A tournament was played between the Edmundston and Aroostook Valley Clubs on Wednesday, August 31st when the Edmundston players were again victorious, score being 19 to 10. Particulars of the play are as follows: Edmundston Aroostook Valley Scott 0 W Reed 3 Stevens 0 Dorsey 3 Tweedie 0 McNally 3 Barry 3 Cook 0 Chapman 3 Hart 0 Crabtree 2 Edmunds 1 Emory 3 Houghton 0 Genberg 2 Richards 0 Rideout 3 Michaud 0 Garfield Larlee 3 Hedrich 0

AUTOMOTIVE WORLD

NOW IT IS NARCOLEPSY

Of all the genuine excuses given for traffic accidents, one of the most interesting is the irresistible impulse to sleep, which has often ended in disaster for the unlucky driver so afflicted. To this ailment, Science has given the name of Narcolepsy. Does of ephedrine, a drug used in Chinese medicine as long ago as 4000 years, are now said to be effective in cases of this kind, and one New York doctor had a case respond instantly to treatment after recurring attacks over a period of twelve years, in which the patient had several automobile accidents.

THE CAR OF THE FUTURE

The part that chemistry and research play in the development of the most advanced automobiles is astonishingly great. Scientists are busier than ever before with laboratory work destined to produce automotive wonders. Perhaps no laboratory in the world is so active on motor problems as the General Motors Research Laboratory in Detroit, where the famed C. F. Kettering presides over research into power plants, fuels, lubricants and materials. Not greatly interested in Mr. Kettering in the cars of today, or even those of next year, but he and his staff of scientists are intensely concerned about what cars will be a few years from now.

CRAFTSMAN'S GUILD TO CONTINUE

Fourteen Canadian boys have returned from the International Convention of the Fishery Boat Craftsmen's Guild held in Detroit and report having had the time of their lives along with boys from all parts of the United States. While Canadians did not win any of the four University scholarships, which were the capital prizes for craftsmanship, yet they made a creditable showing and many of them will compete again. It was announced at Detroit that the Guild would continue and next year's convention and final judg-

PERSONALS

-Mr. and Mrs. L. M. Sherwood and daughters Betty and Barbara, have returned from a pleasant vacation at Shediac and Norton. -Mrs. L. G. Sears spent several days in Fredericton recently. -Mrs. D. H. Mithson and son Billie left on Friday for Everett, Washington, where they will visit Mr. and Mrs. G. J. Armbruster for several weeks. -Miss Elsie McPaden, who has been visiting her brother, J. M. B. McPaden for the past two weeks, left on Saturday for Stanstead, P. Q. Miss McPaden is Director of Music at Eastern Townships Conservatory of Music. -Mrs. C. M. Rideout and Miss Joyce Rideout are visiting friends in Saint John. -Miss Patty Clarke has returned after spending the summer months with relatives in Fredericton. -Mrs. Lillian Fournier left on Friday for Vancouver, where she will visit relatives during the winter months. -Mr. and Mrs. D. A. McAlary and children Miriam and Murray, who have been visiting friends in Andover and Harvey for the past two weeks, returned on Saturday. -Mrs. D. H. VanWar and family returned on Monday, after a month's vacation at Shediac. -Mr. and Mrs. F. Dodd Tweedie are spending the week in Woodstock and Fredericton. -Mrs. Charles Henderson, and Rainsford Henderson, who have been visiting Mr. and Mrs. Hubert Henderson, have returned to their home in St. Stephen. -Mr. and Mrs. David Warren are enjoying a motor trip around the Province. -Miss Dorothy Boone spent the week-end at her home in Oak Bay. -The final round for the Franchetti Handicap Cup was played on Saturday, September 3rd. The President, T. J. Scott, won from the Vice President, C. M. Rideout, 2 up. -Mr. and Mrs. J. Mackay of New Glasgow are guests of Mr. and Mrs. Walter B. Morton. -Dr. Mrs. F. H. Laporte are spending a few days in Ottawa. -J. N. McCaffrey was a week-end visitor in Fredericton. -Mrs. Jack Flemming and two children, Jackie and Lois of Aroostook Junction, are guests of Mr. and Mrs. Gordon McKinley. -Mr. and Mrs. F. O. White and Miss Frances White spent last week in Campbellton. -Mrs. Michael Kennedy was a recent hostess at Bridge, when her guests were ladies from Aroostook Junction. Bridge was played at four tables and the prize was won by Mrs. A. B. Gaines, and the consolation prize by Mrs. Elhel Hawkins. Mrs. Kennedy was assisted in serving the dainty refreshments by Miss Mary Melver, R. N. of New York. Mrs. Gordon Kennedy, and Miss Emily Hopkins, the rooms were attractively decorated with Mauve aster s and pansies. The guests from Aroostook Junction were Mrs. A. B. Gaines, Mrs. Levi Grant, Mrs. Kennedy, Mrs. James H. Ward, Mrs. Bernard Goodie, Mrs. Roy Farnham, Mrs. S. McIntosh of Woodstock, Mrs. Harry Hopkins, Mrs. Annie Sloan, Mrs. Ray Murphy, Mrs. J. T. Smith, Mrs. L. C. Truist, Mrs. J. T. O'Sullivan, Mrs. Paul Waken, Mrs. Frank Griffin of Edmundston, and Mrs. Victoria Dube, Edmundston.

Succeeds Kreuger

BJORN PRYTZ, Stockholm industrialist, who has been selected by creditors to be president of the International Reconstruction of the Swedish Match Company, of which the late Ivar Kreuger was head. He will attempt to settle the affairs of the company, which was the largest of its kind in the world before Kreuger's suicide barred its straits.

THE NEW BRITISH PREFERENCE

(By R. J. Deachman)

Let us examine the main provisions of the Anglo-Canadian pact, according to the story sent out, we are to receive a wide extension of preferences, in the British market. It would seem wise to examine quantitatively and qualitatively the extent of these concessions. The main items are summed up in the schedules A, B, and C of the treaty and the items themselves may as well be put down here and duly numbered so that we may look them over in detail.

Table with 3 columns: Item, New Proposed Preference, Present Preference. Items include Copper, Wheat, Butter, Cheese, Dried Fruits, Apples (raw), Pears (raw), Apples (canned), Eggs, Condensed Milk, Timber, Fish (fresh sea), Salmon, Asbestos, Zinc, Lead, Tobacco.

Note the present preferential rate on the entry of these products into the United Kingdom and the rate proposed under the terms of the recent pact. Beginning at the bottom of the schedules one may dismiss from discussion items 11 to 17 inclusive. The rates will be the same under the new arrangements as they were under the old. Great Britain grants these preferences when she arranged her tariff. It was inconceivable that the action of our government at the Imperial Conference would be such as to call for the abandonment of preferences already established. Great Britain had entered into a preferential program, after due consideration, with a national government in command in England. Empire preference was intended to do marvellous things in binding the British nations together. It is true these concessions were to expire on November next, that was merely the preliminary statement when the tariff was scarcely within the concept of the men who made them and, unless madness of an extreme kind took our government, there was scant chance that they would be revoked.

Let us put this story in a way that will be quite clear to the Western farmer and the rule which applies to wheat holds good on the other products. Suppose there are three elevators in a town, elevators A, B, and C. A farmer has been selling grain to each of these elevators. He comes along with a proposal for an agreement in which he will buy the farmer's wheat providing the farmer will offer it to him at as low a price as he offers it to any of the other elevators. Take ten minutes off and tell me what advantage you would gain from that contract. Wheat is a world commodity. It has a world price. We could always secure a world price for our wheat. This pact, with its thrilling contents promises to continue to give us what we have been accustomed to having namely, the world level in wheat prices - nothing more.

Gains or Losses

Is it possible to sum up the total trade affected from the farmer's standpoint. Even if the gains are small, how large an area do they cover? Wheat may be eliminated altogether - so too may butter - dried fruits are immaterial, canned apples are a canner's product, not a farmer's, pears are mentioned in the schedule but they are not even mentioned in our trade returns. There remains in the farm items only cheese, apples, eggs and condensed milk. Whether the trade in these will be in any way benefited in a question but let us grant the assumption that it will. How great will be the benefit? There are according to the cen-

F'ton Exhibition

Further, I read in Article 16 that the adoption of these new ruling principles for our Customs Department, the principles of fairness, abandoned, will be applicable not only to Great Britain and the Empire countries but to the world. His Majesty's Government in Canada undertakes that the customs administration in Canada shall be governed by sound general principles. That is an excellent rule - it should never have been abandoned. To make these changes in favour of one country, even of Great Britain, and the Empire countries, is a disgrace. The insertion of this Article in the agreement concedes that point. There is here the affirmation upon the part of our government that, in future, it will have some regard for proper conduct even in the administration of a policy of high protection - that is a concession worthy of commendation.

Mr. D. W. GRIFFITHS, Racing Secretary of Fredericton Exhibition to be held September 10th to 17th.

150,000 former Maritime natives and their descendants. Practically all of these more than 600,000 ex-patriates were educated at the expense of the Maritimes, an invisible drain upon the depleted resources of these people. At the dawn of their productive period, these young men and women had emigrated to produce wealth for foreign localities. This then, is precisely what was the matter with the Maritimes! The flower of their youth at inception to productive years emigrated. Not only was this loss uncompensated in any way, but a further burden was placed on the remaining productive population - increasing the ratio of those unable to support themselves (i.e., children and aged persons) in proportion to wage earners. The efficiency of the Maritimes people, the ability to succeed with opportunity, is demonstrated by the leaders in every walk of life through out Canada who are Maritime born. Industry, in its finance, education, banking, the clergy and politics - in all lines of endeavor, the list of Maritimers of prominence forced to emigrate by adverse economic circumstances in the Seaboard Provinces is impressive.

The Maritimes are now engaged in an effort to retain a generation of productive youth. Opportunity is being provided for ambitious youngsters. This will most probably stop the great exodus that has dangerously upset the balance of population. The first cycle of first-education and then emigration at dawn of the productive period is being broken. The genius of the Maritimes given to foreign localities, manifested in successful lives, is being slowly reclaimed. With comparative natural resources, the Maritimes need only to retain their man-power - optimistic, forward looking, resourceful - in order driven out by economic necessity - taking her place in tradition only the modern Evangelines is now with her Acadian sister, ending the sinister emigration; an economic egress of greater historical significance than the Eighteenth Century drama in Acadia.

THE MODERN EVANGELINES

For over half a century, the Flower of the youth of the Maritimes sought a Land of promise outside looking in. Now that the exodus has been stayed, The seasons why it has.

(Gary Moore - "THE CANADIAN")

(Continued from last week)

Throughout the statistical record from year to year, in comparison of ages, it is discovered me neglected from three to five years earlier than the young women. This to say, the exodus has been stayed. The seasons why it has. (Gary Moore - "THE CANADIAN")

This is the record of the modern Evangelines. However, if the economic status of women had not changed in the "eighties" resulting in the industrial emancipation of the sex - the Maritime situation would have eventually developed into a social catastrophe. The emigration of men would have occurred in identical fashion, while the preponderance of marriageable young women to the men remaining, economically capable of supporting a family, would have destroyed the social balance of the provinces. Even at the present day the report of the Dominion Government shows an almost dangerous ratio of young men of marriageable age to young men in the Maritimes. What of these Maritimers who have emigrated? Certainly they are numbered among the flower of Canadian stock. A large proportion has been lost to a foreign country. It is estimated that today in the City of Greater Boston there reside over
