was unsuccessful, he said. During the negotiations Crossley told him that some 1,000,000 rifles had been imported from Essen via the Hoboken docks of two German steamship companies and were to be used in the United States, if the Germans were successful in reaching the English Channel ports.

TRIAngle CLUB CLOSING.

The final meeting of the Triangle Club of the Fairview Baptist church was held last evening at the home of George Brown, president, at Lancaster Heights. A. M. McLeod, military secretary of the Y. M. C. A. was present, and a number of soldiers entertained with him. Selections were rendered by the Lancaster Ladies' Quartette, and there were other items on the programme which brought much applause. A letter was read from Rev. P. R. Hayward, a former pastor of the church, now in Y. M. C. A. work in Toronto, and this proved of

much interest. The Triangle Club had now completed its activities, and will not meet again until next fall. The house was beautifully decorated with bunting and the flags of the Allies. Refreshments were served at the close of the entertainment.

EVERY SOLDIER SENT IS FULLY EQUIPPED

Ordnance Department Says it is Meeting Every Demand Imposed by New Programme

Washington, May 14.—Although American troops were going overseas in large numbers, the Ordnance Department had been able to keep up with the new programme, and every soldier who boarded a transport was fully equipped with arms, ammunition, the Ordnance Bureau. Artillery and machine guns already were in France in sufficient quantities, it was said, to meet immediate demands. The statement said:

"The Army Ordnance Department has thus far met every demand imposed by the new programme for overseas shipment of American troops."

"Despite the great acceleration in the sending of American forces to France, no infantryman goes aboard ship without a United States model 1917 rifle, (modified Enfield), bayonet, belt, haversack, pack carriers, bandoliers, bayonet scabbard, and mess equipment."

"Tonnage is today a limiting factor in the shipment of ordnance material overseas, especially because of the present necessity of increasing the transport of infantry regiments."

"Sufficient supplies of artillery—French 75 millimeter and 155 millimeter and American heavy railway artillery—are already in France to meet the present demand. Sufficient machine guns are also immediately available for American forces in France."

"Sufficient supplies of artillery—French 75 millimeter and 155 millimeter and American heavy railway artillery—are already in France to meet the present demand. Sufficient machine guns are also immediately available for American forces in France."

Women! Here Is A Dandy Thing

Few drops stop corns hurting
then they lift right out
with fingers

Your high heels have put corns on your toes and calluses on the bottom of your feet, but why care now?

This tiny bottle holds an almost magic fluid. A genius in Cincinnati discovered this ether compound and named it freezone. Small bottles of freezone can be had at any drug store for a few cents.

Apply a few drops on your tender, aching corn or callus. Instantly the soreness disappears and shortly you will find the corn or callus so shriveled and loose that you can lift it off with the fingers.

Just think! You get rid of a hard corn, soft corn or a corn between the toes, as well as hardened calluses, without suffering one particle. Millions of women keep a tiny bottle on the dresser and never let corns ache twice.
