BURNERS**

Avery Tractors Don't Just Run on Kerosene They Burn ALL The Kerosene

There is a lot of difference between the way different makes of tractors burn kerosene. Some just "get by"—others really "make good."

An agricultural engineer who is an authority on tractors writes, in reporting on the 1917 National Tractor Demonstration: "Some of the kerosene burners appeared to get along without any trouble where others, judging from the

smoke, looked as though they were burning soft coal. To be painfully exact and truthful, I may say that there are mighty few successful kerosene burning motors."

Another authority says, in reporting on the demonstration: "Unfortunately there was no final checking up on the amount of kerosene passing the pistons into the crankcase on any of the machines."

The 1917 Tractor Demonstration Proved Avery Tractors to be REAL Kerosene Burners

The rules of the demonstration were that a tractor which burned kerosene was allowed only 5% as much gasoline as kerosene for starting. All tanks were drained, filled and sealed under the supervision of a fuel inspector.

The Avery Company accepted the rule gladly as an opportunity to show that Avery Tractors were real kerosene burners. The tanks on every Avery Tractor were filled with kerosene and every day of the entire demonstration every Avery Tractor proved that it was a real kerosene burner.

Avery Tractors Did More Than Just Burn Kerosene.

They not only burned kerosene but—
They burned kerosene without calling for any more gasoline during the entire week than the 5% allowed for the first day's filling of kerosene.

They burned kerosene without a lot of black smoke coming out of the exhaust—showing that they did not waste fuel but burned all of it.

They burned kerosene without the fuel passing the pistons and cutting the lubrication—the oil in the crankcase did not have to be changed.

They burned kerosene without wasting oil—as do tractors with mechanical oilers where the oil is used only once.

And to show that Avery Tractors would do even more, two sizes were run on distillate.

Burning Kerosene is One Thing— Burning ALL of it is Another

It is a big step in advance from burning gasoline to running on kerosene, but it is just as much or more of a further step from running on kerosene (as most any tractor

can do for a little while) to burning all of the kerosene, as do Avery Tractors.

Avery Tractors are the only make of tractors with a Double Carburetor and Duplex Gasifier Fuel System and the only make of tractors that really burn all the kerosene.

Owners of Avery Tractors Burn Kerosene Successfully

Avery Tractors are making records in the field burning kerosene as well as at demonstrations and exhibitions. Read below what owners say.

"Our engine runs as smoothly on kerosene as on gasoline. We haven't had a bit of trouble with it."

J. D. Steele, Daviess Co., Ill.

"Am using kerosene all the time except for starting and it works just as well with it as with gasoline."

Wm. F. Schroeder, Renville Co., N.D.

"There are eleven gas and oil tractors in our country. None of them handles kerosene as well as the Avery."

Hosea O. Stoner, Hancock Co., Ind.

"Am using my Avery Tractor plowing every day and it is giving the best of service with pure kerosene."

Geo. R. Squire, Wood Co., Ohio.

"Our Avery Tractor burns kerosene as good as any other make of tractor burns gasoline."

J. W. Eggelson & Sons, Bates Co., Mo.

"The Avery Tractor sold me last fall, is the only successful tractor burning kerosene in this territory."

Fred Caves, Jackson Co., Okla.

The best time to place your order for a tractor for 1918 delivery is right now. See the nearest Avery dealer, or if there is no Avery agent at your trading point, write us for complete catalog, and we will take the matter up with you direct.
