

ALBERT SCHOOL IS WELL EQUIPPED

Teachers Hope To Have Good Library—A Fine Auditorium.

The new Albert school, West St. John, has not yet been in use for an entire school year, but within the building there has developed a wonderful spirit of good comradeship and pupils and teachers alike have a very great pride in their new school. The new Albert School boasts many advantages of which other schools are not possessors, and it has been fortunate in having the goodwill of the residents of West St. John. Brunswick chapter, I. O. D. E., presented a framed set of war memorial pictures to the school at the formal opening, and just this week the Carleton W. C. T. U. has presented a set of 40 pairs of dumbbells as part of the equipment of the gymnasium. A lantern slide machine and a screen and a drop curtain for the stage in the fine assembly hall are other additions to the equipment which are soon to be obtained, it is hoped.

The gymnasium is not so large as the usual regulations call for, but it is proving a real factor in the life of the school community. It is a room in the front of the basement which has a small adjoining cloak room for the boys and a dressing room where the equipment is stored. The greater part of the equipment was purchased with the proceeds of an entertainment given by the pupils and some additional equipment the teachers have purchased for their own use. Badminton tournaments and basketball and volleyball games have been staged in the gymnasium, and it is one of the coveted privileges of scholars and teachers.

Aims at Library.
The establishment of a school library with necessary reference books is an ambition of Miss Harriet Smith, the principal, which is already one step on the way towards attainment. A room on the first floor of the school is available for use for retarded pupils if required. It is fitted up with a long table to serve as a room for teachers' meetings. This room has two sets of bookcases and they already hold a handful of books, the nucleus of the library that, it is hoped, will come day by day. Some of the best of educational magazines have been presented for this room.

Domestic Science.
The domestic science and manual training departments of the new Albert School are serving the whole of the West Side section. Both are splendidly equipped. Miss Jessie Hart is the domestic science teacher, and has 200 attending her classes, representing pupils from Grades VI, VII, and VIII. It is only in West St. John that Grade VI girls have the opportunity of taking domestic science, or that the pupils have three years' instruction in this subject. The classes attending include one from Beaconsfield, one from La Tour, two from St. Patrick's, and six from Albert school.

When seen at work yesterday the Grade VI girls were neatly dressed with caps and aprons, which they had made in class, and had just finished tidying up after a cooking lesson during which they had learned how to serve eggs in tempting fashion. The spotlessness of the large class room was a marvel to behold. The girls practise making at home what they have learned to make in school and the testimony of their mothers goes to prove that cooking lessons have been time well spent. As part of the domestic science course the girls have one wash day lesson, and there is a special room in the basement for hanging up the practise tubs.

Manual Training.
Corresponding to the domestic science room at the other end of the basement of the school is the manual training room where C. H. Cochrane has charge and instructs one class from St. Patrick's, one from Beaconsfield and four from the Albert school. The manual training room is well fitted up and the boys have already made models that are splendid pieces of craftsmanship. Only boys from Grades VII, and VIII, are taught manual training. Many of the pupils have shown a skill and aptitude that is remarkable, and all delight in the work.

Two big play rooms, one for the boys and one for the girls, are also located in the basement and separating them is the rifle range which is considered to be one of the best lighted of any in the city. It, also, is put to good use.

Auditorium Seats 600.

The big auditorium will seat 600, just the school population, and the whole school assembles twice a week. At the opening session, Monday morning, attendance records are read, and at the closing sessions Friday afternoon each class in turn is asked to have to charge of the programme.

Class Rooms in Use.
There is a vacuum cleaner for the blackboard erasers, which does away with the chalk dust nuisance that all teachers and scholars dread. All of the 14 class rooms in the new Albert school are in use, and the classes are conducted in the old building also. When the pupils are out at recess it is a small army of young people that scatters in the square in front of the school, but the orderliness of march when recess is over and the pupils return to school would reflect credit on trained soldiers.

SPEAKS ON SERVICE.
Rev. Dr. William Farquharson, Presbyterian and Congregational port chaplain, was the special speaker at the meeting of the men's Bible class of St. Luke's church last night. He had for his theme the approval which Jesus bestowed upon the woman who had anointed His feet with the precious ointment of service. The address was much appreciated. H. A. Finch, president, was in the chair. Frank Taylor was the accompanist. The men's quintette gave a fine selection. There was a large attendance.

McAvity, Fisher, McLellan and Potts will speak at the Pythian Castle on Friday evening at 8 o'clock. Meeting under auspices of Civic Progress Party.

DELORME TRIAL IN SEPTEMBER

Montreal, March 27.—Retrial of the Rev. J. Adelard Delorme on the charge of having murdered his half brother, Raoul Delorme, will take place in Montreal at the September term of the court of King's Bench, authoritative sources declared today.

The crown, it is stated, may have new evidence to offer in regard to the finding of Raoul's cap on the Cote St. Michel road, and it is possible that an entirely new angle will be presented to the jury in connection with the individual who entered Dr. J. Pesant's drug store at St. Michel and tendered a \$5 gold piece for aspirin.

HONOR KINGS CO. YOUNG WOMAN

Macdonald College Folks Make Gifts to Supervisor About to Wed

Miss Eleanor M. Roach, of Macdonald College, who has been supervisor of Women's Institutes for the past three years recently tendered her resignation, to take effect the latter part of June. Miss Roach is a daughter of Mr. and Mrs. Frank Roach, of Roschville, and a graduate of Sussex High School and Mount Allison. She has of late been the recipient of many tokens and testimonials of the high esteem in which she is held by those with whom she came in contact in the discharge of her duties.

The members of the Lennoxville Short Course committee were entertained recently after their meeting by Mrs. J. A. McClary and Mrs. W. C. MacDougall assisted by Mrs. Howard Dunlop. Small tables were set in the Institute room, and a delicious supper served. Miss E. M. Roach and Miss E. M. Poole, of Macdonald College, superintendent of and demonstrator to the Women's Institutes, were present, and during the evening Miss Roach, who is leaving the province of Quebec after her marriage which takes place in the early summer, and who is making her last demonstration tour to the clubs, was presented with a purse of money from the Sherbrooke County Co-operative Agricultural Societies, accompanied by an address.

Mothers know a dose of DR. CALDWELL'S LAXATIVE SYRUP PEPIN

Will keep them fit

'First Aid' For Sick Children

THE experienced mother is not alarmed when a child becomes sick. She knows that most of the ailments of childhood are trifling. If it seems serious she calls a doctor, but whether or not she calls him, she gives, first of all, a good laxative medicine. The doctor would agree that anyway. It is his "first aid." Such experienced mothers as Mrs. G. R. Paquette, Pierreville, Que., and Mrs. J. F. Beale, 325 Johnson Av., Winnipeg, always give Dr. Caldwell's Laxative Syrup Pepin at the first indication of sickness. Such timely doses have saved them much worry.

The Meaning of "Good"
All doctors agree that a thorough cleaning out of the bowels is of first importance for it removes dangerous intestinal poisons. They will also advise a "good laxative," and by "good" they mean one that is effective and yet harmless. They know that there are physics that never should be given to children—calomel, which is mercury and loosens the teeth; phenolphthalein, a constipating drug that causes skin trouble; salts, which con-

trast the blood and dry up the saliva. They consider Dr. Caldwell's Laxative Syrup Pepin safe for all ages as they know it is a simple vegetable compound of Egyptian senna with pepsin and agreeable aromatics. The formula is on the package.

Give Laxative for Colds
Adults should have at least one movement of the bowels every 24 hours, and children two or three. Failure to have it means constipation, then, headache, biliousness, drowsiness, lack of appetite. Give a dose of Dr. Caldwell's Laxative Syrup Pepin at bedtime, and there will be health and good feeding by morning. A dose costs less than a cent, and a bottle can be had at any drug store. Colds and constipation come together, so if you notice coughing or sneezing stop it at once with Laxative Syrup Pepin.

CAPITAL PYTHIANS INVADE WOODSTOCK

Woodstock, March 28.—(Special).—About 160 members of the Knights of Pythias order arrived here last night by special train from Fredericton to pay a fraternal visit to Ivanhoe Lodge. After an exemplification of degree work a banquet was given the visitors. They made the return trip, leaving at 9 o'clock this morning.

RUNAWAY GIRL DETAINED.

A young girl for some reason ran away from her home in Sydney and at the request of her parents the chief of police at Sydney sent a telegram to Chief Smith, of the local department, to look out for her. The detective department was made aware of the request and when the train arrived from the east about 6 o'clock last evening Sergeant Detective Power and Detective Biddiscombe were on hand and took the girl to police headquarters, where she is being detained. An officer will leave Sydney this morning for the purpose of taking the young girl back home.

KINGS COUNTY MAN COMMITS SUICIDE

Herman Arthur Parlee of Fox Hill Drinks Paris Green
Sussex, March 27.—Herman Arthur Parlee, aged 22 years, is dead from the effects of a dose of Paris green. No cause can be attributed for his having committed the act.

On Thursday afternoon, Parlee, who was employed as a laborer by C. C. Hayes, lumberman and farmer at Fox Hill, three miles from Sussex, and who occupied a cottage on the farm, entered his home and complained to his wife of feeling sick. He told her he had taken Paris green and she gave him hot water to drink, which caused him to vomit.

He appeared to be relieved after vomiting, but took a bad turn again and Dr. E. T. Kennedy was sent for. Dr. Kennedy gave all the medical aid possible to the victim of the tragedy, but was unsuccessful in so doing and Parlee passed away.

He was a son of Whitfield Parlee and is survived by a wife, to whom he was united in marriage about a year and a half ago, and a young child.

Coroner F. W. Wallace made enquiries into the facts surrounding Parlee's passing and concluded that an inquest was not necessary.

WOOD PLANT BURNS, SECOND IN A WEEK

Loss About \$700, Partly Covered by Insurance, in Millidge Ave. Fire

About 9:30 o'clock last night an alarm of fire was sent in from box 133 in Millidge avenue. At the time the sky was brightly illuminated and those in the streets in the city proper thought that a large and serious fire was burning. The department responded as quickly as possible and on arrival at the property of Robert Brown, 105 Millidge avenue, they found that Mr. Brown's wood cutting plant had been about entirely destroyed and there was nothing left for the firemen but to wet down the ruins.

Last night, Mr. Brown said that he had at a considerable distance from his residence a shed containing a couple of cords of wood, also a gasoline engine and a saw machine for cutting the wood for home consumption. He was seated in his home reading the paper when he heard the roar of a fire and on looking out discovered that his wood cutting plant was all ablaze.

Mr. Brown said that he had no idea as to the origin of the fire. He said

that his plant was insured for \$500 and he estimated his loss at \$700.

This is the second wood-cutting plant to be burned within a week, the Whelpley plant in Paradise Row having been destroyed on Saturday night.

The annual cost of fire defense in Great Britain is about \$125,000,000.
