

Gurney-Oxford "Senior"

\$38.50

If a range ever can be said to "smile a welcome," this big, capable, sturdy, handsome fellow, the Gurney-Oxford "Senior" does it, and makes your kitchen a place of comfort, ease and well being for many, many years. Everyone says, "my, what a handsome stove!" and the price almost has to be low so it will get any attention at all.

A magnificent Steel Range—strong, rugged yet beautiful in its usefulness

The price is low—so low that only the tremendous buying power, designing brains, and huge output of our big foundries are equal to the task of giving you this tremendous value. We don't know where else in Canada, or when during any period of our 70 years' experience, that your dollars would buy so much stove value, improvements, quality, materials and exclusive features as in the Gurney-Oxford "Senior." The shipping weight alone, (455 lbs.) tells its own story of honest materials and long service.

Remember, you have to cook over 1,000 meals every year!

You pay the full extravagant price, hundreds of times, in wasted food, spoiled baking, repair bills, fuel loss, frayed nerves, if you buy a cheap, flimsy shell of a stove just got up to sell. The Gurney Foundries don't know how to make that kind, and won't learn. The "Senior" will make cooking a pleasure—the oven is the wonder of the stove world, it is absolutely evenly heated in every inch. This is due partly to scientific fire-box building and special grates, but, especially, to our famous "divided flue" system which surrounds the oven with a perfect heat sheath.

Body is heavy blue steel, plainly but richly ornamental with nickel trims. Top is polished and built never to sag nor crack. Built throughout to stand a generation of the hardest use.

Price quoted above is for six 9-inch covers, right-hand 6-gallon hot water Reservoir, big Warming Closet, lift-up Broiler Key Plate, etc., and includes freight to any point as far west as Fort William.

Many, many years of comfort at ridiculously little cost in this

\$9.75

GURNEY-OXFORD "OAK"

You need our Book to get full particulars of the wonderful value. A handsome, dignified Heater that will beautify any home; clean, economical fires result from its famous duplex grates; fire-box can be fitted with feeder if desired, also smoke guard; uses coal, or magazine can be lifted out to use wood; fire-pot extra heavy and corrugated for strength and extra heat giving; highest grade cast iron with heavy blue-polished steel.
